"If it was Sir Keith Joseph's intention to run down the industry he could have done it much more cheaply with the present chairman, Sir Charles Villiers, who was not doing it at all badly. We are most consend that statements made to cerned that statements made to the press without consultation with anyone become a fair

At Port Talbot, all but one union, the electricians, have union, the electricians, have signed an agreement to shed jobs, reducing the workforce there from 12,584 to 5,701. The Lianwern unions are also expected to agree to job reductions from 9,353 to 4,899.

Mr MacGregor said yesterday that he hoped the agreements would avoid the unhappy possibility of closing one or both plants. And again he said: "I see storm clouds on the horizon."

Mr Sirs has been criticized for agreeing to the Port Talbot deal, but has replied that it was signed at plant level without consulting union headquarters. Referring to the size of redundancy payments, he told a recent meeting of the Wales Labour Party that it was difficult to prevent men from accepting the BSC's 30 pieces of silver."

'Workers must fight': Miss Ann Clwyd, Labour MP in the European Parliament for Wales, Mid and West, said that if Mr MacGregor believed that he was "going to butcher the steel industry in South Wales", then he "should think again" (the

Press Association reports).
She said; South Wales stands as the hardest hir region in the whole of the EEC in terms of job losses in steel and associated industries."

Speaking at a meeting in Llanelli, she added: "Steel workers in Wales must resist these closures now because the scale and speed of this rundown has not been accepted in any as collapsed, but other country in Europe."

### Nupe to seek 50 pc pay rise and cut in hours

From David Felton Labour Reporter Eastbourne

gave a warning yesterday that it was not prepared to accept Government exhortation to restrict increases in the next pay round and is to prepare a claim of between 40 and 50 per

Despite successfully opposing a move at its annual confer-ence in Eastbourne yesterday which would have committed the National Union of Public Employees to a specific claim for a £85 minimum weekly rate, the union leadership will pursue a claim for two thirds of national average earnings.

Union officials have esti-Union officials have estimated that this could mean a claim for about 580 a week compared with the present basic wage of £54.45. A five-hour cut in the working week, extra holidays, and index linking future pay rises will be included in next winter's demands.

included in next winter's demands.

Mr Alan Fisher, union general secretary, also set himself apart from some leading members of the TUC general council when he told conference that he was prepared to reopen discussions with the Government on pay.

on pay. But he insisted that the talks could not be restricted only to the level of pay increases. As a prerequisite, there would have to be a commitment from mini-sters to discuss the whole range

of economic policy.

Left-wing attempts at the conterence to commit the 700,000terence to commit the 700,000strong union to call a special
conference to draw up a plan
of action if the pay claim was
not met in full was opopsed by
the union's executive.

Mr Fisher urged delegates
"not to kid ourselves. Let us be
realistic and let us be sensible".
He said that to achieve the aim
of the motion the union night
just as well send a telegram to

just as well send a telegram to employers and wait for the

employers and wait for the rejection.

Later he said the executive did not disagree with the principle of the motion; but only the means by which it could be achieved. He expected negotiations covering local authority and national health service employees to be "very difficult".

The union was heavily involved in industrial action in the winter of 1978. 79 against the Labour Government's 5 per

the Labour Government's 5 per cent pay award. Fear of being committed to taking similar action next winter was an important factor in the decision to reject the left-wing motion 267,000 to 186,000.

Selection of MPs: Mr Bernard Dix, assistant general secretary said in the political affairs debate that the union executive tions of Labour MPs by constituency general management committees and the election of the Labour Party leader by the membership, including con-stituency parties and unions (the Press Association writes).

It was also in favour of the national executive having res-ponsibility for the election manifesto and publication of the minutes of the Parliamen-tary Labour Party so that "we can see if our union-sponsored MPs are putting forward the views of our union

election in November.

Mr George Bush withdrew

from the race for the Republi-can presidential nomination today. In a statement read to

a press conference in Houston, his home town, he said that he

had sent a telegram to Mr Ronald Reagan, who has now

won the nomination, pledging to support him in the party convention and in the general

raise money to compete in the

remaining primaries.

By all counts, Mr Reagan has nearly enough delegates. He needs 998 to win, and it has

been clear for some time that

he would reach that number

next week, if not sooner, what

ever Mr Bush achieved in the

last primaries. Mr Bush won the Michigan primary last

Tuesday, by a large margia, but

on the same day Mr Reagan picked up enough delegates to

enable two television networks to declare that he had already won more than the necessary 998.

Mr Bush said this morning:

"I see the world not as I wish it were, but as it is I am an

optimist, but I also know how to count up to 998. Despite our success in Michigan last week, Governor Reagan has a substan-

tial overall lead in delegates.

That, in itself, would not curb my optimism except for the fact that there is a wide-spread perception that the cam-

paign is over. As a result, it

has become increasingly diffi-

cult to raise the funds needed

to mount a successful campaign in the remaining major primary

states.

"It has also become clear

that however well I might do in New Jersey and Ohio a week from tomorrow, the results in those states would not turn the

He therefore sent a message

1980 presidential nomination. I

race around."

to enjoy what one policeman cheerfully called "a little police barassment". There were a few fights, and one or two unpleasant incidents during the day; but in the main 300 to 400 police kept the

groups apart and on the move, allowing daytrippers to enjoy muggy sunshine largely undisturbed.

At Southend heavy deterrent sentences passed by magistrates earlier this month had the desired effect. Fines up to £500 and jail sentences kept nearly all the

hooligans away. Police said there were fewer than 200 potential troublemakers. Only four arrests were made. At Margate, 12 arrests were made after

200 skinheads and punks were involved in minor scuffles during what the police said was "a fairly normal Bank holiday". Great Yarmouth was the only trouble spot Gangs fought one another. Cars were

vandalized. Police set up roadblocks our-side the town and made 20 arrests. Luton airport disrupted, page 2

### 50 clergy arrested in Johannesburg march presidential From Ray Kennedy

ohannesburg, May 26

In one of the most bizarre episodes in more than six weeks of unrest in South Africa over Coloured education, police today arrested some 50 clergymen, including at least two bishops, as they marched through the city centre.

The clergymen had marched

The clergymen had marched two by two from an inter-denominational prayer meeting more than a mile away which they had held for the Rev John Thorne, a Coloured minister of the Congregational Church and former general secretary of the South African Council of Church and the secretary of the South African Council of Church and the secretary of the South African Council of Church and the secretary of the secret Churches, who was detained by security police at the weekend after making some outspoken comments about the coloured povcott

election in November.

He said that he had spent the weekend reassessing his chances, in the light of the number of delegates already selected, which gave Mr Reagan a wide lead. The odds were clearly heavily against him, and the general realization that Mr Reagan had already won the nomination made it difficult, he said, to raise money to compete in the The march was held through rush-hour morning traffic, which was reduced to a crawl. Leaflets calling for Mr Thorne's release were distributed as the clergymen headed for police headquarters at John Vorster Square.
The police, dressed in riot

immediately outside the offices of the biggest selling English-language newspaper in South Africa, The Star. The clergymen were rounded up and shepherded into police vans singing the hymn "Onward Christian soldiers". More than

seven hours after their arrest they were still being held. The Star, from its grandstand viewpoint, reported in its first edition that armed police had

used batons to beat back onlookers as the clergymen were arrested. The clergymen themselves were apparently not nolested. The newspaper reported:

Many incidents of violence were witnessed. Police with teargas masks, automatic rifles and pistols shepherded the still singing churchmen into police vans while police were seen by several reporters hitting onlookers. Among them were a leaders.

young Indian girl and a blac

Among those held were the Among those held were the Anglican Bishop of Johannesburg, the Right Rev Timothy Bavin; Bishop Desmond Tutu, the general secretary of the South African Council of Churches whose passport was recently withdrawn; the Anglican Dean of Johannesburg, the Very Rev Simeon Nkoane, who has been charged under the has been charged under the Group Areas Act for living in church premises next to the cathedral in a designated white area; and the Rev Fred Bell, of the Federation of Evangelical Lutheran Churches.

Late today Mr Thorne was released from police custody but the detained clergymen were being held overnight in the cells at John Vorster Square. They are expected to appear in court tomorrow charged under the Ribtous

Assemblies Act.

Cape arrests: Police acted today
to quell the continuing antiapartheid student protests, detaining more than 60 people in the Eastern and Western Cape, and breaking up a protest meeting at the University of the Western Cape, near Cape Town, with tear gas and a baton charge (Gerald Shaw reports from Cape Town).
About 1,000

Coloured students at the university were meeting in a cafetoria when police fired tear gas canisters close to the building. As the students emerged, they were beaten with batons by riot

police. According to a police statement, police were stoned by students who were attending an illegal gathering and the students were baton-charged At coloured high schools in the Cape peninsula there was a massive boycott by pupils in

defiance of an official matum to return to school today or be expelled. But a planned mass rally in central Cape Town was called off by the pupils

### Kabul swept by fresh anti-Soviet protests

Delhi, May 26.—Troops arrested more than 100 stu-dents during anti-Soviet demon-strations at Kabul university yesterday, according to a tescher who arrived in Delhi from the Afghan capital today.

She said at least 50 people were reported to have died in Kabul in the past two weeks in a fresh upsurge of protest against President Babrak Kar-mal's Marxist Government and the presence of Soviet forces in the country.

A British businessman on board the same flight said stu-

dent leaders had called for more demonstrations today but the city was quiet when he left. The Afghan teacher said she saw the demonstration at the university by 1,000 students and schoolchildren, some as young as six. Soviet and Afghan troops at the camous charged troops at the campus charged them with batons and electric cattle prods but there was no

shooting.
A young Frenchwoman, who regularly to buy carpets and clothes, described the atmo-sphere as very bad. One unconfirmed report she had heard was that 20 Soviet soldiers were hurt in an outbreak of shooting in the Kabul bazaar last week.

There was a lot of helicopter activity over the capital and official cars toured the streets broadcasting announcements urging people not to demon-

"They were trying to per-suade people to support the Government and saving that the Soviet Union was their friend",

### Home Office unhappy about borstal meditation

By Lucy Hodges

The governor of a girls' borstal in Kent has been pre-vented by the Home Office from giving a talk on the benefits of transcendental medita-tion at a conference this week-

Miss Una McCullum, governor of East Sutton Park borstal, was due to speak to a conference organized by the Maharishi Mahesh Yogi's followers at Mentmore Towers in Bucking-hamshire. Her talk was to be called "The use of the transcendental meditation pro-gramme with young offenders". Arrangements for the event

were progressing smoothly until an eagle-eyed civil servant in the Home Office happened to spot Miss McCullum's offering. A letter was dispatched remind-ing her of the rule about civil servants not using their official titles when speaking publicly, without prior approval. Since the Home Office does not approve the use of TM in bor-stals or prisons, Miss McCullum was forced to withdraw from the conference.

"I did not know anything about this rule but I accept that I must withdraw", she said. "I would have been speaking personally about my own use of TM and about its usefulness in my work with young offenders."

Miss McCullum refused to Miss McCullum refused to comment on whether young offenders would benefit from learning the TM technique, because she thought it might do more harm than good to be quoted on the subject. But she said she could not understand why the Home Office would not allow it to be tried out. "I really don't understand this prejudice, but I think they may be afraid of using anything that appears cultish, and unfortunately they lump TM into that category." that category.

Transcendental as taught by the Makarishi's World Government of the Age of Enlightenment, which owns Mentmore, does not claim to be a cult, a religion or even a movement. It involves learning the techniques of meditaring and can be picked up by a novice in seven days. Its practitioners say it makes them feel good, relieved of the accumulated stress, tension and fatigue

At the conference on law, society and crime this weekend, meditators will be explaining what the techniques can do for offenders. More than 300 inmates at San Quentin and Folsom prisons, in Cali-formia, have been initiated into its mysteries.

The little research that has come out of North America suggests that recidirism is halved among meditating prisoners after their release from jail. Some United States judges have made TM a condi-tion of probation orders and suspended prison sentences. and the use of the techniques is recognized in Indian prisons. Speaking at the conference will be two judges from the Supreme Court of India, together with Mr Justice Y. V. Chandrachud, chief justice of

that court.

Mr David Lines, designated as Minister of Natural Law and Order at Mentmore Towers, said adherents of TM thad been runent and saying that the t Union was their friend, id.

Labour Reporter

The prospect of up to 1,400 employees being bused to work past an angry official picket line, as they will at the Isle of Grain this morning, might at first invite a comparison with Grunwick. In fact the dispute could hardly be more different. Nearly all of those who will run the gauntlet of hostile General and Municipal Workers

Union members on picker duty today are card-carrying trade unionists. Most have the full authority of their leaders to defy the picket.

Expected to be among them

are 19 recruits who are being trained to do the work of GMWU members.

Mr Len Murray, general sec-retary of the TUC, is to join union leaders tomorrow, after the dust from this morning's picket line conflict has settled, in a fresh attempt to resolve what hegan as a pay dispute, threatening completion of what could be Europe's biggest oil-fired power station, and has taken on the overtones of an interunion conflict.

On one side is the GMWU. who represent 27 laggers, or thermal insulation engineers, with 33 ancillary workers.
On the other are unions spearheaded by the Amalgamated Union of Engineering

Workers' construction section and the Electrical, Electronic, Telecommunication and Plumbing Union, who are determined to keep work going at the site.

The inter-union outcomes was underlined vesterday by Mr David Basnett, general secretary of the GMWU, who appealed for a "peaceful inter-union dimension appealed for a "peaceful demonstration" by his members at Grain this morning, but

mining "the fundamentals of trade unionism" by taking over jobs traditionally the

GMWU's.
Overshadowing the dispute, however, is "the client", the Central Electricity Generating Board, with £550m earmarked for Grain, no direct employees among the construction workers at the site, but a pervasive influence on the course of industrial relations there.

Laggers take a four-year apprenticeship, after which they are required to be competent in at least 16 officially listed skills. They carry out insulation work on oil refineries, breweries, hospitals and many other projects. In power stations they are responsible for insulat-

ing boilers, pipes and turbines. Traditionally they have en-joyed differencials over most other groups on large construc-tion sites. At Grain, until lag-ging work stopped in July bonus earnings fluctuated sharply, but on occasions the agreement with CDN Insulation Ltd. the specialist contractor which employed the laggers, yielded earnings of more than

£300 a week. In July the laggers were laid off in an unrelated dispute with a scaffolding contractor. At the same time CDN said it would

end the site agreement.

In effect, the CEGB had, in the words of one union official, decided it wanted to "call the tune as well as pay the piper.". It told CDN that bonus earnings would be limited to £2.50 an hour, reducing earnings to £184 end the site agreement.

for a 40-hour week.

The board's terms were rejected as a basis for a return to work, in December it ended

accused other unions of under- Mr Frank Earl, the union's mining "the fundamentals of national officer, which met the trade unionism" by taking CEGB's demands He recommended the formula to the men, without success. The GMWU then "withdrew" from the dis-

pute, recommending that no member should work at Grain. The CEGB's determination during successive attempts to solve the dispute reflects an importance extending far bewond Kent.

Work started at Grain in 1971 before the oil crisis, when a 3,300 megawart oil-fired power station seemed desirable. In written evidence to the Parhamentary Select Commit-tee on Energy the GMWU say baldly that CEGB "do not need Grain". At stake for the board is the prospect of a nuclear construction programme dogged by a nazging laggers' differential, providing a continual spur to leap-frog-

gine pay claims.

The GMWU says the laggers' job is especially dangerous and that a serious health hazard is posed by the use of non-craftsmen.

The union says that manmade glass fibres used as a substitute for asbestos have been shown in tests on rats to be carcino-genic. The board replies that that is still a subject of medical

Controversy.

During the spate of disputes at Grain in the mid-70s the itinerant workers on large construction sites wrote a song: "The green green grass of Grain". which described in most unhomely terms the rigours of

working there.
It will be the unenviable task of Mr Murray and his colleagues to determine whether anything its contract with CDN. more than grass will grow at CDN later agreed terms with Grain in the coming months.

MP's Bill to protect five million 'guinea pigs' a year faces challenge in the Lords

## Clash on reforming century-old law on laboratory anima

Science Editor

Attempts to introduce legislation by private Bills in Parliament to change the regulations governing the use of animals in research and experimental

laboratory work are meeting growing hostility. There is no support from the Government Yet there is a universal agreement from the animal welfare bodies to the chemical ment's advisers to commutees of the learned scientific

that change is

its reaching the statute book are Research Defence Society.

forthcoming debate should explain how an extraordinary and confusing situation has arisen. The difficulties lie in two private members introducing proposals last year for the reform of legislation created more than 100 years ago, in the

Cruelty to Animals Act, 1876. But the two proposals have different origins. The first one, introduced by Mr Peter Fry. Conservative MP for Welling-borough, as the Protection of Animals (Scientific Purposes) Bill, had the support largely at the time of the animal welfare

shortly when the Laboratory and anti-vivisection groups.

Animals Protection Bill, intro-Animals Protection Bill, intro-duced by Lord Halsbury, goes sented by Lord Halsbury were

Substantial sections of the two Bills are in clear conflict. Nevertheless there are powerful arguments on both sides for new legislation because of the differing circumstances since

the original Act was passed. The number of animals used for experiments has risen from few hundred to more than five million a year.
When legislation was first

introduced, the main use of animals was for scientific research to extend basic knowledge for medical and veteri-

terry work.

The reason for the vast increase lies in the tests of products from pharmaceuticals to cosmetic colouring to meet other devices.

to the committee stage in the drafted by a group of eminent statutory obligations that are Lords. However, the chances of scientists belonging to the enshrined in regulations, for example, under the Agriculture (Poisonous Substances) Act, 1952, the Food and Drugs Act, 1953, the Medicines Act, 1968, and the Health and Safety at

Work Act, 1974. The sort of safety tests in-volved rarely yield anything surprising. There is evidence to suggest that they have little value in assessing the safety in use of a product by a human being, which could be discovered by alternative methods of analysis. Those are the newer tests using tissue cultures, computer simulation and

The Royal National Life-boat Institution's financial target for 1980 is fin a month, not fin as stated in a report on May 23.

### Training course fees may rise by 35%

of The Times Higher Education Supplement

The Manpower Services Commission could face a 35 per cent increase from next September in the fees it pays to local education authorities for the training and retraining of school-leavers.

The National Association of Teachers in Further and Higher Education, which is holding its annual conference in Scarborough, said yesterday that any such move would seriously provision of opportunities for further education for school-

The fees are fixed annually by the two local authority associations, the Association of Metropolitan Authorities and the Association of County Councils, before the start of cach academic year. But any increase in the course fees would affect the commission after its budget allocation had been fixed.

Mr Michael Farley, the union's assistant secretary for further education, said that the commission would be forced to reduce severely the number of students it sponsored through the training opportunities pro-gramme and youth opportunities programme.

"The association would be extremely concerned if local authorities imposed such outrageous increases, especially after last year's disappointingly large increase", he said. It is thought that the two

### Wholesalers' pay dispute halts paper deliveries

By Our Labour Editor For the second time this month national newspapers were not delivered to newsagents in London and parts of the South-east yesterday because of a dispute involving about 3,000 wholesale distri-

bution workers. The wholesale staff, who belong to the Society of Graphical and Allied Trades, are involved in a long-standing dispute with their employers over a claim for Bank holiday payments equivalent to those paid to Sogat members employed on the papers.

Inspector to resign Inspector Alan Murray, aged 30, the former special patrol group leader of number one unit, who gave evidence at the Blair Peach inquest, will resign from the Metropolitan Police when it ends, Scotland Yard said yesterday. The jury retires today to consider its verdict.

Mr Evans, who spent the Bank holiday preparing his speech to the weekend confer-

search; the second will cover the attitudes of employers and PhD students.

مكذآ سالاص

Sir Peter believes that it is much more difficult to obtain a PhD in the humanities than in the sciences "They are not of the same standard", he said. "In the sciences, one's idea of a PhD thesis is what a competent, hard-working man\_can achieve in three years. That concept is not even relevant in the humanities, where a PhD is based on the idea of an inde-pendent completed contribution

to knowledge.
"In the humanities, know ledge often comes in packages which are simply too big to fit into three years; it probably requires five to six years full-time work to produce what is considered the right standard. There are a lot of distinguished professors in the humanities whose best book is their PhD

thesis gingered up slightly.
"The time required for PhD in most subjects in the humanities is quite at odds with the maximum three-year research grant given to PhD students. It is not right or fair that humanities students em-barking on a PhD are not told

"One possible solution would be to split the PhD degree in the humanities into two phases, doctoral and post-doctoral; but that may not be feasible on account of the nature of the work involved. Imposing a time limit does not help, as that merely means you fail students

"It may be necessary to make the entrance require-ments for a PhD in the humanities much suffer and to accept fewer candidates but to fund them for the full five to six years if that is what they need. "A. E. Housman was once asked by a student if he should

become a poet. He answered: 'If you have to ask that question, no'. The same should apply to research in the humanities. In the sciences it is different, because what you do in three years advances both your skills and knowledge." Sir Peter said that a sugges-

tion by Mr Michael Posner, chairman of the Social Science Research Council, that in the search in Britain. social sciences some PhDs nmittee has just should be "linked" with a arter of all departviversities and polyor, among other r PhD completion "could make sense" in some "manifer subjects are resticuted." humanities subjects, particu-larly in the social sciences.

"But in no way could it be considered right in many of the arts subjects. Team research in English, for examearch councils and ple, would be absort o postgraduate re-preposterous", he added.

### Free transport for London could mean doubled rates

By a Staff Reporter Labour Party proposals for London, including the reduction and possible abolition of public transport feres, could increase rates by 89.5 per cent in real terms within three years, the London Chamber of Commerce and Industry said yesterday.

The chamber believed last week's proposal of the Greater London Labour Party, aimed at next year's Greater London Council election, were naive and took little account of the capital's real industrial and commercial requirements.

There was no evidence, according to the chamber, that introduction of free or heavily subsidized public transport would encourage more people to use bus or Underground services. Yer the intro-duction of free transport in London would double the rates.

more unified approach to trans-port. It saw a lack of logic in Labour proposals to abandon important road building pro-jects, including the docklands southern relief road, while at the same time pushing for a commitment to extend Jubilee Underground line into the docklands. To invest in both would be more sensible, the chamber said.

It also deplored Labour's pro posal to create "bureaucratic bodies" such as a greater London enterprise board and a greater London manpower board, which would further inthe burden on rate-

It condemned as one-sided Labour's plan to concentrate on council housing. If implemented it feared, the proposals would result in rate increases that would drive many small firms out of London.

### Cost of church establishment unacceptable? From Our Correspondent Peterborough

Peterborough

A country parson has attacked the high salaries being paid to Church of England administrators. The Rev John Harrington, rector of Doddington and Benwick, Cambridgeshire, says that the £22,500 annual salary for the new secretary of the Church Commissioners would more than pay for five parish priests.

for five parish priests. Mr Harrington writes in his parish magazine: "It is high time that parishes challenged the unacceptable cost of the establishment.

"We still have bishops riding around in chauffeur-driven cars, all expenses paid and living in residences that must cost the earth to maintain and run. We still maintain unacceptable differences in stipend levels; and we still need to face the scan-dal of many married clergy in parochial service qualifying for family income supplement."

### Landowners urged to help halt rural jobs decline

The Country Landowners' Association wants its 50,000 members to create jobs in a campaign to halt rural depopulation. It has decided after a two-year investigation that there is no hope of ending the

steady reduction in the national farm work force.

It believes that jobs will have to come from new projects outside agriculture. It fears that many landowners will shrink from encouraging light industry and tourism and con-siders that they have not done enough to stop the decline in the working rural population.

A working party on jobs convened by the association has reported to it that "unless land-

owners initiate or cooperate with suitable developments in rural areas then very little can be achieved in the way of creating new employment op-portunities".

The working party has called on the association to encourage members either to create jobs outside farming or to sell and hire land to those who will. By looking to jobs outside farming for rural recovery the associa-

tion has taken a course different from that adopted by EEC authorities. They use central funds to maintain the size of the farm labour force, The association's working party has based its policy on a survey of 253 members' estates which cover almost 500,000 acres in England and Wales. Fewer than half of the employees in the survey worked farming. The greater part. included gamekeepers, gardeners, stud and forestry workers

and farm shop staff. The working party says that employment law discourages job creation. "The burden of proof on employers in dismissal cases should be eased", it adds.

### Housekeeper dies as police hunt prisoner on the run

The housekeeper who was critically injured during the murder of a pirest in Rams-gate, Kent, on Friday, died in hospital yesterday as the police continued their search for an Gailagher, whom they wish to

The police have received a series of reports about the whereabouts of Mr Gallagher, who comes from Dundee. Miss Maude Lelean, aged 73, died after being found unconscious next to the body of Father Edward Hull, aged 88, a retired Roman Catholic priest, who had been beaten to death in the presbytery of St Ethel-bert's Church, Ramsgate. Kent police said yesterday

that they were urgently seeking Mr Gallagher, who failed to return to Maidstone prison on May 12 after being allowed out

on heave.

Two MPs are to ask Mr William Whitelaw, Home Secretary, why Mr Gallagher, described by the police as extremely violent, was allowed home visits and why clergymen were not warned earlier to be on their guard.

#### Search continues for snatched boy

The police were continuing their search yesterday for Raymond Platt, aged 10, who disappeared from Nazareth House. Lasswade, a Roman Catholic home near Edinburgh, on Sunday. They were told that the boy had been taken by Protestant extremists. by Protestant extremists.

The Scottish Daily Express and the Daily Star vesterday, carried photographs alleged to be of the boy with two hooded members of a group called the Scottish Protestant Freedom Fighters.

#### Forsyth best seller

Frederick Forsyth, the author, has sold his Victorian home in co Wicklow, Ireland, for more than £300,000. He bought it for £65,000 four years ago.

### **EEC** food safety law is opposed

By Hugh Clayton Agriculture Correspondent

Plans by the EEC to impose a new food safety law in Britain should be rejected, the Consumers' Association said in a report to be published today.

It saw no case for imposing laws in Britain about residues in food of sprays used on farms against weeds, insects and fungus diseases.

chemicals can persist in crops. The Community has adopted a directive about fixing legal ceilings for the amounts of such residues in food. Its aim is to harmonize national laws so that barriers to trade in fruit and vegetables between member states can be removed.

The association believed that the EEC proposal was based on German laws. "There is a firm conviction in West Germany that pesticide residues present a direct, albeit long-term, health risk", it said. "This must be due in large measure to misguided and ill informed opinions given prominence in the media."

The association found that German opinion was immov-able, but there was no similar worry about farm chemicals and their residues in Britain, where there are no legal ceil-ings for residues. British health authorities rely

on the correct use of sprays on farms. "It has to be accepted that mistakes and even misuse may occur", the association commented.

The association decided that the German system was cumber-some and expensive, but not foolproof, and that there was no case for imposing it in Britain.

# Now you can stretch out all over he world.

Pan Am can now offer 747 First Class travellers more comfort and more room than there's ever been on any aeroplane before.

More comfort because the Sleeperette®, our remarkable new reclining seat, will stretch with the out to nearly six feet. Which means that you can really stretch out, too...to read, relax, even sleep.

More room because this remarkable, reclining seat extends the length of four-and- out and enjoy a-half windows and leaves plenty of room between rows.

And, of course, there's the international cuisine and standard of service that has made

Pan Am's First Class the choice of travellers everywhere.

Ask your Travel Agent to book you on Pan Am. The airline with the worlds preferred plane, the 747, and Sleeperette seat on every one. When you fly the world, stretch it on Pan Am.

We fly the world

work on the principle that a fish is there to be caught and does not have a particular riparian name attached to it.

The penalties may be high, but the rewards of not being caught are also great. There is a sense of tradition to live up to, and a resentment that over the border in England a man can drift his net to his heart's content, although he may not catch many salmon.

Captain Proudlock, superintendent to the River Tweed Commissioners, believes it is the Scottish legis-lation that has protected such salmon arteries as the Tweed, the Dee and the Spey.

He said: "Over the last year and certainly this year the threat is being contained. A lot depends on it. Scottish salmon provides quite an industry through visitors and tourism, and through the whole of the country I would say there are 2,000 people who owe their livery in the country I would say there are 2,000 people who owe their livery in the country I would say there are 2,000 people who owe their livery in the country I would say there are 2,000 people who owe their livery in the country in ing to salmon fishing and whose jobs would disappear if there

was a free for all.

this year by a formidable new weapon. a 57m jet-powered hydrofoil able to travel at 45 knots and perhaps penetrate the elaborate warning system of the salmon poachers. Other successful methods have been to fly in patrols by helicopter, or whisk them to the scene of approaching crime from a large

vessel over the horizon in fast, hard-hulled inflatable boats.

The Navy's anti-poaching patral, judging by their unpopularity, are clearly making a hole in the clandestine earnings of the poachers. One naval officer recalled a hasty retreat from an east coast fishing port after a group of locals gethered threateningly on the quayside and someone drilled holes in vessel used by the Tweed Commissioners.

The Navy finds a sharp difference between its relations with offshore vessels boarded for checking and the inshore fishermen, who are unyieldingly

A patrol officer said: "Some-how the deepwater vessels see that we are protecting them and their waters against foreign poachers, while the inshore boats seem to think we are a maritime extension of the laird's bailiff.

"A salmon poacher basically does not believe he is committing a crime and does not see what he is doing as any threat yas a free for all." to conservation. But I think we The Royal Navy salmon patrol are getting the message across." By Martin Huckerby

Music Reporter Some of Britain's most eminent performing arts colloges are facing severe difficulties because local authorities are cutting discretionary grants for students. In a few cases the continued existence of the schools may be at risk.

Dance schools are suffering most from the inability of their students to obtain grants, but music colleges and drama schools are also being affected. In the search for ways to reduce spending, many education authorities have drastically cut the number of their discretionary grants, and they are equally unwilling to pay the fees for students in such cases.
Although many authorities have still to decide finally on nave still to decide titially on their policy for the 1980-81 academic year, colleges and schools four that large numbers of talented students will be un-

shie to take up their places in Two of the three main institutions in British dance educa-tion are in danger, according to Mr Peter Brinson, director of the Gulbenkian Foundation in

the United Kingdom. the United Kingdom.

He said a recently completed national study of dance education and training to be published shortly had concluded that the Royal Ballet School, the London School of Contemporary Dance and the Laban Centre each made an indispensible contribution, yet the last sable contribution, yet the last

tive were at risk.

Dr Marion North, director of the Laban Centre, said their situation was desperate. The college offers the only BA dance degree in the country. hut last year, when it accepted 68 students for the course, only 23 were able to take up their places. The rest could not obtain grants. Other courses at the centre were equally badly

think this year is going she said. If the drop in students continued, it could cause the

closure of the school.

Mr Richard Ralph, principal of the London School of Contemporary Dance, is worried that the coming year will see a big reduction in student numbers. In the present year at least twenty students, a fifth of their numbers, had been forced to drop out, in many cases local authority grants

were not available.
The existence of such private institutions is endangered because they are almost totally dependent on student fees. Public institutions are in a Stronger position.

Mandotory grants are provided for many performing arts courses, and thus music colleges and drama schools may avoid serious damage; but such col-leges are still having trouble. The Royal Northern College of Music pointed out that stud-

ents on postgraduate courses were at the mercy of the edu-cation authorities; the college arrected greatly" by the grant cutbacks. Mr John Hosier, principal of the Guildhall School of Music and Drama, said students were finding it impossible to obtain grants for fourth-year studies such as the opera course and the advanced conducting course. At the new National Centre for Orchestral Studies Mr Basil Tschaikov, the director, said the situation was extremely serious. "It could well be that if we cannot get sufficient grants for sufficient students we shall not be able to function."

### Legion to launch £100,000 appeal for centre

The Royal British Legion is to build a £300,000 rehabilitation centre for disabled ex-Servicemen at Maidstone, Kent. Delegates to the legion's annual conference in Blackpool be named the Churchill Centre and would be the legion's con-

ribution to the international Year of the Disabled next year, the legion's sixtieth annive Captain Harold Whitehead,

chairman of the legion, said:
"This new centre will help
men wounded in Northern Ireland as well as soldiers from the two world wars and the general public." An appeal will be launched by the legion among its branches to raise £100,000

towards the capital cost. Dr Gerard Vaughan, Minister of State for Health and Social Security, has given the centre government support.

### Cut in grants | Whitehall brief: Man who fights personal war with Civil Service

## Book will make Labour frontbenchers blench

What are the circumstances that can radicalize a man and push him into a position of uncompromising outspoken dis-sent? Poverty, war, brutality at the hands of authority are common causes of such a transformarion. A period in the administrative class of the British Civil Service is not normally numbered among them.

But it was his four and a half years as an assistant principal in the Ministry of Housing and Local Government in the 1960s that fashioned Mr Brian Sedgemore, former Labour MP for Luton West, into White-hall's most hyperbolical and, probably, most deeply resented

In 1976, in an alternative first chapter to a Commons Expenditure Committee report on the Civil Service (which the committee rejected) he seared his former colleagues in language which spared them nothing.

He wrote: "There is, as should be, no rule in our society for people with little to offer in a practical way but the civil servants have got round this stumbling block by inventing a role for themselves. The role that they have invented for themselves is that of governing the country

He went on to claim there was a "Vichy mentality" in parts of the Foreign Office. The Home Office was "stuffed with reactionaries" and had been the "graveyard of free-

### Communists to play unusual role during ceremonies for the Pope's visit to France

From Charles Hargrove Paris, May 26

The Pope's handshake with M. George Marchais, the secre-may-general of the French Communist party, will be one of the more surprising features of his visit to France next weekend. So will be the presence of a Communist parliamentary delegarion at the solemn "Te Deum" in Notre Dame shortly after the Pope's arrival.

The meeting between the Pope and the Communist leader Pope and the Communist leader has not been officially confirmed. But it will most probably occur when the Pope goes to Saint-Denis, in the "red belt" of the capital, to celebrate a Mass "for French and foreign was "for French and foreign process." workers", in the basilica, once the necropolis of the French

The Communist Party newspaper L'Humanité, over two half columns on an inside page roday, gives the full programme of the papal visit, calling it "remarkable for its deep diversity and profound density".

It says that the Pope will be greeted at Saint-Denis on Friday evening by the bishop and the civil authorities of the town and the department, including the Communist mayor, the Communist deputy, and the Communist chairman of the departmental assembly.

M. Marchais is resorted to ave insisted on meeting the Pope on this occasion the request was apparently transmit-ted to the Bishop of Saint-Denis through the Communist deputy. and forwarded to Rome through the Nunciarure in Paris, where

it was approved. Readers of L'Humanité could also note that "at the invitation the French Bishops' conference, a Communist delega-

rion will attend a 'Te Deum' at the people of God" Notre Dame." The delegation Bourger eirport on will be led by M Maxime which will be celebrated will be led by M Maxime Gremetz, the member of the political bureau responsible for

relations between the party and Christians. Replying to the invitation, minist parliamentary party wrote that they were "very appreciate of it, in view of the exceptional character of the event of the coming to France

of Pope John Paul II".

There has been some rather ironical comment in the noncommunist press, however, ing that France is not the Italy of Don Camillo.

In response to it, the office of the Archibishop of Paris said on Saturday that the invitation had been sent out to all, without distinction or regard for heir political persuasions. The Communists are therefore invited on the same grounds as the other representatives of the people", a spokesman said. Similar invitations had been sent out on the occasion of the memorial services for Pope Paul VI and Pope John Paul I, and of the "Te deum", for the election of the present Pope. The Pope's visit is obviously

being used by the French Com-munist Party as a welcome opportunity for an overture to "progressive Christians". This is nothing new. What is, however, is the publication by L'Humaonité of a letter in the form of a quarter-page adver-risement, under the heading:
"French Episcopal Confer-ence", signed both by its presi-dent. Cardinal Erchegaray, Archibishop of Marseilles, and Cardinal Marty, Archbishop

### Timing of recommendations on deporting Community citizens

Secretary of State for Home Affairs

Ex Parte Mario Santillo Case no 131/79. Preliminary rul-ing under Article 177 of the EEC Treaty on a reference by the divi-sional court of the Queen's Bench

P. Warner.

Before the acting president, Judge A. O'Keeffe, and Judges A. Touffait, J. Mertens de Wilmars, P. Pescatore, Lord Mackengie Stuart, G. Bosco and T. Koopmans. Advocate-General: J.-

Judgment given on May 22, 1980. Judgment given on May 22, 1980.

Mr. Santillo is an Italian national who has been working in the United Kingdom since 1967.

He is married to an Italian national and has two children born in the United Kingdom. On 13 December, 1973 the Central Criminal Court convicted him of the contral and court convicted him of buggery and rape on a prostitute, and of indecent assault and assault occasioning actual bodily assault occasioning actual bounty harm on another prostitute. On 21 January, 1974, he was sen-tenced to a total of eight years' imprisonment for these four offences. When giving judgment the Central Criminal Court made a recommendation for deportation under the Immigration Act. under the Immigration Act. On 10 October. 1974, the Court of Appeal (Criminal Division) refused Mr Santillo leave to appeal against the prison sentence and the recommendation for deportation. On 28 September. 1978, the Secretary of State made a deportation order against him expelling him from the United Kingdom as soon as his sentence was completed. Having completed

his prison sentence on 3 April. 1979, after remission of one third of the sentence for good behav-iour. Mr Santillo was due to be released but remained in detention under the Immigration Act. On 10 April, 1979, the Divisional Court of the Queen's Bench Division of the High Court of Justice heard an application for judicial review to quash the deportation order on the grounds that such an order, made four-and-a-half years after the recommendation for deportation by the Central Criminal Court infringed Mr Santillo's individual rights, because it falled to comply with the provisions of article 9 (1) of Council Directive no 64/221/EEC.
According to Article 8 of the directive, the person concerned is to have "the same legal remedies . . . as are available to nationals in respect of Acts of the administration." The United Kingdom has not

introduced any specific legislation to implement the directive. The to implement the directive. The applicable law is the immigration Act 1971 under which a person described as "non-patrial" is subject in England to controls which include liability for such a person to be deported, eg. under Section 3(6): "... if ... he is convicted of an offence for which he is pumshable with imprison-ment and on his conviction is recommended for deportation by

26. — Italian it on strike in the jailing of man, a reporter, Newspaper II 10 wrote stories a former Red

onies set team Crucial talks this week it to Fraident of budget contributions

From Michael Hornsby Brussels, May 26
The wisdom of Mrs That-

cher's rejection of the reduc-tion in Britain's EEC budget contribution offered by other member-states in Luxembourg last month will be severely tested at a crucial series of negotiations here this week.

The Prime Minister took the view then that both the amount (£760m) and the duration (two years) of the reduction proposed were inadequate. She gambled that by holding out a little longer she would be able to prise a still better deal out of her Community partners.

Mrs Thatcher's confidence was based mainly on what she considers to be her trump card; Britain's ability to hold up implementation of the 5 per cent EEC farm price increase agreed upon by the other eight

Concessions on lamb, fish and energy are also among the cards still held by the Prime Minister and which she could choose to play, either singly or in combination, in return for a better budget settlement.
The Government's

first hurdle will be a meeting of EEC finance ministers tomor-row. Progress, or lack of it, there will determine whether the Italians, who currently hold the EEC presidency, think it worthwhile calling a special meeting of foreign ministers later in the week. EEC agriculture ministers

will be meeting in any case tomorrow and Wednesday to consider what to do if Britain continues to veto the farm price package and also to examine new French-inspired proposals

for supporting lamb production.

The finance ministers, for their part, will have before them revised calculations by the European Commission showing that Britain's net contribution to the budget would be likely to rise from £1,100m this year

to some £1,400m in 1981 if no corrective action is taken.

Failure to break the deadlock on the budget this week would be serious, as both President Giscard d'Estaing of France and Herr Helmut Schmidt, the West German Chancellor, have said they will not discuss the matter at the next EEC summit meeting in

Venice on June 12 and 13.

British officials, though outwardly unperturbed, are privately a good deal less confident about the prospects for agreement than they were earlier in the month. This pessimism is shared by Signor Emilio Colombo, the Italian Foreign Minister.

The German attitude is causing most concern. Herr Schmidt has let it be known that the cash offer he made to Mrs
Thatcher in Luxembourg,
allegedly twice as much as had
been approved by the German
Cabinet, is no longer on the table. Any new offer, it is said in Bonn, would be less gener-

Another complicating factor France's announcement that, if the British continue to veto a farm price increase, it will take national measures from June 1 (including a rebate of value-added tax) to ensure that French farmers get an equivalent financial benefit.

This could encourage others to take similar action, or lead to a new attempt by the other eight member-states to imple ment a farm price agreement without Britain by invoking the Community's majority voting

That, in turn, would add a new and much more dangerous dimension to the dispute by facing Mrs Thatcher with a choice between capitulation or resort to her ultimate weapon; the unilateral withholding of British contributions to EEC

Keeping out of blast, page 14

### Football tribunal in Italy hands out more sentences

Rome, May 26 .- The Italian Football Federation today banned the president of the first division club Bologna for one year and two international members of the team for threeand e-half years.

But Juventus (Turin) and Lazio (Rome) football clubs and all their players were cleared of any involvement in rigging the results of three matches earlier this year.

Signor Ton maso Fabbretti, the Bologon president, was dis-qualified from controlling the club for failing to inform the league that his players had been offered bribes by illegal book-

Giuseppe Savoldi, aged 33, and Carlo Petrini, aged 32, Bologna players, who have both played in Italy's national side, were banned for illegal dealings and for failing to inform the

league. Bologna was penalized five ment, Ita points from its total next Belgium season, a sentence which seems and AP.

league championship or Euro-pean football in 1981. The club was said to have rigged a game with Avellino in February.

Today's penalties were less severe than those imposed a week ago in a first batch of judgments, when AC Milan, who won the 1979 champion ship, was relegated to the second division for the first time in their history and two

players were banned for life.

### Pravda says Chinese are undermining communism

From Michael Binyon Moscow, May 26

The Russians today accused China of trying to undermine the world communist movement, using Maoist groups to infiltrate the revolutionary movement and turn it against the Soviet Union.

The charges were published in Pravda, in an arricle representing the views of the top Soviet leadership. The newspaper said Peking had recently increased attempts to split Marxist-Lendist parties, and was now using "rotten and insidious" tactics to instill its ideas and policies.

Pravda predicted the attempt would fail, but added, "Revoutionaries of the world should be on their guard against the subversive and provocative activities of Peking, whose strategic objectives are in basic contradiction to the interests of the revolutionary move-

Commenting on the recent visit to the United States by a Chinese military delegation, Pravda said this was another important step in coordinating aggressive schemes against the socialist community, the national liberation movement and all peace-loving forces.

Though not a formal military alliance, such a rapprochement between China and imperialism was "very dangerous" in the present international situation.

The newspaper repeated standard Soviet charges that the Chinese were trying to draw the West into an anti-Soviet alliance and set the Russians and Americans against each other. Peking wanted the West to help to build up China's military strength while shouldering the burnen of the confrontation with the Soviet Union.

"The Chinese leaders' talk about peace and the nestpone-ment of war is nothing more than a propaganda trick. Chinese strategy remains the same as under Mao Tse-tung. The prime aim is to win tor China a position of hegemony so it can dictate its will to other peoples and countries."

The tough denunciation is one of the strongest distribes against Peking since the breakdown of the Sino-Soviet talks last year. It comes immediately after the Chinese rocket tests which Tass today described as a show of force to impress the Japanesa on the eve of Chairman Hua Guofeng's visit to Tokyo.

Today's tough call for vigi ance is clearly intended as warning to those communists. such as the Italians, who are seeking better relations with China.

# Telecom **CUSTOMER**

A bulletin from British Telecommunications: part of the Post Office.

With 27 million telephones. 90,000 telex lines and 70,000 computer data-links. Britain's telecommunica-tions system is already one of the largest in the world. But during the next ten years, it's going to get a lot bigger. By 50% in fact

Last year we provided no less than 2 million new telephone lines to our .. customers, but even that couldn't keep pace with the demand. Furthermore, the introduction of the new Prestel viewdata service. which will bring useful information right to your TV screen, shows how technology can help people in new ways.

Add to all this the continuing expense of maintaining such a vast system, and the cost of replacing equipment which has reached the end of its working life, and you have a capital investment bill of huge proportions.

#### The cost of increased efficiency

To meet these needs we have planned a massive action programme which calls for an expenditure of £1,500 million every year for the next five years; that is to say, over £4 million a day, every day until 1985. We shall keep the pressure up for at least another five years after that.

We will be installing 174 new electronic exchanges, including the first of our revolutionary System X exchanges and small digital exchanges, by the end of this year. So far during 1980, we have already brought 56 new electronic exchanges into service. In the last 6 weeks new exchanges have been brought into service in-Ashcott. Broadwinsor, Culloden. Doncaster, Dungiven, Harrow, Manchester, Mere, Pattishall, Penmaenmawr, St Ives, Uley and Witheridge.

7,800 additional engineers have been recruited and trained, to speed up the installation of new phones and clear faults quickly.

#### Planning to be the best

The detailed planning involved in a 10 year programme of this magnitude would fill a small library, but its aim is simple. By the end of it we expect to see a tele- ? communications system not only considerably larger but as efficient as all the resources of modern technology can make it. As Peter Benton, our Managing Director, has said: "We intend to have only one quality of service for all our customers-first class?

#### PRODUCT FORUM The Compact Cross teams were queueing up in Bangkok", he added. Many delegates underlined the need for more supplies to be permitted into Kampuchea Telephone

Smaller and neater than a standard phone and ideal for narrow shelves or ledges because the belt unit is separate and can be fitted to a skirting board or supplied as a matching shelf. This lightweight instrument is available in light grey, bright blue or mid-brown (cord and bell unit in grey only). As a replacement for an existing telephone the Compact carries only 70p additional quarterly rental. plus a £5 connection charge (excluding VAT).

about the Compact phone, please dial 100 and ask the operator for Freefone 888. For information about any other aspect of British Telecommunications services, Please telephone 01-631 2132.

# Rigidly ideological approach wrecks Soviet strategy in Africa

articles based on exclusive interviews with The Times, Ilya Dzhirkvelov, a former KGB officer and Tass correspondent who defected to Britain last month, outlines whot he sees as the failure of Soviet strategy

m Airica. Soviet strategy in Africa has failed, largely due to Moscow's inability to comprehend African conditions and the African cast of mind, says Mr Dzhirkvelov, who was Tass correspondent in Zanzibar from 1967 to 1970, and

then for two years in Sudan.
In the 1960s and 1970s Soviet strategy, according to Mr Drhirkvelov, was to take advan-tage of anti-colonial sentiment in Africa and gain political in-fluence over African countries by tying them to the Soviet Union economically.

Zanzibar was regarded as the "gateway to Africa" because of the openly pro-communist regime which rook power then after the Zanzibar revolution of 1954. Under its President. Abaid Karume, Zanzibar was hostile to the West, while rereiving vast amounts of aid from the Soviet Union, East Germany and China.

It was partly to moderate this Marxist radicalism on his doorstep that President Nyercre
in neighbouring Tanganyika
proposed the united state of
Tanzania. But Zanzibar continued to pursue pro-communist policies semi-independently.
President Karume told Mr Dzhirkvelov when he arrived

that Zanzibar was to be an "island of freedom", on an analogy with Cuba in the Carib-

Christian

In the third in a series of advisers in Zanzibar rose during been that the fish would have African politics. In 1970, for Mr Dzhirkvelov's rime from under 300 when he first arrived to well over 400 by the rime

Mr Dzhirkvelov soon became aware, he told The Times, that Soviet control over Zanzibar was not increasing in proportion to

the economic contribution. This was partly because the Zanzibar leaders capitalized on the Sino-Soviet split by playing the Chinese off against the Russians. Of the two models of communism on offer, says Mr Dzhirkvelov, President Karume preferred the Chinese, on the ground that Chinese technicians

and workers were happy to live in hostels and receive low pay.

The Russians began to "lose their position". Soviet difficulties, Mr Dzhirkvelov discloses, were compounded by errors in economic planning. As an example he cites what he now thinks of as The Great Tuna Fish Dis-The Russians advised Presi-

dent Karume to diversify the Zanzibar economy, which de-pends on the export of cloves. Since Zanzihar is an island, the Soviet advisers proposed the construction of a tuna processing plant. It became known, however, that the fishing vessels supplied by the Russians were slower than the tuna fish, and the necessary equipment would have to be bought from Japan, since Russia did not pro-

duce it.
The cost of building the new port complex was in any case prohibitive. Existing port facili-ties were being used for loading "The only result", says birkvelov, "would have spices. "The only Mr Dahirkvelov,

ended up smelling of cloves and the cloves smelling of fish". He has other examples of what he calls "economic adven-

turism " by the Russians in East In 1969 he learnt from the Soviet ambassador in Mogadi-

shu that the Russians were building a huge dairy complex in Somalia because there were cows feeding near the proposed site. The dairy was completed, at considerable cost, but by then there were no cows left to be milked, since Somali farmers are nomadic and the herds had moved elsewhere.

But the principal Soviet mistake in Africa, says Mr Dzhirkvelov, is serious The Russians, he argues, have very little understanding of African agrarian and tribal societies, and assume that socialism on the Soviet model is suitable and inevitable.

In Tanzania the Russians were encouraged by President Nyerere's espousal of a socialist philosophy, but failed to grasp that he was an "educated man in the Western mould", and his socialism was unique to Tanz-Mr Dzhirkyelov denies that

miscalculations of this kind arise from a condescending or even racialist attitude on the part of Soviet officials in part of Soviet officials in Africa, although such attitudes undoubtedly exist, he says, within the Soviet Union, But in Africa, he believes Soviet blunders are attributable rather to the rigidly ideological Soviet

approach.

example, a number of Tanzanes Salaam, charged with having conspired to overthrow the Government.

The accused included ubsentia) Oscar Kambona, the former Foreign Minister. There was speculation, unconfirmed at the time, that the Soviet Union had supported some of the alleged conspirators. Mr Dzhirkvelov has told The Times that there was indeed a "Moscow connexion", and that Soviet officials in Dar es Salaam were "extremely wor-ried" that this might emerge

though not Mr Kambona-had "close ties" with the Russians. Mr Dzhirkvelov attended almost all of the trial, with instructions to report to the Soviet Embassy any mention of Russia. Fearing exposure, a number of KGB agents in the embassy left Tanzania before the trial ended, indirect proof of Soviet involvement, to which the Tanzanian authorities

at the trial. Some of the accused, says Mr Dzhirkvelov-

turned a blind eye. As for the Sudan, Mr Dzhirk-velov recalls an even greater miscalculation, when the Rus-sians supported, and perhaps even inspired, a communist coup against President Nimeri in July 1971 Mr. Publichadon coup against President Nimeri in July 1971. Mr Dzhirkvelov, who was in Khartum throughout this period, foresaw that if there were such a coup it would undoubtedly be crushed, and the Sudanese Communist Party would be destroyed.

He made this plain, he claims. The Kremlin, he says, often both in dispatches for Tass, backs the wrong horse in which were passed on to the

Kuznetsov, a member of the Soviet leadership who visited Sudan in March. But the Soviet authorities, including the embassy in Khartum, believed that a communist coup would suc-

It took place in July, under Major Hashim al-Ara, and was put down within three days. President Nimeri was returned to power on a wave of popu-

Jarity.
Relations between Khartum and Moscow, which until 1971 had been warm, sunk to a low ebb, from which they have never recovered. The Soviet ambassador was asked to leave, with many of his staff. Mr Dzhirkvelov stayed on as Tass correspondent for another year, with the difficult task of presenting what had happened for Soviet readers as a "victory for progressive forces".

Looking at Africa as a whole, Mr Dzhirkvelov sees a catalogue of setbacks for the Soviet Union, in contrast to the high hopes of the 1960s. The peaceful settlement of the Rhodesian issue was, he says, a disaster for Moscow, which had com-pletely failed to foresee the election of Mr Robert Mugabe as Prime Minister, and had once

again backed the wrong horse in Mr Joshua Nkomo.
Somalia and Zanzibar, Mr Dzhirkvelov points out, have both expelled their Soviet advisers. Egypt, which expelled the programme of the programme all Soviet personnel in 1972, was regarded by Moscow as a safe Soviet domain to the last moment. Six months before President Sadat's expulsion order, a member of the Polit-

KGB, and in person to Mr V. V. buro. Mr Beris Ponomarev, visited Cairo, and was impressed by what he construed as the Egyptians' appetite for Marxism Leninism, despite warnings from Soviet officials in Cairo that the Sadat Government was going in an unmistakably pro-Western direction.

The Soviet Union, says Mr Dzhirkvelov, has spent millions of roubles in Africa, with very little result. Mr Kwame Nkrumah in Ghana, President Kenneth Kuanda in Zambia and Dr Milton Obote in Uganda were all at various times the object of misplaced Soviet

Ghana was once the main KGB base in Africa, but no more, while Zambia "does not want and never did want" Soviet help. As for Uganda, Moscow even made what Mr Dzhirkwelov." considers the "appalling error' of backing Dr Obote's successor Idi Amia, supplying him with the arms and equipment to maintain a reign of terror.

The Soviet military interven-tion in Angola and Ethiopia and the use of Cuban troops Mr Dzhirkvelov sees as a gambler's throw to turn the tide.

In Africa, and in the Third World as a whole, Mr Dzhirkvelor believes, the Soviet Union is at a disadvantage in competition with China and the West, and will remain so as long as it is blinkered by an inflexible ideology and the dictates of self-

continues as Camp

David deadline pas

From Christopher Walker Jerusalem, May 26

The original deadline set at

Camp David for reaching agree-

ment on the negotiations on

Palestinian autonomy passed inauspiciously today with the

deadlocked talks in a state of

indefinite suspension and no

new proposals emerging from Israel, Egypt or America about ways of salvaging them.

With the Israeli Cabinet now

minus Mr Ezer Weizman, its

leading and most influential

moderate, there was no indica-

tion in Jerusalem of any will-

ingness to compromise, now or

in the foreseeable future, on

the main issues which have

stalled the talks.

The main stumbling blocks

remain exactly as they were when talks first began 12 months ago: Israeli refusal to

allow the Palestinians anything more than administrative

powers; the expansion of

lewish settlements on occupied

land; control of security; the

refusal of Israel to allow dis-cussion about the status of the annexed Arab sector of East

Jerusalem; and the projected allocation of scarce water

In the West Bank and Gaza strip, the occupied areas inhabited by 1,100,000 Palestinians

whose future is being con-

sidered, the atmosphere re-mained dangerously tense after the upsurge of violence. Thousands of heavily-armed

Israeli troops were under orders

### Policy switch in Mozambique 1 combat queueing psychology From Nicholas Ashford

Maputo, May 26

been sold out.

Queueing has become a way of life in Mozambique. At any time of day or night, long queues, consisting mainly of women waiting to buy hasic supplies, can be seen on almost any street corner of Maputo.
People often have to wait hours to huy bread or soap. Sometimes they wait hours only to find that the goods have

According to one Mozambican official, people have started to develop what he described as a "queue psychology". They have become so accustomed to queveing that they will join a queue although they do not meed what is on sale.

When a batch of toothbrushes

came on to the market recently, people waited hours to them and the stocks dis appeared within a day. Mozambican officials give number of explanations for the

queues. One is that the retail. system was thrown into chaos by the exodus of the Portuguese immediately after inde-pendence. Virtually all local shops known as continus, were owned by Portuguese families and when they left there were hardly any experienced people to take them over. The Gov-erament established a system of people's shaps" but these have proved insufficient.

The departure of the Portuguese, combined with attacks by Rhadesian forces, also seriously discopted agricultural production and fond distribution. Many parts of the country still produce large quantities of food but there is often no transport to get it to market. When it does reach the cities sometimes rots in warehouses because of mismanagetion system.

Another factor has been the huge influx of people into the cities, particularly Maputo. The capital's population is believed to have more than doubled from 500,000 to 1,200,000 in the five years since independence. Many of those who have moved to the city used to run smallholdings which have been abandoned.

President Samora Machel's Government has launched a campaign to solve the distribution problem and to end queue-ing. It is part of the President's offensive, revealed in a policy statement on March 18, to combat inefficiency and corruption and to streamline the bureaucratic system which, in the past five years, has taken control of almost everything from funeral

parlours to barber shops.

One of the measures being introduced is the reallocation of "people's shops" and other small state-run businesses to private enterprises. Mr Mario Jorge Aranda da

Silva, the recently-appointed Minister of Internal Commerce, has called for applications from people interested in taking over such businesses. At the same time, the Govern-

ment has announced that it is to stort rationing of basic commodities and it is planning to move people from Maputo back to the countryside, using coer-cion if necessary. "If we don't act now this city will become like Lagos", a Mozembican

official remarked. The food queues are the most visible sign of the bureaucratic cottanglement that Mozambiouc has failen into, but almost every aspect of life is affected by bureaucracy.

When Chamisse ing about bureauc ling, the "author" criticized. However Machel's March snowed that he w courage just such a The people wer voice their criticism that were clearly n

### UN's ironic task of keeping peace with terrorists on its territory

Kawkaba, S Lebanon, May 26 If you had not already caught sight of the Norwegian United Nations flash on his uniform, you might be forgiven for thinking that Major Michaelsen was a British Army officer. He has the tall, lean build of a Sandhurst graduate, reads James Joyce in his spare time and, when he speaks English, he drops his R's so that he sounds remarkably like the late

iscount Montgomery. Major Michaelsen, who has indeed undergone training with British soldiers, likes to show his company area to visitors from the vantage point of a small hilltop surmounted by a United Nations flag. He points out the salient features with an Army baton and refers to his domain as his "fiefdom". It does not stretch very far-from the Israeli Army positions east of Kafr Chouba to the Lebanese Army checkpoint at Kaw-kaba on the Hasbaya river north of Ebel el-Sagi-but there are

north. No one knows exactly how many, although Major Michael-sen believes there are ar least two battalions of guerrillas from the Palestine Liberation Organization and Lebanese leftist forces beyond the road block at Kawkaba. The Palestinian front line, if such a such as the control of the c concept can exist in guerrilla

a. lot of Palestinians to the

What particularly interests Major Michaelsen, however, is the nest" and he points his baton towards a low wadi almost obscured from view in the side of a hill to the east. Just over there", he says. "there are between ren and 12 PLO men. They live in tents and they have their guns. They are not permitted to increase their numbers and when we go or 'the nest', we only see ten or 12 of them. But of course we are not permitted to look inside their tents and count

It seems an extraordinary restriction on United Nations troops. In the areas of United Nations territory where the PLO have secured the right to keep their men-because they refused to move when United Nations first arrived in Lebanon—the soldiers of the ten-nation peacekeeping force are curbed by rules that would make a London police sergeant

pale with frustration.

Just to the north of "the nest", for instance, runs the river Hashaya. It is a beautiful stream, carrying the snows down from Mount Hermon, but

lumps of concrete and six Israel in the past few months. scruffy gunmen just up the all of which the Norwegians road from the United Nations have prevented.

The United Nations soldiers can challenge the Palestinians at rifle point although only at the last moment are they permitted to open fire at the guerrillas, and even then shots must be directed at their feet. The Norwegians have killed one Palestinian. "His widow". Major Michaelsen says bleakly, "lives just over there". And he points to a village on the side of a mountain, ignores us now." Normally, the PLO submit to

capture because there is no question of imprisonment. The Norwegians can question their prisoners for a few hours, but must then release them. Even more astonishing, the Norwegians must then formally hand back to the PLO all the rifles taken from the guerrillas. Only a few days ago, a Pales-tinian boy aged 13 began Nations troops would not return his weapon to him within an hour of his capture.

As the Norwegians will admit. it is a strange war and one that the Palestinians can rarely

Major Michaelsen fails to add what several Norwegian officers have been convinced of for some time: that a number of those students training with

### it is shallow enough to ford. So most nights, the Norwegians find Palestinian guerrillas trying to cross the river southwards. There have been 90 attempted infiltrations towards the PLO are Iranians.

By Gabriel Ronav A section of Poland's youth is recalling with passionate interest the events during the last war that turned Britain's erstwhile ally against Hitler into a Soviet satellite.

After the recent dramatic self-immolation of a young Pole in Cracow to draw the world's attention to the Soviet massacre of Polish officers at Katyn in 1944, young writers are paying tribute to the commanders of the London-led Home Army who were arrested and shot by the Soviet Army after the country's

The samizdat journal Spot-kania of Lublin, which describes itself as "an independent pubsmalled in successive issues. Army against the retreating journal, he was immediately

manders who, after their five-year fight against the Nazi occupiers, were liquidated by the liberating Russians, who were determined to install a communist government. They included General Halka, General Bitner, Lieutenant-Colonel Major Miller and

In the latest issue to reach Loudon, the journal's "They Lived Among Us" column is devoted to the memory of General (actually Colonel) Kazimiers Tumidajski, the Lublin district commander of the Home Army. The journal recounts the fight aged by Colonel Tumidajski's

forces alougside the Soviet

1944. From July 22 to July 24 fighting went on in the district of Lublin. Our underground units fought alongside the Red Army. After the taking of Lublin, the local Home Army leaders of the district and the Delegate of the (London-based) Government came out into the "As long as fighting was going on the attitude of the Soviet forces towards our offi-

cers was correct and loyal. It deteriorated visibly as soon as the front moved westward." ski was invited—together with other Home Army officers—to have talks with the Soviet Army Command. According to the

Soviet Union. He died in a Soviet camp in 1947 after a hunger strike called by Polish officers and soldiers in protest at their illezal imprisonment. This crucial phase of Poland's history is not covered by the official Communist history books, but the facts are confirmed by official documents

on wartime Polish-Soviet relations published by the General Sikorski Historical Institute In conclusion, the authors say Poland has rightly been protesting against the statute of limitation on Nazi crimes. Yet nothing has been done, they add; againg those who committed similar crimes against Polish officers and soldiers after the liberation.

Ro

Street trying to find

me round to his warehouse.

them up to Luton, where we'd

found this old store and reuted

Next day some fellow offered me £50 for the hangers the dresses were on. Done, said I."

Ah, fashion, what a compul-

sive business and what a hard one you see. They pasted over the windows, leaving just a pecchole (shades of Gordon Selfridge) and they sold those

dresses at 7/6d a go. The queue stretched around the block. The

girls serving wore bus conduc-tresses' leather pouches and only had a half crown or a ten

bob note to tender for change.

Then it was into the big time with one shop, called samply

dusted floors, stock in depth

and not in great variety (put

your merchandise where your conviction lies) and it had

maker-to-customer prices. How

"It's the distribution costs," says Maurice Bennett. He is not talking about lorries truck-

on a week-by-week basis.

for years Bennett Cameras-I like the idea of David Bailey, So then I walk up and down Great Portland with Mum's deposit securing his first Asahi Pentax, rushing down the street with the prize unwrapped above his head, something to put in the shop to sell. And they all say expletive deleted, we don't want to know. Then I find this old guy and he seems to like me and he sends only to be arrested for shop-lifting. . . Then Beamerts was bought by Dixons and Bennett Bros turned to what I was just about to call the rag trade, But "You wouldn't believe it. There must have been 4.000 he bates this term, and so do I. What is raggy about it, why should we so diminish such an important and profitable indusdresses in there, dating back for vers, lots of them caked in dust. He just couldn't bear to part with them. I took the whole lot for \$200. Shipped

It has always been said that a successful fashion business needs three in the family; one does the books (Michael) one does the marketing (Maurice) and one provides the flair. The flair is Jeff Banks, idol of the Sixties with Clobber, victim of the Seventies with curback, essential to the Eighties for his experience, intellectual yet popular approach to clothes and his design skill. "Retaiking now means recognizable value", the distinguished American design-er Halston told me in London last week. "Recognizable value is the key, at whatever price

point ". That is what Warehouse. which now has ten stores, is all about. Recognizable value. And a recognizable handwriting.
"We never push sales because
we just don't want returns. We many women readise that a dress which retails at £22 has in fact cost £5 to produce?

> Is this why everyone in the office seems to dress at Ware-

ing the spring line to Man-chester. He is talking about the number of people between you and me and the manufacturer. publicar On the same subject but a different tack, there are certain publications which become bibles to those involved in the Which is why Mr Bennett bibles to those involved in the with his brother Michael started Warehouse. They had been report. Such is Elle, the French

selection of shoes

and handbags.

month to put together. The pic-tures are superb, commissioned from the highest echelon of the visual world; the contents are provocative: "Seducteurs maigré eux; les hommes connus". "Etes-rous snob? 20 façons de le savoir" announced

the cover of one issue. The world of women, libera-ted (the French of course have always admired and supported intelligent women from Madame de Pompadour to Simone Weil via Simone de Beauvoir); chic, determined but remaining above all female.

But one of the great strengths of Elle has been its promotion of popular priced fashion. This is not as easy as it seems since France is an enormous area with a mostly chaotic retail system. The great stones however have opted for the shop-instop principle and so at Gal-leries Languette, Au Printemps, etc., you will find the best names in French ready to wear,

made for the magazine, under stringent control of design and quality, and merchandized direct to the readers in pre-

"Manufacturers bave

their nerve; they don't know what they want. Buyers have lost their nerve. They don't know what they want. But the public hasn't lost its nerve. They know what they want."

Thus Maurice Benner, thus Madame Victor, thus your fashion editor. "What are you doing showing a skirt for a 12-year-old child that costs 550?" demanded Madame of her chief fashion editor. "It's

ridiculous." I put in this illustration of her force and sense because I am still receiving your delight-ful and sympathetic letters on the subject of the teenage traipse. What indeed, unless the design incorporates some technical breakthrough, or the workmanship demands hours of original highly skilled hand

labour ? I was prompted to show Madame Victor our own efforts at Bon Magique, the pure wool crepe dress whose latest outing Elle likes value for its readers; so do I. It does a series called Bon Magique which are clothes especially of the guests. I humbly pointed out that, on the principle of try it on the dog, I was wearing

> "And what will you be wearing for Ascot?" inquired another. Was I actually going to Ascot, I thought? Yes, I was. And of course what I am going to wear is my latest piece of the state of the delicious little camine. magic, the delicious little camisole dress and jacket. Svelte and flattering, infinitely adjustable to any figure or height, suggesting a pretty bareness though you never have to take off the jacket unless you want to, that is what I am going to wear on Gold Cup day. If the weather is lovely I shall tan, if it is overcast I shall look neatly tailored.

By the way, I think some women are nervous about the camisole dress because they are unsure what to wear underneath. Now we are not all into

neath. Now we are not all into bra-less age so that I fully understand their problem.

But do take a chance. That dark print enlivened by sprightly flowers is very discounter that the contract of the contra creet, that is you can't see through it to the lack of underpinnings. The top is very gently bloused and with the elasticised waist can be pulled up or down to give more or less fullness

over the bosom.

If you do lose your nerve, the best surpless bra I have seen is a sort of golden transseen is a sort of golden trans-parent numero by Gossard, Model 0071—James Bond must approve—underwired, virtually invisible and not liable to des-cend to your waist in the middle of dinner nor give you a prow like something off Clydebank. Recognizable value. That's

## Colour and consistency in Leeds tradition

Leeds' Paintings Victoria Art Gallery, Bath

The Artist's Eye National Gallery

Nigel Hall Warwick Gallery

William Scott Gimpel Fils

John Aldridge New Grafton Gallery

Fred Williams Fischer Fine Art

Zoran Music

12 Duke Street Gallery

Exhibitions, or collections for that matter, do not just come out of nowhere, just somebow happen of their own accord. There is bound to be some sort of directing, selecting intelli-gence behind them. But usually we are not conscious of it, unless there is a rumpus like that last year over the Tate's acquisition policies or a show is devised somehow to highlight the taste of a collector, like Margaret Gardiner's for the Pier Gallery in Orkney. And even when we can feel this sort of coherence, it is not always so easy to pinpoint it.

Why, for example, is the Arts Council show of twentieth-century British paintings from Leeds City Art Gallery, which begins its tour at the Bath Festival, so extraordinarily consistent? It might well be the taste of whoever put together this particular group. But even at home in Leeds the same ob-servation applies. From the in-cumbency of Frank Rutter as curator (1912-1917) a clear tra-dition seems to bave been established of purchesing (and encouraging gifts and legacies) along solid Post-Impressionist principles. The foundation is a group of Camden Town artists— several excellent Sickerts, a pair each of fine Gores and Gilmans —and from there the collection builds steadily and reliably, staying just that little bit in advance of general cultivated taste but never going too far

tently striking in the show is the preoccupation with colour.
Everywhere you look, the
colours are bright or rich:
there is nothing that could be
called drab. The strong conventionalised Nevinson of Searchlights (1915), deploys its range of night time blues to stunning effect, especially for a painter not as a rule particularly valued as a colourist. The wonderful Sutherland of 1944, Tin Mine. Emerging Miner, seems at a glance to be almost monochrome, but the more you look at it, the more the smouldering pinks and rich smoky greys vibrate. And the paintings by those justly famed as colourists—Matthew Smith, Ivon Hitchens, Frances Hodgkins fully live up to their reputa-Gallery has acquired wisely, particularly in that period of British art, the late 1950s and

early 1960s, which is just again coming to look good: you would

be hard put to it anywhere to find better Terry Frosts, Wil-liam Scotts, Peter Lanyons or

Alan Davies than here. If Leeds represents a sort of institutional taste based on a strong and well-established tradition, then my opinion of such institutions and their pos-sibilities goes up several notches. Of course Leeds, like any gallery of stature, has in towards the avant garde—there some ways to be representative. tor Considerant, ascribed to is for example, a discreetly The responsibilities of a Delacroix, and get us to look Vorticist Wyndham Lewis portrait of 1920, but it did not enter the collection until 1945, portance, and there is no room an important picture and what

though the William Roberts, for the quirky and the wayward, the Dance Club, was given in the Twenties.

One thing which is consistently striking in the show is lery is aware of this drawback, and has taken steps to counter-act it in a series of annual shows under the general title The Artist's Eye, in which an artist of our own day is given carte blanche to select and arrange from the collection at large according to his own tastes and interests. This year it is the turn of R. B. Kitaj, and the result is perhaps the most satisfying yet.

What the show does, first of all, is to cut across the usual historical and national divisions. Pictures from all eras are boldly juxtaposed, acknow-ledged masterpieces next to dubious attributions from the reserve collection, and the show becomes in itself a work of art, a college on a grand scale mirroring very clearly the crea-tive personality of Kitaj him-self. It makes one realize yet again how much we lose by hard-and-fast divisions. Who would have thought, for instance, how well a Degas Beach Scene would work flanked by two Duccio panels, or what would happen to our percep-tions when two paintings of similar size and format, the early Degas Young Spartans and the late Cézanne Bathers, are put on the same wall, one above the other. And perhaps only Kitaj would pick out Victor Considerant, ascribed to Delacroix, and get us to look

is not. Indeed the whole room prelude to looking around the whole gallery again with new

In the days when he was run-ning the Whitechapel Art Gal-lery, Bryan Robertson did more than any other single person to shape the taste of and edu-cate a generation. One might not always agree with his esti-mations, but at least when he selected an artist for showing the choice was always worthy of serious examination, and fre-quently when he was going most obviously against the current of fashion, time has proved him most conclusively correct. It is good to see him organizing an exhibition again, and the cata-logue of the show concerned, that devoted to Nigel Hall at the newish Warwick Gallery, brings a slight stab of nostalgic brings a slight stab of nostalgic recognition, evoking from afar the square format and typn-graphical layout of the old Whitechapel catalogues. The gallery, an admirably non-commercial enterprise, is in a generously proportioned suite of Victorian studio rooms in what used to be Hatherled's Art what used to be Hatherley's Art School at 33 Warwick Square: the artist, a sculptor and draughtsman, shows to advantage against the clean white walls and his slightly disorienting spacial constructions seem amazingly at home in the slightly disoriencing irregular spaces of the gallery. The work shown covers 15 years of un-predictable development, from cure to stark and whimsical to technological. Perhaps in years to come we shall see in it the

son sees already.

Elsewhere, a mixed batch of one-man shows keep us on a stylistic switchback. William Scott at Gimpel Fils is still preoccupied with those pans and skillers and jugs, but in the re-cent work the textures of paint are getting choppier again and the colours, particularly a recurrent near-royal blue, more violent. Though the subject-matter remains restful and intimist, the painter's attitude towards it seems to witness a new turbulence. John Aldridge, an RA whose seventy-fifth birthday is being celebrated at the New Grafton Gallery with a retro-spective, has also been remarkably consistent through the years—consistent to his rustic subject-matter and to his crisp, quiet style, somewhere in the same region as John Nash and Edward Bawden. It is astonishing to look at two little paintings hang-ing together. The River Pant and Markswood Farm, and realize that they are separated by more than 40 years. Some by more than 40 years. Some of the very early paintings, with a touch of the sophisticated-naive be later eliminated, are very engaging; throughout his career, though, he has proved adept (literally as well as metaphorically, it would appear) at cultivating his own garden.

garden.

More exotic are Fred Williams and Zoran Music. Fred Williams, a middle-generation Australian now in his fifties, excitingly captures the oddity of the Australian landscape in large canvases which keep us guessing as to whether they are, as it were, extreme long-shots or extreme close-ups. Mostly the former, I would imagine: some times he gives us clues with titles like Riverbed—sh yes, so titles like Riverbed—zh yes, so that meandering line down the middle of the picture must be a bird's-eye view, if not a god's-eye view. In others he teases, by calling them just Landscape, or Australian Landscape. Are the coloured dots and squiggles people scattered on the sand, seen from on high? Or sparse vegetation? Or could it be a microscopic view of something microscopic view of something minute? Not that it mattershe clearly knows exactly what he is up to, and that does create confidence. Zoran Music is, even at his largest, a miniaturist. The works date from 1946 to 1980, and all exploit the same carefully limited palette of pale colours, the same small repertoire of motifs. Most fetching of all are the latest series of Landscapes, with Rocks, spectral watercolour which play on tiny changes of light and colour and time of day. It would be tempting to own any of them, but how on earth would you choose, any more than you could prefer any given second of a day to all the

John Russell Taylor

### London debuts

last really should ward, her diction ill-defined. Pamela Moody, which received come first, for the week's fial debut was easily the most entertaining. A trio called the Clarinet Liederbook offered "An Extravaganza for Queen Victoria's Birthday", and although their performances were uneven the main point was their unusual repertoire. A Stocking Cantata by one Mr Stokes was a piece of early Victorian sauciness that would not have greatly amused Her Majesty, but she would have doted on Gruss on der Ferne by the Prince Consort, a comsub-Mendelssohnian petent

Mendelssohn himself was represented by a clarinet sonata movement deftly played by Martin Brown and Daniel Saunders, as was Ardian Cruft's gently melancolic Impromptu. Spohr's Deutsche Lieder, Op 103, were a different matter. and among the best music I have heard from this composer. Mr Brown was more tentative in the virtuoso clarinet part, and Marie Angel's soprano voice rather tremulous, the pro-duction not sufficiently for-

much consequence. Schubert's
pleasantly melodious self.

Violet Chang was a soprano
duced isolated good notes in
some of Havdu's English sones Der Hirt auf dem Felsen.
Elizabeth Turnbull's juxtaposition of Brahm's Sonata,
Op 120 No 2, with Hindemith's

Op 11 No 4 interestingly illustrated different stages of the same tradition. The Hindemith is a powerful, highly serious piece that received a suitably downright performance from both Miss Turnbull and her pianist, Raymond Lewis. She produces a good, singing tone on the viola, not greatly varied, yet attractive; the chief im-pression left by her playing is of well practised fluency. Much as I prefer the work in its clarinet version, the Brahms impressive, sounded though more could have been made of the music's lyrical elements. An Impromptu by

with little room for personality in the woodwind solos. The vir-

tues of that approach showed

themselves particularly in the

finale, where Mr Giulini got rid

quartets. The first of the visit- ment, for all their forthright-

ing quartets was the Melos from ness and brilliance in its

its first hearing, was serial in language, simple in outline, acidly strenuous, and not of much consequence. Schubert's

Violer Chang was a soprano hard to summarize. She pro-duced isolated good notes in some of Haydu's English songs, but her tone was too spread, the effect breathless. A Wolf group was a little better, "Mignon" showing Miss Chang's pleasing lower register, but the voice production was so inconsistent. Some of the smaller items, such as "Alle Gingen, Herz zu Ruh", were nicely characterized, yet the basic sound remained unsatisfactory, the diction being odd, with many of the words as it were swallowed.

Little help was given by her accompanist, Graham Johnson, who was usually too loud, but the first song in Miss Chang's Strauss group, "Die Zeitlose", was steadier than hitherto.

Max Harrison

disciplined playing and a strong beat keeping the music always decisively on the move, Strain, indeed, was bardly relaxed for a moment through-out the performance, which made the symphony seem unusually compact. There was a prolonged knife-edge calm just before the great crack that swrted the first movement's main development, and even the limping waltz, which so well displayed the grace and transpurency of the strings had its lucency of the strings, had its underlying unrest. But still more remarkable was the achievement of the third move-The Pathétique, of course, demands more flexibility, but ment's ending where Mr Giulini clipped the notes of the formance demonstrated, a cor-responding degree of romantic march in a way that not only eliminated vulgarity but made the celebratory tone almost unindulgence. Mr Giulini very skilfully made his expressive points all the more urgently bearably ironic.

It was distressing that a sprinkling in the audience, having paid £15 for their seats, should have found that a fit moment for applause. The real finale, done sombrely with all passion spent, was no whit going bonhomie in this perform ordinary slow crescendos as assailed.

repertory; not many groups can handle it to anyone's comfort. There could be no starker contrast to the intimacies of The Melos dig firmly in, produce a wonderfully sonorous noise at its big climaxes, and cerve its drama well. They serve its drama well. manage renderness too, for extautly, perhaps rather earn- ample at that beautiful and rare moment of relaxation by the end of the first movement's exposition, and in the winding lines of the Romanze. Beethoven's Op 135 found

them taking their time, balanc-Schmidt. ing the textures mericulously, observing the detailed dynamics and making powerful sense of them. There was nothing amiss about their intensity in the Lento, though the music can be made to yield something stoic and more poetic; and if the finale's playfulness was a game in dead earnest at least the irony of the last page was

### Last night's television

Nancy Mitford

Michael Ratcliffe

Nancy Mitford loved the war in London and performed her fire-watching duties with such zeal that she was invited to lecture to povices at the job. This, too, she enjoyed until she was suddenly asked to lecture no more. "It's your voice", they explained in some embarrassment, "Your accent irritates people so much thay'd

like to put you on the fire."
Diana Mosley told this story in
Julian Jebb's affectionate programme, and the Duchess of Devoushire embellished it: "My private sorrow is to be saddled with the Mitford voice", she told him at Chatsworth. "Living in the North of England, it's even sillier than everywhere

Seeing the four surviving sis-

of mind in the Redesdale family—if common is quite the right word—there were two distinct patterns of appearance and speech. Pamela, Diana and Unity looked like beautiful aristocratic dogs and spoke in a ripe also voice: Namela watch Pamela Jackson's face break into a great smile of pieasure and relief after she has solemnly read a passage from The Pursuit of Love—all four sisters read carefully and earnestly like children at a number of the property of the property of the property of the property of the particular and bore whilst to watch Pamela Jackson's face break into a great smile of pieasure and relief after she has solemnly read a passage from The Pursuit of Love—all four sisters read carefully and earnestly like children at a number of the pamela Jackson's face break into a great smile of pieasure and relief after she has solemnly read a passage from The Pursuit of Love—all four sisters read carefully and earnestly like children at a number of the property of the prop ters on one occasion (though not actually all together) suga ripe also voice; Nancy, Jes-sica, and Deborah were pretty as cats but cursed with a kind of coloratura squeak wholly in-adequate for their mental agi-lity and natural animation. Nancy's was by far the worst and one of the main reasons why over-serious persons underraced her spirit, truthful-ness and talent for so long. A further oddity of nature in the family was that the cats on the whole were extrovert and the dogs were shy.

Mr Jebb's celebration would convert no unbelievers (Harold Acton's memoir night) but for

network of kinship and memory thrumming again. Some of shared stories of Nancy and Swinbrook and the Rue Monsieur had been told in print before, but many had not and Mr Jebb, equally skilled at drawing out Lady Moseley more carefully than most interviewers and in keeping the urepressible Jessica in her place with the rest, drew from the shadows three witnesses of some significance in Colonel", Debo and Pam.

I have to say that after the

build-up, the third great love of Nancy Mitford's life, the gallant French Colonel was a bit disappointing (if you admire her you will almost certainly feel that about the first two as well) but Debo the Duchess handsome, self-depreciating and apparently serene like no other child of the Reesdales, told us of Nancy's delight on discovering that the middle syllables of her three youngest sisters' names were Nit, Sick and Bore, whilst to watch Pamela Jackson's face and out of the programme as they do in the novels and did in the life of the family on which they were so closely

Nancy once said that she believed in God in a besotted kind of way and hoped that Heaven would be full of nightingales and The Lost Chord. As the camera explored once again the sequence of family portraits over the years, as the parents grew grimmer and the children grew up. Mr Jebb gave her both. It was an outrageous and daring way to end, but it was also an authentic the faithful it movingly set the Mitford tease, and it worked.

LSO/Schmidt Albert Hall

Max Harrison

Wilhelm Kempff's piano-playing at the Festival Hall on Sunday afternoon than the vast resources convened later in the evening for Havergal Brian's "Gothic" Symphony. Fight bundred performers were advertised and the participatory groups were too numerous to mention, although the basis was provided by the London Symphony Orchestra under Ole

The "Gothic" Symphony brought together two projects of Brian's, a work on Goethe's Faust and a setting of the Te Deum in what was intended as Deum in what was intended as the extreme left—in the Albert a symphonic vision of the Hall, too—I must have got a Gothic age. To judge by the false idea of the balance.

programme notes, however, he intended it to contain much more, in fact everything, and that is probably the root of the trouble. The vast size-it goes on for the greater part of two hours — is typically late-Romantic, but the claim that Brian intended it, along with the other things, as a tribute to all the music that had influenced him points to another problem.

In fact, the "Gothic" Symphony echoes all that other music, its general style being nondescript, despite the extravagant means employed that are the basis of its hearsay reputation yet which are irrelevant in the light of its unoriginal musi-

The performance was a devoted one, vet as the management had thoughtfully seated me on

### Language rich of treasures

The Language and Imagery of the Bible By G. B. Caird (Duckworth, £18)

The Language Makers By Roy Harris (Duckworth, £15)

"This is a book by an amateur, ... written for amateurs." A dentist -writing on astronomy (as may a well have happened) or a philosopher on plumbing (and this almost certainly has) might well feel the need of that submissive gesture. But when G. B. Caird so begins his Preface, it can not be other than totally unjustified modesty. His subject, language, is not only one in which very few are so unfortunate as to be amateurs but one in which still a fewer can be more expert than he. For Professor Caird is a distinguished theologian with a profound knowledge of such diverse tongues as Latin, Greek, and Hebrew; and he has spout a large part of his productive life in exegesis. If I can invert. his declared goal, the book is. directed at enhancing our under-standing of language and "its inexhaustible treasures", using the Bible as the (unquestionably rich) data base.

A book about language, not a language. Nor is the Bible seen as being in a language. Caird's concern is to explore the language faculty that overarches individual languages. It is in this sense that he is looking upon the Bible as a linguistic : manifestation-much as the essence of Shakespeare's language can be as validly studied in the translations of Schlegel or Pasternak as in the original Elizabethan English This is Elizabethan English This is the level where the symbols really tingle, transcending the inkling cymbals heard from the specific tongues of specific men.

The emphasis of the book is therefore on semantics, metaphor, imagery, myth, communicative strategies, though blessedly eschewing the darker mysteries of hermeneutics. This is a thoroughly "modern" emphasis—curiously enough, in work whose intellectual frame a work whose interfecting trame of reference (tilted in the direction of J. L. Austin or Lévi-Strauss only occasionally) is founded largely on thinkers of days gone by. The book is none the worse for that, of course. Not even the youngest of Professor Caird's readers will be prefactualited with the thought overacquainted with the thought of Ogden, Richards, Bréal, or even of J. S. Mill and Jeremy Bentham. Learned, profound, exciting. Some amateur!

There is not much danger of taking Roy Harris amateur either. Oxford's first Professor of General Linguistics is making a very professional challenge to his own profession. If he does so, like Caird, by invoking the thinkers of yester-year (such as his 18th-century namesake), it is because, like Ogden—in fact very like Ogden, he thinks that linguistics has heen going seriously wrong. This in itself, of course, is far from being original or even uncommon. Linguistics has had enough violent upheavals in the past fifty years to make Maoist ideas of permanent revolution seem like a stagnant pool. In particular, we have grown used to that none too subtle distinction, between reflexives and re-ciprocals which produces judicious complaints of past errors not so much in ourselves as in

each other. But Professor Harris could justify himself far more readily than many who have sought to pull down old idols and set up new. His career has consistently shown him to be sceptically aloof from the slang and aggro of outrageous fashion, and his position now is not so much advocacy of yet another U-turn in linguistic theory as the quest for a symbiosis that will accommodate all creatures great and small. Which reminds us that Harris's last previous book was called Communication and Language—significantly reversing George Miller's title of the fifries. In his present book Harris is

ven keener than Caird on getting to levels of generality far beyond the actual tongues of men: all the way, indeed, to simian signals. Language is not just a matter of "talking heads". If attempts to make animals speak like us have been disappointing, this may be nothing more than a matter of anatomy and physiology: Washoe the chimp has gone to inguistic town with the sign language used by deaf-mutes.

It is on so fundamental an . issue that we see Caird and Harris divided by a common language concern. Orthodox linguistics has been thoroughly Biblical in maintaining man's uniqueness. Human language is not just better, it is fundamentally other than communication among the birds and bees, the fishes and mammals-however interesting and impressive this may be, in its own way, Chomsky and Caird find themselves together (each, no doubt, equally surprised) on the side of the angels. Harris prefers to line up with Darwin, high on theology's unwanted list; and he not only challenges the thinking of Chomsky and his establishment allies but is prepared to question their motives.

Two books from the same university, on the same day, on the same subject, from the same publisher. But of course only one of them is in Duckworth's Studies in Theology.

Randolph Quirk

# Slow swing keeps Faldo in front

By Peter Ryde
Nicholas Faldo won the PGA
championship for the second time
yesterday at the Royal St George's
course, Sandwich. His flual 69 course, Sandwich. His muan course, His muan course, Sandwich. His muan course, Sandwich. His muan course, Sandwich. His muan course, His muan course, Sandwich. His muan course, arread of Acid brown in second place. Faldo, still 22, was the dominant figure throughout the day, and although McNulty briefly and Norman later drew level, no one got ahead of him in the final

This championship has played an important part in Faldo's career. It set him on the road in 1977 when he finished sixth here, gave him first class status a year later, when he won at Royal Birklater, when he won at Royal Blukdale. Now it has restored him to
the front again—the first prize
was £11,660—after a year when
we lost sight of him until he won
a small, but for him important,
rournament in South Africa at the
very end of the season. Even so,
he had not won in this country he had not won in this country for long enough to make him feel the pressure. He consciously slowed this swing over the last five holes and the result was an envirhythm maintained to the

He started with six solid pars, He started with six solid pars, and picked up birdies at the seventh, where he again reached the green in two, and at the ninth, with a long putt from the back. He was playing the round much as he had said he hoped to the evening before: solid strokes and an occasional long putt to help him alone. and an occasional long putt to help him along. Then once again round the turn Then once again round the turn he faltered, more or less as he had done in the third round. An awkward stance for his second at the 10th caused him to bunker his second deeply. He recovered well, but missed the putt and a hole later missed from two feet. Norman had at that point drawn level with him. A birdle at the 12th steadled him, rallied his determination and perhaps even more important was his ten foot putt for a birdle at the 14th, after missing the green.

A one iron to the 15th, following a fine spoon shot from Coles, secured his two stroke lead, and he came to the 18th with the knowledge of a stroke in hand. It enabled him to play safe, avoiding any danger of the out of hounds at the back and winning the title with a chip and two putts.

putts.
The weather was ideal for a holiday finish and the crowds kept up well to the end; the official total gate was 18,000, and I heard of no trouble in the handling of them. The wind was unchanged from the day before and died almost away, which at last brought an improvement in the scoring. The veteran, George Will, started it by making 70: he was followed by Torrance. Morean and Darcy. by Torrance, Morgan and Darcy, then came Bland with 68 and last then came Bland with 68 and last of all Henning, with a record 66. Sun Alliance, the sponsors, have every right to be delighted with the result. There is always an element of risk in taking a professional tournament to a links course, and Royal St George's has always been a controversial course in this context. Last week end a good deal of that controversy was removed for ever. Overall watering had not only saved the course in a difficult spring, but produced it in better condition than I have ever seen it.

ken Brown made several spirited attempts to catch the leader spurred on by what sounded like a coachload of the Ken Brown fan club. It is rare for the dunes in this part of the world to hear cheers, but they might as well get used to it for they are sure to hear a good many more in next year's Open. In the crush round the lead Brown was unaware of what was happening: "I am too busy trying to keep up with the other golfers to have time to look", he said wryly. He came nearest to carching the leader with birdies at the ninth and 10th, but his pushed tee shot at the 11th finished in a bad lie in loose sand and he was lucky to get away

finished in a bad lie in loose sand and he was lucky to get away with dropping only one shot. And Norman had his chances but the 15th found him out and he again drove badly towards the end. Henning's 66 showed the congested state of the field behind the leaders. He came from tied 22nd to a position where he was at the time only two strokes behind the leaders. Faido and Norman. There were, at that point, some dozen players within three strokes of the lead. Henning scored 33 each way, one of many scored 33 each way, one of many scores that illustrated the equal balance of the two haives. The highlight of his round was an nighight of ms round was an eagle at the 14th, where he chipped in, but he made up much ground by the accuracy of his iron play. At the moth and 13th, for example, his mid-iron approaches finished almost dead for birdies.

Contam's Memorial: David Gra-

Graham's Memorial: David Gratournament by one shot from Tom Watson, of the United States, at Columbus, Ohio. Graham had a two-under-par 70 to finish with an eight-under-par 280, the lowest total in the tournament's five-year

Watson took a one-stroke lead over Graham when he scored a birdie at the par-live fifteenth hole, even though Graham holed a 25ft purt for an eagle three there. He lost the advantage at the seventeenth, when he needed three putts from 50ft.

In Corning, New York, Donna Caponi Young withstood a late challenge from Myra van Hoos to win a \$190,000 LPGA tournament by two strokes. Despite a twoby two strokes. Despite a two-over-par 74, Young was in control throughout and at one point enjoyed a five-stroke lead. Two strokes dropped at the afteenth and another at the fourteenth reduced her eventual margin to

Faldo plays out of the rough on to the third green.

### Final scores at Royal St George's

Hockey

### Slough hold on for European title

From Sydney Friskin Barcelona, May 26

Klein Zwitserland 0 Slough 1 British hockey may not be represented this year at the Olympic Games but a gold medal, all the same, is in hand. Slough lived through the longest six minutes of their colourful career at the Real Club de Polo here today to hold the lead which Andrew Churcher had given them from a short corner and win the Euro-pean club championship for the first time.

Slough are only the second British club to do so. Southgate's three-year reign having ended in

The Hague last year, when the title was taken away from them by Klein Zwiserland, the Durch champions, Klein Zwitserland, or Little Switzerland, is the name adopted by this club because the surroundings are wooded and hilly. But Little Switzerland's hockey But Little Switzerland's hockey team is full of tail, strapping men whose stature was diminished here today by the brilliance of Slough's stickwork and the tightness of their defence. At least one Dutch official admitted that Slough de-

served to win.

Who, then, were Slough's beroes? The answer is, all of them, They stood solidly together. man to man, blotting out one Dutch attack after another, never allowing their stick players. Ties Kruize and the Steens brothers to dictate terms. But from me to dictate terms. But from me the first bouquet goes to the goal-keeper, Ian Taylor, who deserved every sip he took from the champagne bottle he grasned at the end of the match. He stopped three stinging shots from short corners by Kruize who, in three earlier marches had converted seven lier matches, had converted seven

of these awards.

Not many scoring chances were created but it would be fairer to say that not many were allowed because of the alertness of both because of the alerties; of both defences. Slough, particularly in the first half, looked more assertive and Laly could have scored at least twice, just failing on both occasions to avoid the obstrusive pads of the goalkeeper, whose rimely deflections conceded long corners. It was only in the last 10 minutes of the first half that the Dutchmen threatened to score, we short corners proving abortive. the Dutchmen intestened to score, two short corners proving abortive. There was more than a hipt of danger from them in the early minutes of the second ball, with Borstlap coming through at great speed on the left. He put a good shot just wide of the far post, and later backpassed to van der these wheel seem soon sent the

and later backpassed to van der Horst, whose hasty scoop sent the ball just over the bar. Slough lost their best chance in the twenty-sixth minute, with Laly steering a reverse flick wide of the post. But three minutes later Daved's stick was chopped inside the circle and Churcher drove a fine shot home from the ensuing short corner. A spirited counter-offensive by the Dutch was successfully held off and Slough were jubilant, with the European championship, the national championship and the London League title in their pockets.

There was a fair haul of medals There was a fair haul of medals from this tournament for the British Isles. Glasgow Western won the silver medal in the women's event after going down to Amsterdam, champions for the fifth successive year, through a goal scored from a penalty stroke in extra time. Muckross, of the Republic of Ireland, won the bronze medal after beating Grosflottebeker, of West Germany, I... of The winning goal was 1—0. The winning goal was scored 10 minutes before the end

i—0. The winning goal was scored 10 minutes before the end by Davina Guiney on the follow up from a short corner. Penarth took fifth place after bearing Royal Uccle 3—2 in extra time and Chelmsford Ladies finished seventh with a fine 5—1 victory over Real Club de Polo.

Football

## Last chance for Forest to quali for European Cup next season

From Norman Fox Football Correspondent Madrid, May 26

The gossip of the day here on Nottingham Forest's arrival for Wednesday's European Cup Final against S. V. Hamburg concerned the absence from the travelling party of Stan Bowles, who decided against going to Majorca with the rest of the team last week, but there are more serious matters, as Brian Clough, the manager.

holders, and probably Hamburg winning the European Cup will offer the only opportunity to qualify for the same lucrative com-pedition next season. Forest will be our of Europe altogether if they fail and Hamburg will have to be eatisfied with the Uefa Cup because they have little chance of winning the West German League after a defeat by Bayer Leverkusen on Sunday.
Financially, this season's final
is not expected to provide either

Is not expected to provide either club with funds to pursue ambitions or, perhaps, even pay the bills. So far only about 25,000 tickets have been sold. Forest expect that roughly 8,000 supporters will make the long journey here, while Hamburg expect no more than 16,000. Both clubs would have preferred the final site to have been nearer home in northern Europe. Hamburg favoured Paris and Forest would not have argued, but the decision is always made months in advance not have argued, but the decision is always made months in advance with the consequence, at least on this occasion, that the huge Bernabeu Stadium will almost be the club's highest-paid player. Certainly be more than half empty. Local interest seems cool. Hamburg's concern has become the 1974 World Cup, will help the greater since they have lost confidence with the weekend's Keegan, who returns to England.

result and a serious ankle injury to Hrubesch, their centre forward, who had scored 20 goals in 33 German League matches this season. Kerin Keegan, who speaks of his determination to add another European Cup winners medal to his collection, but has been giving his collection, but has been giving away a few trade secrets, considers Hrubesch to be Forest's biggest threat if he plays, but ankle ligament damage is not usually repaired within the week. Hrubesch still says that he hopes to be fit enough to play, but the probability is that Francis's loss to Forest will be balanced by the absence of Hamburg's most dangerous scorer.

absence or Hamourg's most dangerous scorer.
Hamburg's earlier confidence no longer convinces. They have some problems with future contracts, most notably concerning their goalkeeper, Kargus, and they appear worried by the prospect of

Clough who, today irritated by what he irrelevant emphasis on of Bowles. He said Bowles wou " a good chance of ple but he did not know consider giving him future Forest more difficult, to pic for the final. I have to him ". The struati be that Bowles is Ay need of a convincing

Hamburg, May 26.—Franz Beckenbauer the former West German captain, has joined Hamburg from New York Cosmos, it was announced here today. The Hamburg chairman, Wolfgang Klein, said: "Everything is clear, Franz will play for Hamburg for the next two years," Before joining Cosmos, Beckenbauer played for Bayern Munich.

Dr Klein said both sides had agreed to say nothing about the

### New team keeps old standard

Elizabeth Edgar (Forever), John Whitaker (Ryan's Son), Robert Smith (Video) and Lionel Dunning (Jungle Bunny), Britain won the Prince of Wales (Nations) Cup at Hickstead yesterday, over a big and demanding course, with a grand total of eight faults.

Both Mrs Edgar with Forever and John Whitaker with Ryan's Son achieved magnificent double clear rounds, as did Gilles Bertrand de Balanda with the eightyear-old stallion, Galoubert, for the French team that finished second with 20 faults. The Netherlands were third with 31. Australia fourth (fielding a man short) with 421 and Ireland a surprising fifth with 52. The Swedes, who

fifth with 52. The Swedes, who were hopelessly outclessed, retired after the first round with a score of 521. Last year the French and the but Mrs Edgar and Forever reDutch chased the British team sponded with the first double home, and it proved the same this clear, and what was rapidly

Rugby Union

Slemen ready to play at scrum half if needed international on Saturday. Syd Millar, the Lions manager, echoed everyone's thoughts when he said : From Richard Streeton a background of dank green vinego on." Slemen, it appears, had some experience of the role at

yards and distant mountains. Tony Ward might have fancied himself still back in Ireland today as the still back in Ireland today as the Bridsh Lions rugby team trained here. It was Ward's first full practice since he arrived on Fridry and the first reaction of South African onlookers was that he looked a better stand-off than the three used by the Lions so far.

Ward did not drop a pass from Patterson. Nor did any of the other Lions fumble during some lengthy passing movements at the 90-minute workout. It was the first consistently cool, wer day of the tour and the Lions' handling and other drills were impressive. Similar conditions are forecast for tomorrow's match here with the tomorrow's match here with the Coloured South African Rugby Federation XV, the Protess.

Federation XV, the Proteas.

Playing scrum-half against tomorrow's Lions side was Slemen, the England wing, who will be on the replacements' bench, ready to do the same job if necessary. The orthopaedic specialists have not made up their minds about the injured Holmes yet, but Robbie, as expected, is flying to Cape Town tomorrow from Eulawayo, where he was playing this efternoon. Holmes's left arm is in a sling and he definitely will not be playing for at least a fortnight. It seems a little curious that the Lions are risking Slemen, their most dangerous wing, as a possible scrum-half so close to the first

college, and claims he was once chosen ahead of Jan Webster, Ar practice Siemen entered into hi task with relish with some splendid diving passes, which were not inappropriate at the Danie Craven Stadium, named after the man often credited with being the first diving scrum-half. Robbie will stay with the tour only for as long as he is needed. he is needed.

There are several men in the Federation XV, who are familiar from the Froteas side which toured Britain a few years ago and from the South African Barbarians last October. Tobias, the standoff is one of the feature o canada last october. Ionias, the stand-off, is one of the few Coloured players to have been picked for a Currie Cup side, though Boland bave recently dropped him for being too venturescent

### County ponder punching affair that Ringer denies

Paul Ringer, the controversial Welsh rugby international, will have to wait until next month before hearing whether further action is to be taken over his allegedly having punched Paul Freeman, of Hertfordshire, during a seven-a-side tournament in the Netherlands a fortnight ago.

Freeman, from Letchworth Netherlands a fortnight ago.
Freeman, from Letchworth,
claimed that Ringer attacked him
without provocation and that he
had to go to an Amsterdam
hospital to check that his jaw was
not broken. It was not, but on
returning to England he needed
more treatment.

ward, was sent off against England for a late tackle on John Horton in February and banned for eight weeks. He has appeared six times for Wales and would probably have been with the British Lions in South Africa but for the inci-dent at Twickenbam. Ringer was playing for Steepholm in the Netherlands tournament. He has strenuously denied the allegation. Hertfordshire Rugby Union will discuss it at their meeting on June 10 and could refer it to the RFU for action.

Boxing

#### Cooney stops Young to keep record

Atlantic City, New Jersey, May 26,—The unbeaten heavyweight Gerry Cooney won his 23rd consecutive professional contest yesterday when his scheduled 10 round bout against Jimmy Young was stopped after the fourth round because the 32-year-old Young had a cut over an eye. It was the 19th knockout or technical knockout, for the 23-year-old Cooney, who is ranked mumber one challenger by the World Boxing Association (WBA) and third by the World Boxing Council (WBC). Young's defeat was his fifth in his last eight appearances and his tenth overall in a career that has also brought WBC's sixth ranked heavyweight 25 victories and two draws.—Reuter.

is to appear for Fores a happier theme. Lik covered from the enk received while playing and will definitely tal in the Forest defence day.

### Beckenbauer for Ham

By Pamela Macgregor-Morris

For the fourth successive year, and with an entirely new team of Elizabeth Edgar (Forever), John Whitaker (Ryan's Son), Robert Smith (Video) and Lionel Dunning (Jungle Bungy), Britain won the Prince of Wales (Nations) Cup at Hickstead yesterday, over a big and demanding course, with a form Dunning, is the one that from Dunning, is the one that should have gone to Moscow), and he is a half thoroughbred out and be is a balf thoroughbred out of a French mare.

At the end of the first round, after a number of cricket scores and only three clear rounds, Britain led with just four faults at the pallisade, the eighth fence. France were second with 12, the Netherlands third with 19, Australia fourth with 20, West Germany fifth with 28 and Ireland sixth with 32.

In the second round, Frederick

### Yachting

#### Mini-tonners in close competition

One eighth of a point separates the top two mini-tonners as they go into their last race today for their Scottish championship in the Tomatin Trophy series.

'The challenger from Northern Ireland, Chris Boyd's Production yacht, Irish Puppeteer II has that margin over Bill Mackay's new Ministar design, Billycan 80, which winistar design, binycan so, which won jetterday's race in a light southerly breeze in Loch Fyne by 3 minutes from Limbo Lil.
The former Tomatin Trophy winner, The Shamrock halfwinner, The Snamrock half-tonner, Jonathan Livingston Vul-ture, struck form again yesterday to win IOR Pivision B and a new leader in Division A was the UFO 34 Incisor. In these conditions the Kintyre shore paid off to wind-ward.

## Father follows in son's wake as wind catches out fleet

By John Nicholls Light, changeable winds brought about interesting and, for some competitors, frustrating racing at Weymouth yesterday. A breeze that was predominantly off the land was itself shifty as well as being influenced by whatever sea breeze found its way into the bay. Add the wind shadow of Portland Bill, alongside the Tornado course. and some idea of the problems may be appreciated.

The wind shifts on this course were forminable and no sooner had the race officer set in motion the complicated procedure for altering his course than the wind would swing back to where it had been and so on. Reg White led

the fleet away from the starting time, followed by one of the four Swedish entries, but it was his son Robert who fitished first.

The smaller dinghies, racing farther inshore, were less affected by the breeze, but even so there were some wind-assisted place changes. Edward Warden-Owen changes. Edward Warden-Owen was caught on the wrong side of one and dropped from second place to third in the 470 race after lying second to Jeremy Bickerton throughout the early stages. Bickerton had established a comfortable lead on the first windward leg and never appeared to be in danger of losing it.

The loss of Setunday's race (due The loss of Saturday's race (due

Swedish boats took second and third places, with Reg Smith coming home fourth.

Helsinki, for which two places are and Patrick Blake changing places in Blake's favour.

The Finns made a good, comRESULTS: Soling: 1, T. Wade: 2. The Finns made a good, compact start with the eventual leaders all being well placed at the windward mark. The Belgian, Luc Van Keirsblick, was first round, followed by Christopher Law and the Japanese belmsman, Hirosawa Takaharu. Law was firstended in water the start of the st frustrated in every attempt to overtake Van Keirsblick, so he let Takaharu into second place and, while the Belgian and the Japan-ese watched each other. Law slipped past both of them. There were many place changes

among the Solings, where Alan Warren, first at the windward mark, ended up third and Terry Wade moved up from seventh to The loss of Saturday's race (due to disqualification) by many British warren, first at the windward mark, ended up third and Terry look serious for those not among the leaders on points. The Wey first. The Flying Dutchmen, racmouth meeting is being used as the qualifying event for selection to the European championship in so drastically, with John Loveday

leepy century

Cashire, Carrick made the first of his two first-class hundreds. Yesterday be got 63. Thought of, when he first came into the game, when he first came into the game, simply as a bowler, he is fast be-coming an all-rounder. By the time he and Bairstow came together, Lancashire's attack had lost its first freshness, but no-one else in the day, other than Hamp-shire before he lost the use of his left hand, made anything much of In the morning Yorkshire went from 30 for three to 131 for six. Sharp was caught at the wicket for nought off a ball that lifted: Cope, in his element as a weekend watchman, lasted for 30 minutes

before being caught at second slip. Hampshire, who will bat again in the match only if he feels obliged the match only it he feels obliged to, played some fine strokes, as he usually does if he is in for long. After the long, dry spell, the Headingley outfield is lightning fast. In the four hours play that was possible, and of the 202 runs that were scored, 130 came in

By the time the evening's play began the morning crowd of perhaps 12,000 had mostly left. Watthing by now, though, were Clive Lloyd and Joel Garner, down from Chesterfield and marking their cards for tomorrow. The afterocon's rain, rather than freshening the pitch had, if anything, subdued it. Garner, even so, must have liked what he saw, and to make the runs they did Carrick and Bairstow needed to bet with great spirit. One takes to certain cricketers for their gusto and enthusiasm and, for me, gusto and enthusiasm and, for me, Bairstow is one of these.
In Lancashire's championship

SWANSEA: Glamorgan, with five second innings wickets lead Nottinghamshire by 11 runs.

At the start, Nottinghamshire were 113 for three, 95 behind Glamorgan, with 33 overs bowled. This was no better than an acceptable position, because Swanses pitches do not customarily improve as the march goes on. It looked rather less accept-able when they lost their sixth wicket at 168. Cooper and Tunnicliffe were both caught in the slips, and Hassan was leg before. But there followed a stand of 105 between Rice and Curzon, and further vigorous batting from the tail. When they were finally ont, in the 93rd over, Nottinghamshire had a lead of 149.

It would have been greater had not Rice got out when he seemed to be approaching the crest of an innings of power, Caught in the slips. This was an exceptionally good catch by Hopkins, his third in the innings. The score was then 280 for eight. Curzon had been our a couple of overs before. Hemmings and Hadlee then rubbed it in with a partnership of 63, before Hopkins took yet another catch.

Rica we know to be a high class batsman. Curzon is a comparative newcomer, played principally for his wicket-keeping. This was by some way his highest first class score. He has a sound temperament in a crisis. He was caught at deep square leg off Hobbs, who might have been bowled more, and earlier. He certainly bowled more accurately and thoughtfully than Featherstone and it is true, though largely forgotten, that there is nothing like leg spin for breaking a threatening partnership.

It was a warm day, with several thousand people present, though It would have been greater had

It was a warm day, with several thousand people present, though it was a much smaller crowd than used to assemble on bank holidays used to assemble on bank holidays when Glamorgan played the touring sidet. Because they were the 17th, and last, county to join the champiouship, and all the other counties had their regular home and away holiday fixtures, Glamoran aw gan used to get two matches against the tourists, and often,

### Hendrick's hat-trick victims quick urged on with passionate enthusiasm, did very well in them. to reply Yesterday the crowd had some thing to raise a cheer about for while, when Jones and Hopkins opened Glamorgan's second innings. The pitch was dusty but had not played badly so far, and Jones must have thought he had better get runs quickly. He played some attractive strokes and had

By Gerald Richmond CHESTERFIELD: The West Indians beat Derbyshire by nine wickets

some attractive strokes, and had scored 31 out of 44 when, in the 12th over, he miscued an on-drive. In the evening the ball was furning. Occasionally Hemmings Hopkins caught off bat and pad, and Miandad leg before. After his marvellous start to the season, Miandad is suddenly finding life more difficult. There was now a question of how much of the match would be left for today. Francis was the next to go, and Featherstone was out just before the close: but by a brave innings he had at least ensured that Nottinghamshire would have to bat again.

lively as the one produced at Queen's Park.

With an overnight lead of 61, Lloyd decided to bat on, but if his idea was to give the lower order some practice before the Prudential internationals, the bowlers were clearly not impressed. Hendrick required only four balls to polish off the innings, performing the hat trick after Taylor had acrobatically stopped his opening sighter. Marshall fell to a finely judged carch by Kirsten, who had to run a long way back from mid-on, Roberts was held at cover, and Garner edged the next ball low to Steele at second slip. It was the first hat-trick of Hendrick's career and he was satisfied by his figures of five for 59; his return to full fitness after a shoulder operation is as important to England as it is to Derbyshire, and he is well on the way.

Hendrick's victims then set about what, to them, was their real business of the day and bowled Derbyshire out in under two hours. Roberts took the first four wickets, Garner next four, and Marshall rounded it off. When Borrington, opening because Wood was still feeling the effects of a blow on the head which had caused him to retire hurt at the start of the first day, was caught down the leg side off Roberts, four wickets had fallen without any hint of a run. Wright, who collected the first 13 scored, was hit on the chest before being bowled off his pads

the game, to wear a helmat.

The West Indians needed eight to win after lunch and lost Bacchus in the process. Wright, never before invited to bowl, opened with a generous long hop which Bacchus pulled straight to Kirsten. Only three other players have taken a wicket with their first ball for Derbyshire, among them the fiery Copson, who went on to collect more than 1,000. It is not anticipated that Wright will emulate him.

Schools matches

Derbyshire played some good cricket on the first two days of this match but they were swept aside by the West Indian fast bowlers yesterday. The tourists won their fourth first-class match out of four and, apart from the money accumulated from each rictory, remain on course for the f100,000 offered by the sponsors, Holt Products, if they win all 11 county matches. The odds will favour them if all pitches are as lively as the one produced at Queen's Park.

Wright, who collected the first 13 scored, was hit on the chest before being bowled off his pads and Steele was caught off a glove when trying to avoid a ball which was heading for his throat. The conditions had persuaded even Steele, who usually scores such protection as being alien to the game, to wear a helmst.

# Connors beats Panatta in absorbing contest won the men's singles for three consecutive years and five times altogether—a feat that Borg is expected to complete this time. McEnroe is competing here for the first time since he won the mixed doubles with Mary Carillo in 1977. He would like to beat Borg on the Swede's favourite surface, but probably needs much more experience of slow play

From Rex Bellamy Tennis Correspondent Paris, May 26

Jimmy Connors beat Adrianno Panatta 6—4, 4—6, 6—2, 7—6, here today in the kind of tennis match that has earned the French championships their reputation for providing the most arduous and attractive tennis in the calendar. This feast was laid before us on the first day of the tournament on a centre court packed by a boliday crowd baskpacked by a boliday crowd bask-ing in bright heat and ever will-ing — nay, eager — to offer their collective opinion during a series of controversal line decisions. Here, in fact, were three hours and twenty minutes of highly skilled and intensely dramatic

Connors has proved himself on everything except slow European clay. Panatta wants us to remember that be was champion here in 1976. In addition to the fire within them and the exemplary quality of their tennis, there was an absorbing contrast in personalty and playing method. There was nothing fancy about Connors. He was working and he was gambling — which is to say that he bit and ren and counted with bit and ran and grunted with effort until the sweat poured out of him, and that he kept dashing to the net in spike of the risks inherent in Panatta's passing shots

sporting endeavour.

and lobs,
Panatta, with his sitky good
looks and Latin penchant for style
in all things, blended explosive
serving and ner play with much

#### Pri is defeated in straight sets by Swede

Jakarta, May 26.—The former All England Champion Svend Pri of Denmark was the first major casualty in the opening night's play of the second world bedminton championships here today. Pri, who wrested the All-England title from Indonesia's Rudy Hartono in 1975 to break his domination, went out in straight sets 15—9, 15—6 to the Swedish number two Thomas Khiistrom, Although not expected to be amongst the top contenders for the title, Pri was strongly fevoured to at least get past this second round.

Denmark's hope in the mensingles now rests very much on

second round.

Denmark's hope in the men's singles now resss very much on their defending champion Flemming Delfs and their national number one Morten Frost. Frost did for play today bur Defs easily defeated Hroyuki Hasegawa of Japan in straight sets. 15—10, 15—3. All the other 37 matches tomight went without any upsets with the top aseds having drawn first round byes.

Malaysia, who had a disappointing night with the losses of all their single matches, two in the men's and two in the women's, suffered their biggest serback with the 10—15, 6—15 defeat of their national champion Saw Swee Leong by the Indian number two Syed Modi. Malaysia's two other players, Misbun and Jelani Sidek, who had dirst round byes play tough second round matches tomorrow against Liem Swie King and Rudy Hartono, the number and Rudy Hartono, the number

Real tennis

### Boldness is a good friend to Ronaldson

Christopher Ronaldson. Hampton Court, won the British professional championship by the narrowest of margins at Moreton Morrell yesterday. In the final of this Unigate-sponsored event, he beat the holder, Frank Willis of Manchester, by 5—4, 4—6, 5—6, 6—4, 6—5, after three and a quarter hours of grueiling play and beat a very short chase to

do so.
When Willis led 5—3 in the final set, it looked as if his sheer determination and greater exper-tence would carry him through. He scrambled better than Ronaldson and knew when to make a major effort. He found the grille more frequently, though Ronald-son was more adept in forcing to the dedans.

Then Ronaldson, whose play had been subject to sudden though brief lapses, played two though brief lapses, pleyed two games with considerable boldness. To make it 4—5, he found the dedans twice, the grille and winning gallery once each. He won a love game for 5—5, and then began the long, breathraking final sorde. This almost tells the story of the whole mach, as it was, like so many games, long and tortuous, studded with fine strokes and some persons once. and tortuous, studded with fine strokes and some pervous ones. Willis led 30-15, but failed to heat two chases, one of them short. Ronaldson reached the first of his six match points to be beaten by a good length stroke into a corner. Ronaldson missed two more match points, netting his stroke. Willis had his one and only match point, which Ronaldson saved with a grille. Ronaldson fluffed two more match points until, on his sixth, he faced a chase worse than a yard. Willis was quick to congratulate him when he beat it—a nice gesture from a man who has held the title for a dozen years.

### Sprint finish proves just too much for Barnes

By Michael Coleman One length (about two printers' formes) deprived Nicolas Barnes, (whose father, Vic, is a compositor on *The Times*) of the National schoolboys' road race championship held over 25 miles of the Eastway circuit in East London esterday. That tantalizing distance in front was Kevin Richards, from

Purley, an old rival, even for lads not yet 16. Second from 80 starters, each one a divisional coampion or runner up, would satisfy most people. But if you really believe that, you have never been second, with most of your energy unspent as was the case with the Dartford as was the case with the Partford boy. It was either Richards or Barnes for the title, everyone born within earshot of Bow Bells seemed agreed beforehand, the understanding being that the non-Londoners would burn themselves out by about midway over the bumpy, twisting one-mile circuit. Barnes, strong in stamina, could then take the title by shaking off Richards before the sprint—that then take the one by Stating of the first state of the sprint—that was the thinking anyway.

Unfortunately for Barnes, the race took a dramatic turn about lap 10 with the retirement of Dean Butler, from Oundle, the main aggressor up to then. "Until Dean dropped out sick it had been the sprint—that the

very fast, all stops and starts ", a very tired Richards, who is 16 on August 18, told me. "I was getting a bit worried. Luckily the pace then settled down." In error, Barnes accepted this pace (about 24 mph) too, leaving his final attack until the last hill and turning Clarey's Corner only two lengths up. It was set up for Richards with Dean Norton from Chesterfield bringing in the rest.

Richards, taking five O tevels soon at Hayling Manor School, Purley, rides now for the new 14-member Velo Club d'Or, sponsored by Pennygate, a computer services firm. Like Barnes, who is 16 on June 16 and will set 6 O levels, he will leave school after his examination. Barnes wears the vest of the 100-member Velo Club de Loudres, a nursery of champions and whose pronunciation cycling announcers normally Anglicize. He recently sat examinations at the London School of Printing, not just to follow in his cycling father's footsteps, but needing a job allowing daytime

Goodhew gives the clenched fist salute

Swimming

#### By John Hennessy Duncan Goodhew, from Beckenham, emerged as easily the most distinguished competitor at

the Amateur Swimming Associa-tion championships, sponsored by Optrex, at Blackpool. Whereas every other swimmer has been struggling to achieve the second tier of Olympic qualifying stand-ards, which would put his or her name forward for consideration, Goodhew reached the first tier in each of his breaststroke events, so he is guaranteed an automatic place in the team for Moscow on two counts.

Goodhew had reached his 100 metres goal on Saturday. Yesterday he swam the 200 metres in 19.07sec curracting the each of his breaststroke events, so

may he swam the 200 meters in 2min 19.07sec, surpassing the stricter Olympic, standard by seven-tenths of a second as well as his English record by 1.33sec. Only the renowned Scot, David Wilkie, among Britons has had a white, among britons has been better time over the distance. Not surprisingly; Goodhew raised a cleuched fist of triumph in response to the generous applause. Jackie Willmott, of Southend, could not reach the same exalted but they they she is only 15. peaks, but then she is only 15, and she should be delighted with ama sne should be decigned when three ritles. The third, yesterday, was the 200 metres freestyle, in which she established a British record of 2min 3.23sec. Miss Will-

mort has qualified for Olympic consideration in the 200 and 500

events. For the second

time she dislodged Sharron Davies (Kelly College), who finished a disappointing third behind June Croft (Wigan) in 2min 5.99sec, a second and a half slower than her winning time last year. Perhaps she was saving herself

for the 400 metres individual med-ley at the end of the afternoon. If so, it brought her little comfort. Although she won from a moderate field, her time of 4min 56.90sec was well outside the consideration time and the 4min 47.67sec with which she won last year and in 1978, when she was only 15.

It was another performance lacking in lustre and raises again the question of her need for a change of environment from the Kelly/Wimpey hot-house. This would be hard to accomplish because of her standing in the Kelly College scholarship team, and the Wimpey sponsorship, and because the coach there is her

The men's 100 metres, the Blue Riband of swimming, produced the usual blood-curdling finish as six men thrashed for home, bu the excitement was not echoed by the stop-watch. The winning time of Martin Smith (Radeliffe) was 52.85ec, which was well outside the Olympic consideration mark. Since no man has reached the required standard in the 200 metres either, forming a sprint

problem.
Only 19 swimmers have so far reached the consideration stan-dards, which leaves the selectors probably seven short of the team for Moscow.

#### Sheene hopes to save finger Marseille, France, May 26 .-

Barry Sheene flew to London Barry Sheete Hew to London today saying there was a five per cent chance of saving the little finger of his left band, which was seriously injured when he crashed during the French Grand bally here presented. Prix here yesterday.
Sheene said doctors at Timone
Hospital in Marseile had recommended amputation, but he wanted his physicians in England to make the final decision.

### All smiles in Sangster camp after Piggott triumphs on Gregorian

By Michael Phillips Racing Correspondent Whatever the differences of opinion in the Sangster camp over Monteverdi in the past week, they were buried yesterday and it was all smiles again at Sandown Park all smiles again at Sandown Park after Lester Piggott had won the Brigadler Gerard Stakes for Robert Sangster. Danny Schwartz and Vincent O'Brien, on Gregorian. "Now that Lester has expressed a wish to ride him in the Derby, we are delighted and we will back him to the hill." Mr Sangster said. He added that Piggott will also be required to ride Forlene for Ballydoyie in the Oaks which can only have put

dealy quickening the pace once in line for home. He put the finishing touches to a good day by winning the last race on Enchantment. Gregorian may look a trifle ungainly at over 17 hands, but in this form he will take some beating at Royal Ascot, where he runs in either the Prince of Wales Stakes or the Hardwicke Stakes.

Takes and Vincent at Ascot. However, with Robert Armstrong's horses in such sparking form, it will be bold to oppose Noble Saint, who had the measure of his opponents at York some way from home.

Later in the afternoon, Henry Cecil will give the disappointing 1,000 Guineas favourite, Saison, an opportunity to redeem beneals. To say that Jeremy Tree was

pleasantly surprised to see his lightly raced three-year-old Sharpo win the Temple Stakes would be putting it mildly. After Sharpo had virtually silenced the stands by winning this Group Three sprint at 33-1 on only his second amegarage in onbile Tree said: ride Forlene for Ballydoyie in the Oaks, which can only have put a cat amongst the West Ilsley pigeons. They were counting upon Pigott being free to ride either Shoot a Line or Bireme in the fillies classic at Epsom.

Piggott was going to Ireland after racing finished at Sandown Park yesterday afternoon to ride Monteverdi in a gallop there early today and doubtless he will get the feel of Forlene again too. Still on the classic front, there is a strong feeling in the wind that Tony Murray will ride whichever Willie Carson discards out of Heabit and Water Mill in the Derby. Dick Hern could not have hit upon a better choice because Murray has just won the Irish 1,000 Guineas.

Piggott was in sparkling form yesterday. He rode almost identical races on Gregorian and Imperial Ace to win the Brigadier Gerard Stakes and the Whitsun Cup, dictating the gallop to the rurn into the straight and then sud-

Later in the afternoon, Henry Cecil will give the disappointing 1,000 Guineas favourite, Saison, an opportunity to redeem herself in the Chequers Filies Stakes. Our Newmarket Correspondent told me yesterday that Saison has been going as well on the Heath been going as well on the Heath recently, as she was before her classic, and that he is at a loss to explain that inept performance. However, Saison went to the post for the 1,000 badly and came back even worse. Until such time that she has re-established her credibility beyond doubt, I shall be content to look elsewhere.

In this instance it is to Plain Content to look elsewhere.

In this instance, it is to Plain Tree who should be suited to this mile judged on the way that she finished over six furlongs at Kempton Park, Motavato, my selection for the Philip Cornes Nickel Alloys (qualifier), ran a highly promising race at Haydock even though he was beaten a length by Chummy's Special. He was catching the winner hand over fist towards the end that day, and he should be in his element this afternoon racing up the stiff five furlong chute at Sandown.

## Taffy makes light of his 3lb

Taffy, an effortless winner of the Harewood Handicap at Doncaster yesterday is out to emulate the feats of Trelawny in 1962-63 and Mountain Cross two years ago, by winning the Ascot Stakes and the Queen Alexandra Stakes at Royal Ascot in the same year. Michael Buckley's five-year-old, making light of a 31b penalty for his Kempton victory last week, made every yard of the running, in the hands of "Kipper" Lynch. Clear of his rivals turning for home. Taffy drew right away in the straight and, eased before the post, landed the odds seven lengths from the top weight, Wesley, who was three lengths ahead of Migelitto. "It looked as though they were going to play about, so I Taffy, an effortless winner of they were going to play about so let him bowl on, and he loved it,"

Lynch said.

The jockey, Michael Wignam brought off a 314-1 double on Tre Fontane and Just Amber, whose narrow victory in the Impel Handicap indicated that Tommy Fair-hurst's horses are recovering from the virus. It was a tremendous finish with Goldliner Game, who had taken over from pacemaking Hexgreave Elite at the distanct, Hos Case and Just Amber racing virtually abreast to the line. Just amber gained the verdict by a

This was a victory which led to the stewards inquiring late Just Amber's improved running compared with the Thirsk Hunt

Lynch: winning ride on

Cup, lo which he was lost. They accepted the explanation of Fair hurst's son, Chris. that the colt was hampered on more than one was hampered on more than one occasion at Thirsk.

Tre Fontane, who lost his chance at the start in his only other outling at Thirsk. Is a useful northern jutemile, from his showing in the Zetland Maiden Stakes. Mrs Poh-Lian Yong's coit got got nome by threequarters of a length from the odds-on favourite I'll See You, the pair being ten lengths ahead of the third, McCarthy. Wally Swinburn escaped unscathed when Cally stumbled and unshipped him coming out of the stalls.

Leoff Baxter took the honours at Leicester with a 5-1 treble on at Leicester with a 5-1 treble on Strathfillan and Dressedtokill, both Bruce Hobbs, and Chiquitita
Paul Cole.

### Side Track discovers the main road home to celebrate return

By Michael Seely By Michael Seely
Side Track celebrated his return to Redcar by winning the Zetland Gold Cup yesterday. Just under a year ago, Side Track and George Duffield just prevailed in a driving finish to the Andy Capp Handicap on this track. Once again Duffield was seen to great advantage as he persuaded Gavin Pritchard-Gordon's four-year-old to produce a fine turn of foot to servle the issue in the last furto produce a fine turn of foot to sertle the issue in the last furlong. Side Track beat Joleg by three-quarters of a length with Red Rufus a length away in third place. Pritchard-Gordon also won this race in 1975 with Side Track's full brother, that prolific moneyspinner, Record Run.

The race developed into a sprint in the last three furlongs. Inside the distance, Red Rufus took a slight advantage but could not quicken on the firm ground. Tesoro Mio was left behind when the race developed but staved on Tesoro Mio was left behind when the race developed but stayed on in the closing stages to finish a close fourth. Pritchard-Gordon's stable is now finding its form with a vengeance. Side Track's victory follows hard on the heels of those of Cardinal Flower at Kempton and of Majestic Star at Windsor on Wednesday. Majestic Star will take his chauce in the Derby. Jockey arrangements have yet to be finalised but at this stage it looks as though Alan Bond may have the mount on Jim McGaughey's three-year-old.

Peter Walwyn's raid on Redcar was unsuccessful. Before the de-feat of Red Rufus, the Lambourn

trainer's Simla finished unplaced behind Bill Watts's Fascadale in the Spring Bank Hollday Handi-cap. If he lives to be 100, Nick Connorton, the 18-year-old apprentice, will never ride a better race than he did on Tanny

Leggatt's six-year-old.
Fascadale had to be restrained until the last possible moment. A furiong from home, Connorton was giving a creditable imitation of Lester Piggott on Nijinsky, so of Lester Piggott on Nijinsky, so easily was the second favourite travelling. Squeezing his way between Morvetta and Syncopate in the last 100 yards, Fascadale lengthened his stride to win cleverly. He is a useful horse in this company when things go his way. Michael Stoute, also successful company when things go his way.
Michael Stoute, also successful
at Sandown Park with Imperial
Ace, completed his double when

Aleos comfortably justified fav-

Raymond in the B Stakes. The Aga In year-old, a disappoint at Newmarker exist season, made no missis coming home two i lengths clear of Supreme Coin, Wall challenger of the atter only fluish eighth a none too clear a Durr can continue h

### Moulouki wins by a he

From Desmond Stoneham French Racing Correspondent

Paris, May 26 Moulouki, the only three-year-old in the race, took today's Group 2 Prix Jean de Chaudenay at Saint-Cloud in a close finish with Hard To Sing, Buckpoint and River River, Half a length separated the first four and Moulouki had a head to spare over Hard to Sing who was the hero of the race, as he gave 23 lb to the winner.

### THE DAZZLING NEW TALBOT SOLARA.

Solara—the new car from Talbot that radiates style.

A dazzling new look

Solara blazes with elegance and its aerodynamic shape minimises wind resistance and noise.

Let the sun shine in

Six big side windows give you all-round visibility and shed light on the spacious interior that puts a premium on comfort.

Bright ideas in technology

Every model has electronic ignition as well as other exclusive features – built-in technology that combines performance and efficiency. And the Solara SX comes equipped with power steering, cruise control, trip computer, electric windows, central door locking and a great deal more besides.

A shining example of reliability

The power you get with Solara is

matched by the power that backs it up There is the comprehensive Talbot Warranty and Extra-Care policy and 10,000-mile servicing.

A brilliant new range for the 80's

Solara offers genuine choice of seven models, 1300 or 1600 engine, 4- or 5-speed manual gearbox or automatic.

A test-drive will give you the Solara experience. Discover the glow that comes from driving this extraordinary car and light up your life today!

# The 'Czechoslovak future' looming for Poland as the clamp on freedom tightens

Unlike the Czechs, the Poles have so far had

much greater scope to publish and teach

limits and these appear to be narrowing

unofficially ... yet this space has severe

A few weeks ago I lunched in Warsew with Adam Michaik, the young historian and reteran oppositionist. Walking away from the restaurant with him we were followed by two plain-clothes policemen. They came mearer and mearer to us then errested him, routinely and mechanically, before our eyes, ignoring us totally, and bundled ham into a car. Two others were similarly arrested that afternoon, in order to prevent a meeting of the programme committee of KOR, the Committee for Social Self-Defence. Our sense of shock at these events was treated by our Polish friends with some amusement, bred by sheer normality. Two days in a dirty cell with-out decent food, light or washing facilities is, it seems, a mormal hazard of a free-think-

"I compared the situation with the recent expulsion of Oxford dons for strending Julius Tomin's unofficial philosophy course has focused public attention on the narrowness of the space Czechs have for free thought and independent

may. Nor long ago, Julius Tomin was dregged by police down three flights of stairs from his apartment at the time bis Wednesday seminar was to begin, forced into a car and taken to the police station. questions or even to stand up. After several hours he was bundled out and, because the police did not want a body lying outside the station, left some distance away on a pile of coal. He shook himself down. violked home and then dis-cussed Aristotle with his wait-ing students for four hours. The police, however, made clear their intention to disrupt future meetings of his rourse. They were as good as their word, and after set another meeting had been broken up Dr Tomin and his students went on bunger strike. bey have since had to suspend weekly meetings because

of police brutality. · Another unofficial philosophy course, run by Jan Litomisky, in a small town between Brno and Prague, has likewise been disrupted, with participants from both cities detained and interrogated. Peter Cibulka, a 29-year-old worker, sentenced to two years for "incitement"

spends his time running about

and also active in the Brno courses, was given a further year's imprisonment for going hunger strike. Some 200 Erno workers who signed a protest against this were met with nterrogations and beatings. In Poland there is certainly

greater room to think and act

freely. It is as though Communist satellite states must specialize in such areas of in-Romania in foreign affairs, Hungary in economic activities and Poland in the cultural sphere. Unlike the Czechs, the Poles have so far had much greater scope to publish and teach unofficially. Some 30 periodicals and many books circulate in samizdat form, some in many thousands, often ex-ceeding the limited runs of officially published books and They are read and magazines. circulated openly among students and proudly displayed in non-dissident homes. The socalled 'Flying University' (so named after its anti-Tsarist predecessor), which its organizers prefer to call the 'Society for Academic Courses', has in its two and a half years of life attracted some thousands of stodeuts to its public lectures, seminars and discussions, even recently filling churches in Typical topics were recent Polish history, the sociology of power, the present state of the Polish economy and modern Russian literature. It has survived last year's ugly violent attacks, sponsored by youth members of official organization, and it has the sympathy and often over support of official academics and some Roman Catholic intellectuals and bishops. Moreover, most of its lecturers retain their official positions, many in

the Academy of Sciences, unlike

their Czech equivalents, who

turbines or without work. On the other hand, they cannot have official contacts with students or publish their work: that is, they are employed by the state just to produce unironic result of their activities may have been to liberalize the

scope of discussion and debate in the official universities. vosing sympathetic official profeswith a dilemma as to where their main lovalties should lie. Opposition activity takes other orms beyond the cultural sphere. The activists of KOR, independent trade unions and

other opposition groups managed to distribute some 300,000 leaflets calling for a boycott of the recent parliamentary elec-tions. The modernizing Catholic movement, OASIS, with between 45 and 80 thousand supporters, has similarly criticized particisystem and pledged its support for the democratic opposition. KOR remains the principal organized centre of political opposition, supporting independent activity in the country, among students and workers, especially in the Baltic ports.

### Mass lovalties

The survival of such freedoms in Poland can be traced to a number of distinctively Polisi factors. There is the powerful and independent Church, drawing on mass loyalties sympathetic, within shifting limits, since the mid 1970s to the opposition and human rights issues. There is the twice-enacted veto-power of the workers which has shown inself uniquely capable of toppling the leadership of a Communist government And

of self-assertion, resistance and in the last resort determined Union is evidenty keenly aware. The Poles would not react to intervention as the Czechs did. Eren a highly-placed party offi-cial will openly indicate what the Poles feel about Afghanis-

Yer this space has severe limits and these appear to be narrowing. A particularly fierce campaign is afoot against those paper Robotnik. One of its edimrs. ing specified by the law as a maximum period pending charges and investigation) are regularly employed as a means of the opposition, as are housesearches, in which papers, and typewriters are taken and never returned.
The "Flying University"
itself is coming under increas-

ingly crippling preventive harassment. The public announcements of its earlier phase have been dropped, but even private courses are frustrated by police action. Moreover students at official institutions are increasingly afraid to risk (whereas attendance Czechoslovakia the unofficial students have already lost their rights to study in the official nr six courses are running in Warsaw, with some 10 or so students each, though other meanings of scademics and inclandestine groups organyoung people them

Warsaw housing complex and found an intense curiosity and desire to expend horizons, the possible rejection of official ideology and a striking degree of sympathy for Mrs.

I had been invited to lecture at the "Flying University" but the surveillance was so great that no lecture could be arranged. I spoke instead with its organizers—brave and honest people of differing riews, whose current aim is to concentrate on unofficial publishing and preparing an independently minded educated elite for the future.

#### Young purists

They plan among, other things, a series of texts, unavailable to the Polish reading public. of political thinkers, such as Bertrand Russell. Sir Isaiah Berlin, Raymond Aron, Sir. Karl Popper and F. A. interest. Inde<del>ed</del>. Poland the very word socialism has become hopelessly compromised; and Marxism, most agree, is quite dead. There are. it is true, some young purists at the University of Warsaw who recently staged a public performance of the tenth con-gress of the Soviet Communist Party with the aim of getting the mudience to debate the Opposition was clearly favoured—but they are a small minority. One person, incoduced to us as someone with surviving interest in Marx's thought, turned out to have developed a deep interest in Edmund Burke, whose "concreteness" he found especially

Many now fear an ouslaught on independent publishing. A

clear signal of this was the arrest of the resourceful Miroslaw Chojecki, director of the remarkable NOWA publishing' house which has produced some 55 titles during the past 24 months. Accused of receiving a stolen duplicating machine, he went on hunger strike and uas eventually released after widespread pro-Hitherto, the Poles could

the subject: Aedes males can be arti-

ficially forced to copulate a maximum of about five females . . . However, when virgin meles freely complete with an excess of females for one hour . . . vesicles . usually completely accessory glands reduced in diameter.

That is the kind of filth which Professor Colverd Jones is apparently eager to publish in periodicals readily available, as far as I have been able to discover, to readers of both sexes and all ages. You will hardly believe me when I tell you that I have accounts of his researches beside which such material appears perfectly suitable for your wife and ser-vants to read. Just listen to this, for instance: it is the very first sentence of one of his papers (read, I may say, to an Entomological Congress in Vlenna, where they now no doubt think that all Americans. ere as crazy as Professor

genties of male mosquitoes rotates 180 either to the right or left during the first das been of could secoung for this

Naturally, the Amile of squito-persecutors has come up with an explanation, consisting of some mumbo-jumbo about the "vigorous peristaltic contractions of the hindgut"; it seems that a mosquito can't peace without some screwball putting on a white cost and laughing at the poor thing. But even that is nothing compared to a paper called "A Technique for Artificial Insemination of Aedes Mosquitoes . (Barmy Jones has the effrontery to admit that this sado-pornographic rubbish "was supported by a grant from the National Institute of Health, Bethesda, Maryland ". If I were a taxpayer in Maryland I would have a question or two to ask of the authorities there, I must

search for such a technique has scientific brains of the world [I think it much more likely that the brains in question were revolted by the suggestion that they should investigate the that they indignantly matter refused thus to prostitute their scientific calling; and goes on to boast that he has solved it -nay, that he has devised apparatus which "allows one to place with great accuracy various substances into the reproductive system of the female mosquito". (When he says that his system allows one to carry out this revolting activity, he naturally means himself; there is no reason to suppose that there is another investigator, mad or sane, willing to stoop so low.) He then gnes on to describe the method in detail, first warning anyone so debased as to wish to emu-late him that "Unless the female is fully anaestherized her terminalium generally moves about so much that her

with the complacent boast that

and following the details

"With practice, the bursa copulatrix of a single Aedes female can be injected with great accuracy within less than two minutes". I have heard of men who anaesthetize ladies who reject their advances number of them are in Parkburst at this very moment.

But it seems to me that what

Professor Colvard Jones has discovered is not a heap of un-necessary information about mosquitoes but a series of extraordinarily recondite sexual perversions, all of which he appears to practise. What else can be concluded about a man wito has discovered experimentally that "The male's ability to copulate is prevented by damaging or removing his seventh abdominal segment", that "We have seen many free-flying males form dense temporarily stationary clusters or rings about the body of a restrained female [I must say that it does the creature great credit to be restrained in such circumstances . . . . . and that "Unrestrained males are known to attempt to clasp a do not attempt to copulate".

trying to persuade mosquitoes and hastens to publish the news. Worse; he actually produces blue movies (" A cinematographic adalysis was made. of his activities, one of these being called "How Aedes males capture females"; in the adver-

tisement for this degrading spectacle, I am happy to say, the swine has forgotten to mclude the name of the cinema at which it is rouning, which is just as well, for to judge by his summary of the plot, it would be raided by the pelice before they were ten minuses into the first showing:

Males generally fly with one prochoracic leg lifted in a snatching position. As a male approaches a female from the rear, he executes an outside barrel-roll, and briefly appears to fly upside down underneath the female. As a consequence, the female literally flies into the male, and thus puts him in the best possible position for later orientation and copulation.

Colvard Jones one is This individual:

establish good, set for 10 to 68 at nine females, at of which he When this male quently dissected seminal vesicles v en . . .

### Milton Obote's long-awaited

comeback

Colvard Jones):

Dr Milton Obote, once (and future?) president of Uganda, will probably not need this or any other diary to remind him that today is the day he said he would return to his prostrate country. As the tally of ex-presidents has increased by one since he made his amnouncement, we made his amnouncement, we made wish announcement, we must wait

mnouncement, we must went upon today's events.
Nobody will be waiting more keenly than Professor Semankula Kiwanuka, a senior advisor to the recently custed President Godfrey Bineisa who is now under house arrest and guarded by Tanzanian troops at State House, Encebbe. The professor, who is 40, will be doing so from the temporary safety of a rented house in Cambridge, and it is thanks to him that I can disclose the immediate background of the coup.

He was one of the last to see

one of the first to learn of his intention to dismiss the army chief of staff, Brigadier David Oyine Ojok, the move which directly caused his downfall.

Professor Kiwanuke, who advised Mr Binsisa on the daunting task of reconstruction and rehabilitation, told me that in the week of the come earlier this month he had breakfast with the President on the Monday and again on the Tuesday.
On the Wednesday, both men
left for Nairobi, Mr Binaisa for
talks with President Daniel
Arap Moi of Kenya and the pro-

fessor on his way to Britain to take his wife and five children

back to Uganda. Ironically, he

Mr Binaisa as a free man

had just decided it was comparatively safe enough to do so. On the Thursday, the President went home.

To start with, the Man with

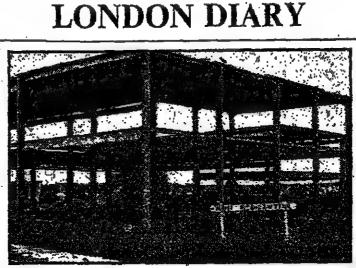

"I saw the President at his Nairobi hotel on the Wednesday night before I left for London, and I told him of my concern about the conduct of the army in detaining two lournalists without trial in defiance of

"The President said. I have reached the stage where I have to sack this man (the chief of staff).' On a visit to eastern Uganda, the President heard about an incident in Kampala. in which the army killed six people and engaged in looting when they were supposed to be searching for arms in a joint operation with the police. The authorities knew nothing about this so-called operation, and that was the last suraw for Binaisa", the professor said. On the Friday the Brigadier was sacked.

But as we all know now, Mr Binaisa had bitten off more than he could obew and was deposed by pro-Obote elements in the army and the interim parliament, on the Saturday. Professor Kiwanuka is bitterly disappointed that President Julius Nyerere, whose Tanzanen army led the campaign to depose Idi Amin which ended just 13 months and new two cours ago, is appearently acquiescing in the

present state of affairs.

The professor, who fled Uganda in 1976 and returned only last December after much reflection on the offer of a post under Mr Binaisz, concedes that he was locky to have left again when he old. "But I am going to find out what is going on and I shall campaign

In a world increasingly polluted by notices and signs, this must surely be one of the least necessary of them all. My attention was drawn to it by Mrs R. A. Foot of Newark, Nottinghamshire, whose husband took the picture.

for free and fair elections this their enormous potholes. The year, under Commonwealth supervision if possible. I hope to go back and stand for He added: "A lot of people

have said lately that Ugauda is unigovernable. But what do you expect of a people who keep on having leaders imposed on them?" I cannot think of an answer to that.

was in Uganda myself just a iew weeks before the coup. Not storprisingly, I heard only one joke, which asked: how can vou tell a Ugandan is drunk? Answer: he is the man driving in a straight line. Everybody else slatoms along the appair the list, published in this lingly neglected roads with column last week, of those em-

oddest thing I saw on the streets of Kampala was the driver's cab oi a Souret-made tank transporter, abandoned for more than a year in the middle of a narrow suburban road. I came across its trailer miles away the next day, on top of Mololo Hill which overlooks the desolated city. If anyone ever gets a firm grip on the reins of government in that tragic ruin of a country, he is going to have a lot of clearing up to do.

Saddled... Another "casualty" to add to barrassed in one way or another by the continuing confusion over the Olympic Games is a small company called Catherston Associates of Brockenhurst, Hampshire.

The firm was specially up by Ambony Loriston-Clarke and John Bhzzard to market s, belts, cosmelled and the like in aid of T-shirts, bedges and the like in and or the British Equestrian Olympic team. As luck would have it, the British Equestrian Federation was among the first sporting bodies in this country to join the boycott in response to Mrs Margaret Thatcher's only partly successful appeal.

So now the two men, borh lecturers at Southampton Col-lege of Higher Education, find themselves sitting on a mound of shirts and enamelled items worth more than £8,000. But Mr Loriston Clarke, who also runs a stud farm and whose wife, Jennie, is a world-class dressage rider, tells me that all

is fair from lost. "We started marketing our things in February last things in February last year and we managed to sell about 130,000-worth in a year. Although the campaign was naturally pegged to the Olympic Games, these are really just the cumulation of a fooryear cycle of fund-raising which is also intended to help with training and sending teams to foreign competitions. It is not as if any money raised is going to be wasted or not spent in the cause of the sport", he

Nonetheless, Catherston Asso-ciates has no ambition to be left with shirts worth £5,000 and other items worth over £3,000. They have been looking

at designs for an superimpose on t motif of a Union five horseshoes at coloured like the Ol The overprine with Dames wood, Rotterdain at bleau in August ( replace the Olym and, if all goes we "correcting" the

of the first primaries

ry four years is the great

Mr Reagan. To be convincing Mr were confined to them he would Bush had to keep on winning in the primaries, in which all registered Republican voters not just the party enthusiasts are able to vote. Success would have had a cumulative effect: so too

did defeat. The way was thus left clear for Mr Reagan, but it would be a mistake to assume that he has grasped the nomination merely by default. He has over the years established a strong bold over the affections of Republican loyalists. If party sentiment, as distinct from calculation, had determined the matter, he not President Ford would have been the Republican candidate in 1976. Mr Reagan is brilliant on television and radio, as might perhaps be expected of a former actor. He is an accomplished public speaker, who is at his most adept in encouraging the converted. His right-wing views, which previously earned him the reputation of an extremist, are now much nearer the mainstream of American popular sentiment as public opinion itself moves

So Mr Reagan, while benefiting from the errors of his most formidable opponent, has secured the nomination by zealous and skilful campaigning. But if he is to be the next President he now has to fight a rather different battle. Every challenger for the White House—sometimes, as in the case of President Carter this year and President Ford in 1976, this applies to the incumbent as well-has to conduct two distinct campaigns. One is to obtain the nomination of his party, the other is to win the election itself. They generally require rather different tactics, or at least an adjustment of tone. In 1976 Mr Carter showed great skill and determination in getting the Democratic nomination, but then seemed to run out of steam and ideas in the contest against Mr Ford-so that an overwhelming lead in the polls melted away to

a very narrow margin. The task before Mr Reagan now is rather more subtle than is sometimes supposed. It is a popular error to imagine that he got his grip on the nomination simply by appealing to Republi-can diebards. If his attraction

not now be ahead of Mr Carter in the opinion polls. Nor would he have won the support in some primaries of normally Democratic industrial workers and their families, who crossed over vote for him in the Republican primary.

So Mr Reagan is not faced with the task of extending his appeal beyond his party base, as candidates often have to do at this stage. He has done that already. The adjustment that he has to make is to conduct his campaign at a level that will continue to arouse the enthusiasm of his more ardent supporters but will also enable him to withstand the more rigorous scrutiny to which he will now be subjected by the press and broadcasters, and the sustained assaults that the Democrats will now direct at him. It is an adjustment not from right to centre, but from the more simplistic to the more carefully reasoned. He will have to sound not so much like an attractive man who might possibly be President, but like a responsible man who expects to be President.

Part of his charm for many people has lain in his readiness to make the kind of forthright and indiscreet remark that many other politicians avoid. He has accompanied this with a tend-ency on occasion to make rash and absurd comments that any politician ought to avoid. Talk, whether hypothetical or not, about a possible blockade of Cuba as a counter to the Soviet invasion of Afghenistan is not reassuring from the man who may well be the next President. It is not encouraging to hear him dismiss the energy crisis with the assertion that the United States is "an energy-rich nation".

If he becomes President he will in all probability be more sensible and pragmatic than his more empty campaign flourishes might suggest. His record as Governor of California confirms this. But if he is to conduct the second part of his campaign for the White House as successfully as he has accomplished the first he will have to ensure that he does not provide verbal bostages to opponents and critics who will be ready to seize whatever he

ING A BASE IN BUENOS AIRES

natural that Brazil and scientific and technological co- of Afghanistan. So a meeting of i should want to make .. of the recent visit to Aires by President. lo. It was the first such lo. It was the first such ences so quickly, rooted as they Brazilian President for are in the two countries' hisyears, and it opened up tories. Brazil, which took the initiative, is now an expanding insibilities for the future dustrial power which is going. sis could be laid for cothrough a difficult period. both economic and Argentina is more defensive, Brazil and Argentina having been well ahead of Brazil wo richest and most ineconomically at the beginning of countries in South the century but having then Traditionally they have watched with some resentment is, and that has stood in while Brazil proceeded to outof their pooling their restrip it. But if they started workber, instead of against

It is significant that the meeting, and the attempt to overcome past differences, has come at a time when both countries have, had their disagreements with the United States, whose influence, in South America as elsewhere, is in decline. Both countries have been resentful of pressure from Washington on human rights, Brazil in the early days of the Carter administration, Argentina more recently. Both countries have also been under pressure from the Americans over their. nuclear energy programmes. Neither of them has signed the nuclear non-proliferation treaty, and they have both turned to West Germany for help. Both have also been reluctant to help the United States by joining in

an economic embargo of the Soviet Union over the invasion

operation. Certain trade barriers, this sort is bound to look like a were removed. But there is joint statement that they intend bound to be scepticism about the to go their own way, and not possibility of overcoming differ- only in matters of nuclear tech-

nology.
One of the main elements in the final declaration was a strong statement of democratic principles, committing both Governments to a pluralist system. If this was adhered to it would be a very constructive outcome of the Buenos Aires meeting, but more tangible evidence will be needed on this, too. The Argentine military Government has frequently spoken of returning the country to a democratic system, but it has always made it clear that this would be on its own terms, and very little progress has been made so far. In Brazil, there has been a genuine commitment to abertura, or gradual liberalization, but there, too, there are limits to the process and a determination to retain power in what the military see as the right hands.

The Buenos Aires summit, then, was full of possibilities-of cooperation between two complementary economies, and of an end to the grim realities of military dictatorship. It was also perfectly normal that two countries of this size should want to develop a more mature rela-tionship with the United States. It remains to be seen how far the promise is fulfilled.

he suggests that settlements following divorce or separation have been tailored for the benefit of the better off. I feel he has failed to take account of a situation where, for example, the non-working wife of a well-paid man becomes bored with weirpain man between sold with un-pleasantness drive her husband from his home in the confident expectation that she will get a large personal income, a good amount of capital, and all the time in the world to do her own thing. Whereas the prospect of, say, a third of a policeman's or a reacher's salary doesn't encourage a woman to break from the shackles

domesticity. I think the time has come for a radical re-thinking of, what most certainly is, the maintenance

You seem quite unaware that the Court of Appeal has gone out of its way, for the first time in English expressly to recognize in principle the existence of a journalist's immunity from disclosure of sources. and this is so notwithstanding the Court exercised a discretion to deny the immunity in the instant case. However that may be, you say that the "inevitable result" of the present decision "will be that cor-

ruption, incompetence and unneces-

sary secrety will flourish ... " But

rially acquired.

Finally, may I say I agree that "Lord Denning this time is on the wrong side". He proposes unrea-sonably to withhold from some future plaintiffs (though not British Steel) the fundamental right of every litigant, that to know who has caused him the wrong of which he complains, which right was so clearly established by the House of Lords in Norwich Pharmacal v Customs and Excise Commissioners [1974] AC 133. It should not matter whether the wrongdoer breaches the plaintiff's confidence, defames his reputation, or attacks him with a cycle chain : if anyone, journalist or not, is aware of the wrongdoer's identity, the plaintiff has a right to know.

Yours faithfully. PAUL MATTHEWS 109 Camden Road, NAT.

### LETTERS TO THE EDITOR

### Possible damage from aerosols

From Sir Ralph Verney Sir, I was interested to read the

report by your Science Editor on May 19 about the effect of fluoro-carbons on the ozone layer and the likely incidence of skin cancer in humans as a result of the use of

I have asked many scientists in this field over several years now what is likely to be the effect on plants and animals, and on the rates of biological production of a small percentage change in the incidence of ultra-violet radiation penetrating the ozone layer and reaching the earth's surface, and no one has been able to tell me perhaps because in this context, that sort of research would stultify our anthropomorphic Wouldn't it be wise to pause and

dispense for a while with the labour-saving luxury of the aerosol while we conduct some basic research on the effects of hydrocarbons this side of the tropopause? There wasn't any life on this planet before the ozone layer was made. I am, Sir, your obedient servant,

RALPH VERNEY, Nature Conservancy Council, 19-20 Belgrave Square, SW1.

From Mr M. A. A. Clyne Sir, I was interested to read Pearce Wright's account (May 19) of the wrights posed to stratospheric azone by fluorochlorocarbons (FCC) used in aerosol sprays and else-where. It is not surprising that the United States authorities, who have banned the use of PCC for aerosols. are trying to exert pressure on the United Kingdom and other European countries to impose a similar ban. The conclusions of the two scientific boards involved—the National Academy of Sciences in the United States and the Strato-spheric Research Advisory Com-mittee in the United Kingdom were closely similar. They agreed that the ultimate predicted ozone depletion due to FCC would be in the range of 16-21 per cent, namely, nearly a factor of two greater than that predicted in 1976, when the National Academy of Sciences and the United Kingdom Department of the Environment produced their first report on this problem.

As a member of the Stratospheric Research Advisory Committee (which reported to the Department of the Environment), I strongly support legislative action to limit non-essential use of FCCs, along the lines of the United States federal legislation. I would empha-size that our committee was not responsible for the earlier sections of Pollution Paper No 15 which presented only the views of the Department of the Environment and the Government, As I indicated above, I do not think that these views reflect adequately the concern felt by many members of the international scientific

community. Yours faithfully, M. A. A. CLYNE, Reader in Physical Chemistry, Queen Mary College, University of London, Mile End Road, E1. May 21.

London tower blocks From the Editor of the RIBA journal

Sir, I find it remarkable that It Alam Hamilton's little polemic against the tower blocks of the City (London Diary, May 22)—illustrated by the paintings of John Spencer-Churchill—he should wax so brically about the view from Warerloo Bridge in 1945. Certainly, St Paul's stood suprems, but over what? A desert of robble and debris the afterment of Herr Hitler's

improvement. Far from providing a warning against tower blocks. Spencer-Churchill's pictures admirably point out their advantages. One only needs to go to Tower Bridge to see the environmental damage and the blocking of vistas that lower but more massive buildings can cause. Skyscrapers on the other hand provide a dramacic backdrop to buildings such as St Panl's while allowing a variety of views and vistas. Indeed, the composition of Spencer-Churchill's painting is improved by the additions of the past 34 years. The strong diagonal of the new walkway along the front of the National Theatre leads the eye to the dramatic spine of the National Westminster building, and then down past the lesser towers

to the centre piece of St Paul's. A muck better painting than his earlier Canaletto crib. PETER MURRAY, Editor, RIBA Iournal 66 Portland Place, W1

### Nuclear proliferation

From Brigadier Sir John Smyth, VC Sir, Lord Carver of course made the all-important point in his letter to you published today (May 16), that there is absolutely no possibility. and never has been, that our small British nuclear weapon should be used against the Russians in a war which the United States were not engaged...

Whether Britain should have any nuclear weapons at all is quite a different matter and I personally am in agreement with the present Government that we should have them, for two reasons. It would prevent any blackmail from a small nation which possessed nuclear weapons which we didn't have and lessen our support for the United States which have sheltered the non-communist world for many

Later in his letter Lord Carver discusses the vexed question as to whether nuclear weapons should be abolished. He hedges on this when he says that he thinks nuclear weapons should be reduced but certainly not abolished.

Nuclear war is abhorrent to the

whole world and I include Russia. But it is not prevented by beetle-browed politicians signing bits of paper. Peace can only be ensured being ready to defend it. Yours etc.

### Control over union secondary action

From Mr Alan Campbell, QC . .. Sir, An examination of the complex provisions of clause 16 of the Employment Bill reveals an intention to reflect the "first supplier/ first customer" concept; to entrench the legality of all industrial action within this ambit; also to legalize the "repercussive" effect of such action against third

parties. If a union in dispute with A wishes to take secondary action against B in order to bring pressure to bear on A, it can lawfully instruct its members not to handle the goods of C at B premises. The fact that neither B, nor C, is in dispute with the union, and employs no members of the union in dispute with A is not to the point. Further-more, the instructions may be given lawfully without prior warning, and at times even without the know-ledge of those adversely affected. There is no restraint on sympahetic " action, or a show solidarity", as such.

Although the union cannot instruct its members to prevent the delivery of goods from C to B, the practical effect of an instruction not to handle the goods of C at B. premises will be to allow a bottle-neck of goods to build up, with the result that B will refuse to take any further goods from C. In these circumstances C will have no legal redress as the action taken against B will be "direct" within the meaning of the new convoluted statutory definition.

Furthermore, as the object of the union in dispute with A would be to affect supplies of goods or services between B and A, it would be un-usual for such industrial action to be taken unless it were "likely" to have that result. In this context the issue is not whether the action taken by the union in dispute, or

any other union by way of support, is likely to further the trade dispute; but whether it is likely to prevent or disrupt the supply of oods and services between A and

There are circumstances where the legality of secondary action could be curtailed. For example, where a union in dispute with a newspaper over recognition sent an ultimatum to would-be advertisers to "black" the newspaper or else be "blacked" by all newspapers. Œ But it is all too apparent that any trade union official acting on sound legal advice (or "csreful guidance" by the TUC) could avoid such pitfalls and achieve his ends by resort to other means: and do so lawfully.

According to the opinion of Viscount Radchiffe the question of putting a man out of business by resort to secondary action ought to be considered according to its substance; and that by its substance should be either licensed control-led, or forbidden. Although it may said that the provisions of clause 16 would control secondary action, the fact of the matter is that the measure of licence proposed is very wide, and that what is forbidden could well be of little practical

It would appear that this assessment of the situation is shared by the TUC which (according to The Times, May 21, page 2, col 6) "thinks there will still remain lawful opportunities for unions to take sympathetic or blacking action designed to increase pressure on an employer, his customers and suppliers": end proposes to pro-vide such "careful guidance" as is appropriate.

1 am. Sir, your obedient servant, ALAN CAMPBELL, 1 Harcourt Buildings, Temple, EC4. May 21.

Attack on Mind official

Sir, You reported (May 15), the

vities of Mind, and the accusations of Mr van Straubenzee that the

bands of professional agitators, detailing in particular the previous role of the Director, Mr Tony

The debate was concerned about

#### Civil Service cuts From Mr Ray Burst

Str. The Prime Minister's encouncement of further cuts in the Civil Service is bad news for schoolleavers. These cuts, along with those being effected in local government and other public services, can only aggravate what is already a youth unemployment situation which has now reached crisis proportions in

some parts of the country.

A large proportion of the cuts in public services are being achieved "without significant compulsory redundancies"—in other words through the now well practised method of "natural wastage". This policy mevitably results in total bans on or savage reductions in recruitment and this has more adverse effects on young people than on any other age group. Also, because "natural wastage" means few redundancies the reaction of some trade unions is completent.

School-leavers do not have protection of trade unions but it is they who will bear the main burden of this policy. This will particularly apply to those residing in the herdest hit parts of the country. Over 50 per cent of the total notified vacancles for young people at Careers Offices are in London and whether the Government is in danger of assuming that this "south of the line" vacuacy situation re-flects the position affecting young people nationally, which it unfortunately does not.

Yours fainhfully, RAY HURST. Honorary Secretary. The Institute of Careers Officers, Fry Street, Middlesbrough,

Cleveland.

#### Yours faithfully, DENIS HILL.

Emericus Professor of Psychiatry, University of London, 271 Cottenham Park Road, SW20. May 20.

### Life under communism

Prom Miss Ursula McClean Sir, Anyone who was lucky enough to hear some of the works of the six distinguished Hungarian poets (ranging in outlook from convinced communist to devout Catholic) who visited Britain in March will, I am ours, agree with me in disputing George Theiner's statement (May 19) that "you will not find much worthwhile literature" in Budaworthwhile literature" in Buda-pest because censorship bens the majority" of the country's "best authors" I I do not know when Mr Theiner was last in a Budapest bookshop-or if he knows a certain amount of Hungarian as I do and is therefore in some position to judge—but visitors to that city can verify that there is a wide variety of literature available, both contemporary Hungarian and trans-lated works

Recent publications include works-by the philospher Agnes Reller, perhaps Hungary's most distin-guished dissident, who disagrees strongly enough with the current policies of her country to emigrate to Australia.

The excellence or otherwise of works of literature are always a matter of judgment, of course, but there is enough contemporary Hungarian literature now available in English translation to refute Mr Theiner's sweeping and arrogant generalization, as anyone who takes the trouble to look at recent issues

of the New Hungarian Quarterly, Incidentally Mr Theiner does not

sceni to be aware that there is no censor's office in Hungary (though there are laws which ban porno-graphy and sedition) or that authors whose works are turned down by a publisher can, and often do, bave No doubt "capitalist" London still has the edge over "communist" Budapest in a number of fields—Britain is still one of the ticher countries of the world-though I do not think the literary is one of them. But it might be worth considering one or two of the

advantages which in my view (after seven years' residence and frequent visits) Budapest enjoys. The lack of mugging is one of them as Catholic poet Janos Pilinszky would no doubt agree, since he was attacked and robbed of £400 in lander during his rich with the London during his visit with the other poets in March. Full employment—2 United Nations declared human right which our society rather quiet about—is another. And so, might I suggest, is the fact that Hungary, the ally of the Soviet Union, has not been pressurized into having nuclear missiles on her soil, as have been the West European allies of the United States. Yours faithfully.

URSULA McCLEAN, 32a Cornwall Gardens, SW7. May 15.

### Averting a crash

From Mr D. H. Tew ... Sir, I was saddened and disturbed to read your report (May 6) on the difficulties that Locomotion Enterprises Ltd had encountered in their work on the restoration of HMS Warrior. Saddened because I be-lieve that the work this firm has done, particularly in constructing working replicas of historic railway ocomorives, has provided a unique insight into technological history that a study of literary sources alone could not provide. The expertise that this firm has now buikt up can nowhere else be matched and it would be a tragedy if it were to collapse, while the loss of employment in an area of high unemployment would be a human

But I am disturbed at contemplating how a firm like this could have received such a firm impression that contract existed as to carry our £28,000 worth of work, and to be rold that no contract existed, so the £28,000 could not be paid. The society of which I have the nonour hisy 13.

to be President commissioned a small piece of work from Locomotion Enterprises Ltd, costing a few hundred pounds: the agreement could probably be described as of the "arm's length" type, but the firm did the work, so the society

felt honour bound to pay the bill. The society is a charitable organization but has encountered no difficulty in employing this hitherto profit-making farm or any other such firm it has dealt with It would be interesting to know just what impediment Vice-Admiral Sir Patrick Bayly has found. I pro-foundly hope that, whatever it is, it can be removed and that Locomotion Enterprises can be paid for the work they have done on HMS Warrior, so preserving this unusual and valuable firm for the Northeast and for all who cherish their ideals.

Yours faithfully, DAVID H. TEW, The Newcomen Society, The Science Museum, Exhibition Road, SW7.

### Disputed view of Saudi Arabia

From Mr H. St John Basil Armitage Sir, Mr Timothy Sisley's series of articles on Saudi Arabia (May 19 to 23) fall far short of the responsible balanced nature of reporting expected of The Times.

In his letter (May 22) her Majesty's Ambassador to Saudi Arabia commented on one of Mr Sisley's most damaging allegations: the maligning of Prince Naif, the Minister of the Interior, and his deputy, Mr al-Awaji. But it is not only their role which Mr Sisley misconstrued in such misleading

The problems and frustrations facing both nationals and foreigners in Saudi Arabia are not new. The conditions under which they are endured have been proved beyond recognition in recent years. Mr Sisley's claim (May 22) that foreigners are under the constant pressure of anxiety for their safety further maligns the host and traduces the guest to the detri-

certain aspects of the situation in Saudi Arabia but, with the exception of the article on foreign relations (May 20) for the most part merely repeats hackneyed Western news in which firm presentation of fiction is more clearly and readily identified with the preconception of decay, decadence and dissent

than with fact. Whatever the nature and extent of Saudi Arabian problems and practices, the series contributes only to Western misunderstanding and in consequence Saudi Arabian concern that the West should so misrepresent them to the world. Yours faithfully, H. ST. JOHN ARMITAGE, The Old Vicarage, East Horrington,

From Mr Richard Ellis Sir. The series of articles by Timothy Sisley and your headline of May 22 that "Saudis show a growing hostility and barshness to foreigners in their country" are misleading to a degree which calls for comment.

Neur Wells, Somerset.

for comment.

I have worked for some time in a government ministry in Saudi Arabia and am the only Westerner n my department. I can assure you that courtesy is not confined to the desert and I have not experienced "personal vengefulness" from Saudis, young or old.

In my official duties or when

shopping or travelling with my wife we have been treated by the Saudis with courtesy, helpfulness and good humour, attributes often lacking elsewhere in our travels.

We return to the Kingdom romorrow without the trepidation which might be expected from reading Mr Sisley's ill-informed reporting on the attitudes of the people of Saudi Arabia.

to be most valuable and is receiv-ing much public support, but it is I am Sir, your obedient servant, RICHARD ELLIS, 16 Fisher Close, only Mr van Straubenzee who extremely critical of its central political activity. After reading the book A Human Condition, written by Hythe, Kent. the American legal adviser to Mind.
Mr. Larry Gostin, and published as
an official document of policy by
the organization, I was not the only

### Arab view of London

From Mr R. Dellagiacoma Sir, I do not quite follow the argument of Sir Patrick Macrory's letter (May 22) about the Arabs having to put their house in order because "rightly or wrongly" we he Britsin are under the impression that their behaviour is not what it should be, on the four counts he lists.

If what we believe and feel about them is right, the argument runt smoothly enough. But if we are under a wrong impression, it is wa who have to put our house in order in these four respects, not they! Yours faithfully. RAPHAEL DELLAGIACOMA. 1 Cofton Road, West Heath.

Birmingham. May 22.

#### Children's book awards From Mr David Gadsby

Sir, The Arts Council should think again (Brian Alderson's article on children's books, May 7). Children's book publishers were delighted to learn that one of the first national book awards should he for children's literature. But Brian Alderson is right: If the Arts Coun-cil wants to travel into the territory of children's books, it urgently needs to look at the map before

hand.
We are far from happy at the way in which this year's selection of prizes took place, and we look forward to a much more considered approach next rime. Yours faithfully, DAVID GADSBY, Chairman, Christian Executive Committee, Children's

Book Group Publishers' Association, 35 Bedford Row, WC1. May 21.

### Such a tasty dish

From Mrs Brigid Grafton Green Sir, May I take your interesting correspondence on peas pottage in another direction—further back? So far your correspondents have written of the Middle Ages, I feel pretty sure, however, that peas

pottage was already old when the fourteenth-century rhyme beganand not merely nine days old, either.
The Roman cookery writer
Apicius (time of Tiberius) has nine

recipes for peas or dishes with peas, One bears chough resemblance to peas pottage cold to suggest it may be the ancestor of later peas por-tages. It contains dried peas, briled, allowed to cool, left cold and stirred from time to time, then pounded with onion, hard-boiled egg, vineger. oil, honey and garum (Roman liquid equivalent to salt).

A hundred members of my local archaeological society celebrated last Christmas with a full-drass (toga or tunic, according to sex) banquet at which 20 dishes from Apicius were served seriatim by nubile slaves. They signified a modern appreciation of peas pottage (which appeared as Pisa Trita on the menu) by demolishing it with gusto,

Yours faithfully.
BRIGID GRAFTON GREEN.

### The right to know

From Mr P. B. Matthews Sir. Your leader on British Steel v. Granada Television (May 8) cannot be allowed to pass without com-

the law does not protect third parties who attempt to conceal their corruption or incompetence from the press, for such conduct will without doubt constitute "iniquity", in which there is no right to confidence. As for "unnecessary secrecy", this goes directly to a clash of values between the journalist and the lawyer: the journalist awards the citizen a much more restricted right of privacy than the lawyer, who holds a person entitled to restrain the communication of confidential information confiden-

You appear to try to argue that, in any case, informants will refuse to come forward, but you adduce no evidence whatever for generalization. I could just as easily assert that to permit discovery in some cases would discourage persons from giving false information to the media, and that reducing the incidence of defamation would be a good thing.

> JACKIE SMYTH, 807 Nelson House, Dolphin Square, 5W1.

## £478,520 for

### maharaja's palace

furnishings

By Geraldine Norman
Sale Room Correspondent
In 1930 an Indian maharaja had
a palace built and decorated for
him in the most avant-garde European taste. On Sunday night its
furnishings were sold by Sotheby's in Monte Carlo and the 62
lots made £478,520. The sale is
a landmark for Modernist furniture.

A double bed designed in aluminium and chrome by Louis Sognor and Charlotte Aix was sold for \$60,000 francs (558,400); the buyer was French but preferred

to remain anonymous.

A fun-shaped desk in macassar ebony and chrome designed by Emile-Jacques Rubimann for the maharaja's study was sold to-gether with a red leather swivel chair and chrome wastepaper bas-ket for £43,750 to a Paris dealer.

ket for £43,750 to a Paris dealer.
Those prices are normally commanded only by fine quality eightcentin-century furniture.
The palace was decorated and
furnished by the German architect, Eckart Muthesius, for the
young maharafa of Indore, Yeswunt Rao Holkar Bahadur. It
took three years and Mothesius
commissioned pieces from leading
designers and designed pieces
himself.

designers and designer perces himself. Sotheby's did not disclose on whose behalf they were selling the furniture except to say that it no longer belonged to the maharaja's family.

Other outstanding prices included 315,000 francs (£32,800) for a lacquered wood, chrome and leather chair designed by Eileen Gray, 180,000 francs (£18,750) for a pair of large red leather armchairs with reading lights incorporated in the wings and sliver ashtravs in the arms, designed by Muthesius, and 130,000 francs (£13,541) for a tubular chrome chaise-longue

designed by Muthesius, and 130,000 francs (£13,541) for a tubular chrome chaise-longue upholstered in leopard sidn designed by Le Corbusier.

Sotheby's also auctioned furnishings from the Paris apartment of Bileen Gray, the Irish-born avant-garde designer who settled in Paris in 1909. She died in 1976 and the piecas were consisted for sale by her niece. The 66 loss totalled £275,550.

The top price was 160,000 francs (£16,540) for a painted table of multilevel geometric design made in 1972. Miss Gray was much influenced at the time by the abstract paintings of the De Still group.

A mixed property sale of Art Deco artifacts totalled £346,660, with 13 per cent unsold; four important loss countributed most of the unsold percentage.

### Agriculture: Forecasting by satellite

Science report

been going out of their way to play down this aspect and emphasize the essentially inter-state nature of the coming talks. Mr Khrushchev said that good relations established after the war between Yugoslavia and Russia had been disturbed; "we sincerely regret that this should have happened and we shall firmly remove all disagreements from that period". In this connexion he mentioned the role of provocation played in the rela-As a major exporter of food, the business community of the United States needs accurate infor-mation about forthcoming fluctuations of crop production in other countries. In the past such infor-mation has come largely from the countries themselves, and has often been inadequate and un-

often been inadequate and untimely.

A new approach became possible with the development of techniques for collecting and interpreting the necessary information at very long range, and the launching in 1972 of the first of a series of satellites that would monitor every point on the Earth at 18-day interprets. nexion he mentioned the role of provocation played in the relations between Yugoslavia and Russiz by the "already unmasked enemy of the people Beria, and Alakoumov... On our part we are ready to do everything necessary to remove all obstacles standing in the way for further normalization of our relations."

By the Strift of Nature
A series of trials in the United
States has shown that a satellite
orbiting the Earth can supply all
the information necessary for a
reliable forecast of the size of
future harvests in another part of
the world.

The trials enabled scientists to
predict total Soviet wheat production for 1977 to within 1 per centof the figure later announced from
the Soviet Union. Reviewing the
trials in Science. Dr R. B. IdacDonald and Dr F. G. Hall, of the
United States Government's Johnson Space Centre in Houston,
Texas, emphasize the value of such
forecasts as a warning of surpluses
and shortages in international
trading.

Area Crop Inventory Experiment
(LACIE), a joint effort of three
American government agencies.
Lasting from 1974 until 1978,
Lasting from detail than conventional photo-

graphy provides.

When reflected from growing crops, infra-red radiation can When reflected from growing crops, infra-red radiation can identify the species being grown and supply information about their density on the ground, state of health and stage of development. Such information was extracted from the stream of data collected by Landsat for other purposes, and analyzed in the light of existing knowledge of climate and agricultural practice in the countries concerned.

in the countries concerned.

In 1977 LACIE monitored
Soviet wheat production from
early in the season until harvest. The satellites, known as Landset, The first forecast of total produc-were the impetus for the Large tion of both winter and spring

wheat was 97.6 million metric tous, issued in August 1977.

LACIE's final estimate for the combined 1977 crop was 91.4 million metric tous. That was vary close to the 92 million metric tous officially announced in early 1978 from the Soviet Union as its total wheat production in the preceding year, and considerably mora reliable than the estimate made by the American government on the basis of information from other sources.

other sources.

In general, scientists have found information about the Soviet Union easier to analyse than that from the United States and Canada, because of the much larger fields on Soviet state farms. The satellite's instruments were insufficiently sensitive to resolve the narrow fields of spring wheat in the Great Plains region of the United States, and consequently mated. Technical improves should solve such problems.

should solve such problems.

A follow-up to LACIE, planned for the early 1980s, should show whether Landsst could be used on a regular basis for forecasting not only wheat but also other crops such as coru, rice, soybeans and forest products.

### **OBITUARY**

### MR VIVIAN LANGRISH Pianist and teacher

Professor Guy Jonson writes:
Mr Vivian Langrish, CBE,
FRAM, died on May 21 at the age of 86, as in his early years one of the most outstanding English planists of his genera-tion but he will probably be re-membered chiefly as a teacher of great distinction as evidenced in the many fine talents from all parts of the world that flowered and matured under his guidance for well over sixty

Born in Eristol in 1894, at the tender age of twelve he won a scholarship to the Royal Academy of Music, becoming a pupil of the renowned Tobias Matthay, whose profound influence was to remain with him for the rest of his life.

At that time he was the youngest of a group of brilliant students of Matthay who later were to achieve world-wide fame, amongst whom were Myra Hess, Irene Scharrer and York Bowen.

Young Langrish exhibited during his formative years a remarkable planistic flair and a natural spontaneity of musical sensibility and by the time he was launched upon the concert was sauncined upon the content platform he had developed a dynamic personality which sprang from an impelling rhyth-mic urge coupled with a warmth of emotion of heroic propor-

shafts of poetic imagery.

It is not surprising therefore that a leading critic of the day referred to him as "the English Paderewski" and his performances of works by Brahms Schumenn and Debussy are still vividly remembered by those of a former generation.

In his teaching he generated an inner intensity which was immediately transmitted to his pupils and his lessons were both highly stimulating and inspirational as I can personally testify. One could not fail to be touched by his enthusiastic love for the complete kaleidoscopic range of the music which he taught.

After serving in the RAF during the First World War he was appointed to the professorial staff of the Royal Academy of Music in 1919, having already become a piano professor of the then flourishing Tables Matthew Planeforte ing Tobias Marthay Pianoforte School where a glittering array of talent flocked to his class, especially the emergent young arrites from the United States.

In 1924 he was elected a Fellow of the Royal Academy of Music and in 1978 in recognition of his services to music with a special regard for his presentation of British piano music in the early days of broadcasting and for his great gift as a teacher, he was appointed CBE.

He married first in 1918
Helen Cavell who predeceased
him in 1950 and by whom he
had three sons, two of whom
survive him, and secondly, in survive film, and secondary, in 1953, to Ruth Harte, a former pupil and herself a distinguished pianist and professor of piano at the RAM, by whom he had

#### MR B. E. T. VILHELMSSON

Mr B. E. T. Vilhelmsson, who died recently, was the founding Managing Director of Darting-ton Glass Limited, Torrington,

Devon. Bror Eskil Tage Vilhelmsson was born in Sweden on February 25, 1914. The son of a railway station master he entered the glass industry at an early age. He was an active trade unionist until his promotion to works manager when he transferred his negotiating skills to the employers federation.
In 1964 he was invited by the
Dartington Hall Trust to build
a glass factory at Torrington and
to recruit, from his own country,

the skilled glassblowers neces-sary to train local English boys. His success in that venture is there for all to see and Dartington Glass currently has some 220 amployees.

mark the local appreciation for his efforts.

For some years Mr Vilhelms son struggled against ill health and he returned to Sweden in 1977 for that reason to live with his sister, who survives him. Anyone who knew Eskil Vilhelmsson will agree that the world will be a poorer place without him. without him.

### SIR A. C. SMITH

Sir Allan Chaimers Smith, MC, a former Chief Justice of Sierra Leone and Assistant Chief Justice of Bermudz, died on May 23. He was 87. Born on February 22, 1893, he was educated at Warwick Academy, Bermuda; and Rossell School, Langashire; before going to St. Lancashire; before going to St John's College, Oxford, Hc served during the First World War as a temporary captain in the Royal Field Artillery and was mentioned in despatches three times and awarded the MC in 1918.

In 1920 he was called to the bean Federation. Bar by Gray's Inn and from He married, in 1920. Elsie 1920 to 1934 had a law practice in Bermuda. He was Police sons and three daughters.

Magistrate of Bermuda's Wes-Magistrate of Bermuda's Western District from 1928 and of the Central District from 1934. In 1935 he went to Lagor, Nigeria, as Police Magistrate and from 1938 was Puisne Judge, Trinidad. Back in West Africa he was Puisne Judge, Gold Coast, from 1944 and from 1951 to 1955, was Chief Justice of Sierra Leone.

He returned to Bermuda in ne remarked to Bermuda in 1955 where he was, until 1963; Assistant Chief Justice. He was also a Judicial Commissioner for the Plan for a British Carib-

### MR LIONEL JARDINE

H. P. E. writes:
Lionel Jardine was a man who, besides a distinguished career in the Indian Civil Sercareer in the initial civil Service, in some way demonstrated a new type of Englishman in India during the critical period leading up to Independence. The change in him led to a range of friendships with men of all backgrounds, including some extreme nationalists, and some extreme nationalists, and made a considerable impact on the North West Frontier Province when he was Revenue Commissioner in Peshawar between 1938 and 1946.

An Indian colleague, Mr Krishna Prasada, later Postmaster General, writes of him, "Lipuel and I joined the ICS in the same year, and were allotted to the same Province. We met every day and I can therefore claim to know him. He was one of the tribe of burra sahibs' who imagined that they had been ordained by God to rule the British Empire. He carried himself with an air He carried himself with an air of superiority. But Lionel gives the lie to the theory that man's nature, his attitudes to life, his allergies to people, his reactions cannot change. I can bear witness to the miracle in his life."

Mahatma Gandhi told a mutual friend, who was also known to the Viceroy, that he had asked the Chief Minister of the NWFP to investigate the

of the NWFP to investigate the stories of Jardine's new be-haviour and he had endorsed Marjorie a them to the hilt. "If men's daughters.

motives and values can be changed, like those of the Revenue Commissioner", said Gandhi, "then the whole chess board is upset. We can begin and appthing can happen. again and anything can happen.
Go and tell the Viceroy from
me that if we have this spirit,
remembering all his difficulties, we will find agreement." On his retirement from the

On his retirement from the service in 1947, Jardine devoted the next years of his life to the world work of Moral Re-Armament. In 1956 he was invited to Nigeria to take part in the filming of a play called Freedom written by Africans when the control of the con who believed that their Independence need not lead to bloodshed, but could be built on reconciliation and new atti-tudes. His was the only white part—that of a British Resident facing a turbulent situation.
With courage and houesty he
brought to if a convincing portraval of his own change in
real life. He won the hearts of the Africans and the film has since gone round the world, with the part of "Mr Roland" immortalized by Jardine as the British official who is not afraid to admit his own mistakes. The film is still up to takes. The film is still up to date, and is at this moment being shown at the request of black and white who are working for reconciliation in the He is survived by his wife Marjorie and a son and two

#### MR MARTIN GILLETT its presidents Cardinal Huma

EJY and AJS write: After a long cancer illness, Martin Gillett died on St George's Day, From 1933, when Cardinal Bourne had inaugurated the Walsingham slipper chapel as a Marian national shrine, Gillett devoted his life to the cult of the Blessed Virgin Mary. In 1950 he came to see that

a subject so potentially divisive as Mariology should become a great uniter. So, with support from the Cardinals of England and Belgium and Bishop Alison of Winchester, he founded what has blossomed under his general secretaryship as the Ecumenical Society of the Blessed Virgin Mary, having as

Canon Douglas George Hill, sometime residentiary Canon of widow of Lieutenant-Colonel Ely Cathedral and Principal of Sir Charles McGrigor, fourth Ely Theological College from baronet, died on May 10. She sometime residentiary Canon of Ely Theological College from 1960 to 1964, died on April 27.

Mr Alan Simpson, a leading Irish theatre director died suddenly on May 15th at the age of 59. He was married to actress Hene Colgan, a mem-ber of the Dublin's Abbey Theatre Company. They had Six children.

the Society have been established widely in Britain, and a separate thriving "chapter" in the United States; at the invitation of Cardinal Baum of Washington, Gillett flew over in 1978 to inaugurate it. Martin Gillett became deacon in the Anglican Church before his conversion to Catholicism in 1932, In 1975 he was created a Knight Commander of the Order of St Gregory.

He never married.

At places why from the Greenwich meridian the Greenwich times at which the diagram applies are later than the above by one hour for each 15 deg

same face; obviously it does not rotate. But in fact it must do so. It will be on one side of the Earth on the 6th and roughly bath on the other side on the 20th, and it could not turn the same face to us unless it did rotate. The rotation period is the same as the sidereal one.

. Now compare the phases on the two dates. On the 1st it is three days after full moon, but on the 28th only 14 hours. Thus it will take another two and a half days to repeat the west, where the twilight is same phase; the "synodic period" or ordinary month is strongest, so these will be late arrivals. Vega, Deneb and Altair are in the east where the sky is darker.

all night in Reissia during the

all night in Britain during the mouth of June. This means that

the sun is never more than 18°

It is not a good time of year for finding faint objects, but

Does the Moon rotate on its for finding faint objects, but axis? We know we always see the it can be very pleasant to sit

below the northern horizon and the sky is never really dark.

west of Gresnuch and earlier by a like amount if the place be east. The map should be introd as that the huntren the observer is facing (shown by the words around the chris) is at the bottom, the nonlith being the twitze-Greonwich Mean Time, known to astro-namets as Universal Time, and expres-sed in 24-hour motitions, is used in the accompanying notes unless otherwise out in a low deck chair as the sky darkens and one by one

the stars peep out.

spot them, and direction is a relevant factor as well as the magnitudes of the stars. The four planets are almost certain to be first on your list, Venus easily leading and Jupiter second. Castor, Pollox and Capella are in the north-

It is interesting to make a note of the order in which you

Arcturus has a high altitude which gives it an advantage, whereas Antares in the south-east is handicapped by very low altitude. How do these factors affect the "coming out" of the stars? Wetch them and find out.

### Galleries gain bonus from

By a Stuff Reporter
The closure of Leeds City Art
Callery for aimost two years white
a new extension is built, is providing a bonos for other English art

galleries.

The Leeds gallery, which was uswilling to let its pictures languish unseen during the construction of the new Moore Gallery extension, has sent some Paintings, will present twentieth-century British art, with 66 works by artists, including Sickert, Paul Nash, Ben Nicholson, Augustus John, Ivon Hitchens, John Piper, Stanley Spencer and Francis Racon

Stanley Special Bacon.

The tour, organized by the Arts Council, started at Bath last week. The exhibition will go to Huddersfield, Coventry, Preston, Barnsley, Lincoln and Bolton.

## Island maps from

Prints of a map based on the first scientific survey of Guern-sey, ordered by the Duke of Richmond in 1787, are to be made Richmond in 1787, are to be made from the original copper plates presented to the island in 1960 by Major-General L. F. de Vic Cacey, a former director of the Ordnance Survey.

The island's ancient momments committee is to ask the island

Trooping the Colour

Beating Retreat, Household The Mall, Queen's Gardens,

Beating Retreat, Royal Artillery The Mail, Queen's Gardens, Spur Road, Birdcage Walk, Horse Guards Approach Road and Constitution Bill will be closed as necessary between 5.30 pm and 7.45 pm on June 10, 11 and 12.

**BUSINESS NEWS** 

concludes, pointing out that tough government monetary

statements a year ago have not

"A year ago we expressed

our scepticism about any direst link between money supply targets and wage settlements

and events so far have justified that scepticism," the institute says. It adds that the warning

that trying to administer a shock to the system could pro-

duce a financial collapse and

a collapse of output.

Although the institute does not expect the monetary targets to have much effect on reducing inflation, which is ex-

pected to he at 14 per cent even at the end of 1981, it thinks that the Government will be able to keep the money

During the current financial year it is expected to grow by 9 per cent and next financial year it is expected to expand

by 8 per cent.

Both figures are consistent with the Government's medium term financial plan. But borrowing is expected to rise

slightly next year to £8,000m from £7,900m this year.

The institute expects real earnings to continue to rise in spite of mounting unemploy-

ment and it forecasts a continu

ing deficit on our balance of payments. It has revised up-

wards its estimate of the likely deficit this year from £1,800m in its February review to

£2,500m in the latest issue.

A warning that the chances of success for the Government

policy have narrowed comes in

the latest issue of the Amex Rank Review. This says that continuing high inflation and

## year with present policies

Institute predicts average

policies will have little success in bringing down the rate of inflation over the next two years, according to the National Institute of Economic and Social Research.

Instead, they are likely to impose a severe squeeze on industry, leading to falling investment which is likely "to narm the prospects for growth

The institute forecasts two The institute forecasts two million unemployed at the end of 1981, with the total still rising, inflation averaging 15 per cent inext year after 17 per cent in 1980, and a company sector deficit of £10,000m this year and even more in 1981 for the non-financial sector.

Notably more gloomy than its

Notably more gloomy than its previous assessments of the likely pattern of output over the next two years, the insti-tute's forecast remains more optimistic than most other forecasters, including the Treasury which predicts a 21 per cent

contained in the latest issue of its quarterly Review, out today, are that output will fall by just over 1 per cent this year and that the recession will continue

well into 1981. At the heart of the institute's rejection of the current govern-ment policy is the belief that it will fail to moderate pay settle-ments. The institute has long been the leading advocate of incomes policy and recent developments have reinforced it in this view.

It believes that wage rises will continue at a high rate with countries a light face through the next pay round, with average earnings in the fourth quarter of 1981 standing 184 per cent above their level

capacity at Anglesey ended at the beginning of last year with

the British power authorities

unable to agree to Kaiser's request for energy supplies at

reduced cost.
Mr Jesse Erickson, a Kaiser

vice-president, said in London that the talks were "in

recess ". However, the corpora-

tion was still interested in expanding the Anglesey plant

and a smelter at Voerde in West Germany, "given the right economics".

The Anglesey smelter pro-duces metal at the rate of

112,000 tons a year against a rated capacity of 100,000 tons.

It was one of Kaiser's better smelters, Mr Erickson said, and

was providing a very satisfac-

tory return. Investment in Britain's three

big aluminium smelters, built

in the 1960s, was attracted by

cheap power, the details of which have never been re-

vealed. The Government now

fears that a repetition of such deals could trigger claims from

other energy intensive indust-

The most likely places for

new aluminium smelting capacity to cope with demand over the next decade are those

which can supply relatively cheap energy.

### Minister is unlikely to inflation rate of 15 pc next visit Inmos in America

Sir Keith Joseph, Secretary of State for Industry, has ap-parently declined the invitation by Inmos, the National Enterprise Board's semi-conductor subsidiary, to visit the company's development and production facilities at Colorado Springs during his visit to the United States this

week.
But his programme includes talks with the top management of at least two of lumos's competitors. Motorola and Intel. Having been fully briefed in London on the case for sup-porting Inmoss—which at present means approving the company's second £25m tranche of NEB investment— Sir Keith will presumably be hearing the opposing view from the established micro-electronics leaders in northern

California's Silicon Valley. According to the Department of Industry, the purpose of Sir Keith's American visit is "to encourage United States industrial investment in the United Kingdom and to visit high-tech-nology couranies". A spokes-man for the Department said vesterday that no change to the Secretary of State's pro-gramme had been made to en-able a visit to lamos to be in-

The programme began yes-terday with the first day of a two-day visit to Chicago, where Sir Keith was due to speak to the Mid-America Committee and meet chairmen of Chicagobased companies.

Tomorrow he is due to arrive to the Santa Clara County con-centration of microelectronics companies that has become known as Silicon Valley. He will be briefed by experts from SRI International (formerly Stanford Research Institute) on new developments in microelectronics and biotechnology.

On Thursday he will visit Apple Computer, Hewlett-Pack-ard and Motorola, and will meet top management from other companies including In-tel. He will give an address to the Electronics Association of California on the merits of in-vesting in Britain, coinciding with a Department of Industry "Invest in Britain" seminar.

From California Sir Keith will fly to Washington DC, where he will speak at Georgetown University at a seminar organized by the Centre for Strategic and International Studies. He will also have discussions with financiers in Washington and in New York.

On June 3 he begins a threeday visit to Mexico City for in-formal general discussions with Seuor José Andrés de Oleiza, the Mexican Minister of Natio-nal Resources and Industrial Development, and other minis-ters, arriving back in London on Friday, June 6,

The case for Lamos which tire company and the National Enterprise Board put to Sir Keith some five mouths ago (in seeking approval for the second £25m investment) was repeated last week in a presentation to MPs by Dr Richard Petritz, managing director of Inmos. In essence Dr Petritz was

arguing that the time was right because a new step in techno-logy—to what is known as Very Lerge Scale Integration (VLSI) is involved, giving new com panies a chance to move into

the industry.

The market for metal-oxide-silicon (MOS) semiconductor products is expected to exceed £3,000m a year in 1984. This demand will mainly be for a small number of standard microcircuits which will be made in very large volumes. In particular, Inmos will introduce two memory micro-circuits which are known res-pectively as a 16K static RAM (a random-access memory cir-cuit with over 16,000 memory lements) and a 64K dynamic RAM (another type of randomaccess memory with over 64,000 elements). The market for the latter circuit is expected to be worth £500m a

### Government responds to call for tougher curbs on union power

By Patricia Tisdall
Management Correspondent
The Government has re-

sponded to pressure for tougher measures to curb strikes by starting immediate talks about further industrial relations legislation even before its present Employment Bill reaches the statute books.

Critics of the Bill have been agreeably surprised by the speed with which discussions, which are a preliminary to the Green Paper reviewing trade union immunities, have been launched. Further legislation has been promised if, in the Government's view, this review shows it to be necessary.

Employers' views are being sought for inclusion in the Green Paper, which is experted to be published in the late autumn. In what promises to be one of the most comprehensive government consultation exercises undertaken moderate and extremist employer repre-sentatives are being invited to submit opinions

A delegation from the Institute of Directors, whose direc-tor general, Mr Walter Gold-smith, has been one of the most outspoken advocates for stronger measures, met Mr James Prior, Secretary of State for Employment last week.

The Association of British Chambers of Commerce, which also wants a number of changes, is expected to put its views to Mr Prior shortly. The Confed-eration of British Industry, which as the umbrella organization for industrialists represents employers who are doubt-ful about the advisability of even the present mensures as

Walter Goldsmith: outspoken advocate of stronger

well as those who want more legislation, is expected to be one of the last to give a con-sidered opinion.

Discussions will centre on the question of what if any im-munities from legal liability should be given to unions. At present, although individuals may be prosecuted, unions as an entity are immune from legal proceedings for any action, whether or not it is in furtherance of a trade dispute. In a paper circulated to mem-bers, the Institute of Directors is proposing that unions as a whole should be regarded as having a corporate personality for the purpose of establishing their legal liabilities. It further suggests that unions should then only have immunity for their actions if these are under-taken in contemplation or fur-

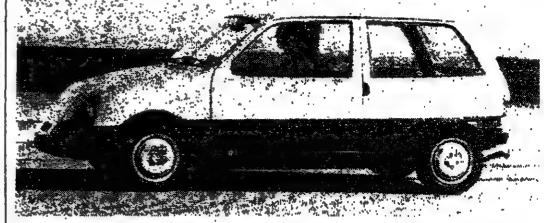

therance of a trade dispute and secondly, that unions should be liable for the industrial activi-ties of their officials.

This would remove the protection given to union funds which followed the 1901 Taff Vale case and, as the Institute itself points out, "invoke memories of bitter industrial struggles". Other disadvantages are that such a move would have kittle effect on the many unofficial strikes.

The Institute is strongly in favour of secret ballots, suggesting that these are perhaps the most acceptable way of regularing the activities of people involved in industrial disputes. Mr Goldsmith believes that Mr Goldsmin believes that closed shop agreements should be tested by ballot at regular intervals and has proposed that these should be held every five

Employers' organizations, such as the Engineering Employers' Federation, which are involved in day-to-day negotiations with trade unicus, are fearful that such measures would worsen rather than improve industrial relations:

In a letter to The Times last month. Mr Anthony Frodsham, the EEF's director-general, said initial investigations suggested that there were "considerable dangers" in introducing secret ballots for strike action without proper study of its likely effects. Employers who are used to dealing with unions are worried that such measures may encourage splinter groups and weaken union negotiators abilities to make and enforce

This prototype of a new mid-sized family car being developed by British Leyland can run at 100 miles per gallon. The car, codenamed ECV2, gives 100 mpg at 30 mph, 50 mpg at 60 mph, and should be able to return 70 mpg even in town driving. The ECV2 could be in production by 1987-1988 if BL can find the cash to build it.

### Steel union advocates | Inquiry on **Hunterston disposal**

Industrial Editor
Disposal of the £60m iron ore
direct reduction plants at Hunterston in Scotland and leasing of parts of the adjoining British Steel Corporation berth and stores will be advocated by the eration in a recovery plan to be published next month.

The direct reduction plants are an embarrassing testament to BSC's expansion plans in the 1970s. The decision to go ahead with the plants was taken only after a heated boardroom

After completion 18 months ago the direct reduction plants have been idle and the prospects of them being used are

The plants are designed to produce iron in pellets which can be fed into electric arc teelmaking furnaces as an alternative feed to scrap metal. There have been discussions with private sector steelmakers on the possibility of their taking a part of the production from the Hunterston direct reduction plants but no agreement has been reached.

Industry sources estimate that the cost of iron produced from the plants would be at least double the price steel-makers pay for ferrous scrap.

Building the Hunterston ore and raw materials terminal was regarded as the first step

ment of a further greenfield steelworks on the Ayrshire But those plans have long

been abandoned and the terminal now provides facilities for the BSC steelmaking complex at Ravenscraig.
The confederation's alternative strategy will emphasize reconstruction of the corpora-tions's balance sheet in contrast

to the corporation's policy of cutting production capacity to 15 million tonnes and making thousands redundant.
The Government is already

committed to introduce legisation to effect the reconstruction in the next session of Parliament.

accounts for the last financial year to be published this summer, will reveal the extent of the revaluation of its assets undertaken to reflect the reduced capacity to which it is

This is likely to require a writing down of the net book value of its assets by more than The confederation is also

urging State support compatible with that available to EEC competitors and is calling for a large investment in continuous casting for steelmaking to improve efficiency, economies of production and upgrading quality.

## pricing by oil groups

By Our Commercial Editor The Office of Fair Trading is nvestigating complaints from independent petrol retailers about the alleged pricing policies of some large oil com-

panies. Some oil companies, it is alleged have operated a predatory pricing policy by keeping prices in their own outlets artificially low, forcing independents to sell at what for them are uneconomic prices.

It is alleged there have been some refusals to supply certain independent outlets. But it is understood that insufficient evidence has emerged to justify an investigation by the polies and Mergers Commission.

If the Office of Fair Trading finds evidence of these prac-tices, which are claimed to be forcing small petrol stations out of business, it will consider an investigation of at least one of the oil companies, using the Director General of Fair Trading's new powers under the

Competition Act. Anxiety is growing among some of the smaller outlets tied to oil companies over changes from the leasing to the licensing of outlets. Saudi benchmark: Opec oil

ministers are likely to use a benchmark of at lesst 530 a barrel for Saudi crude if they meeting in Algiers on June 9.

Board remains hopeful of restraining growth in bank reserves

of Norwegian

## Interest rate control still eludes the Fed

American interest rates have been so volatile recently that one might conclude the Federal Reserve Board had lost control. The Ped changed its technique for managing the money supply last October from a system based largely on the control of interest rates to a system which involved

of the change might be more volatile interest rates. The rate changes of recent months have reflected not so much changes in Fed policies, bur a sharp change in the economy's overall fortunes.

the growth of bank reserves. It made it

clear from the start that one consequence

The Fed's efforts to restrain credit growth were partly frustrated by the dramatic effect that the big oil price increases had on inflation expectations. In January and February the fears of inflation getting beyond control prompted big consumer credit demands, as people sought by any means to buy goods before the next round of price rises. To counter this in mid-February the Fed moved to tighten credit conditions.

The results were spectacular. Increased loan demand and reduced money availability meant an explosion in interest rates. Treasury Bill rates rose between

mid-February and mid-March from 134 per cent to 154 per cent.

To curb consumer demand for credit, on March 14 the Fed imposed restrictions the main effect of which was to make it less profitable for lenders to issue new

Now two new forces clashed. The Fed's tighter money policies of last October were starting to dampen overall economic activity and the new measures were cutting consumer credit availability. The result was a sharp fall in loan

The interest rate trend moved into reverse, with rates falling rapidly, and by last Friday the Treasury Bill rate was 71 per cent. So meagre had consumer credit demand become, because of the unwillingness of lenders to lend in an atmosphere of mounting fears of unemployment and declines in real incomes, that the Fed's restrictions on demand were irrelevant. What good are traffic lights when no one is driving any more? The Fed started easing the March 14 restrictions on May 5 and it took another

step in this direction last Thursday night. The remaining restrictions will probably be removed soon. "The March 14 measures were however

merely a distraction from the Fed's prime purpose of restraining the growth of bank reserves. The Fed has set itself a target and is not to be distracted by volatile interest rates.

The reason it has not moved faster to remove the March 14 restrictions is that its leaders are concerned about giving the impression of changing policy. A gradual phasing out of the restrictions, they hope, will convince people that they remain firm to their prime objective of slowing money supply growth to secure, over time, lower inflation levels.

The key to Fed-watching these days is not interest rates but the money stock data in association with the Fed's targets. So far money growth has been well below target levels and only when it rises, for a nime above these targets can one conclude that the Fed has moved to an easier course. .The key numbers for Fed watchers

remain those targets for growth for the year to the final quarter of 1980 announ-ced on February 19 by the Fed chairman and which call for ranges of between 3 and 6 per cent for M1A, between 4 and 64 per cent for M1B, between 6 and 9 per cent for M2 and between 61 and 91 per

Frank Vogl

### Co-op chief calls internal power struggles 'tragedy'

From Derek Harris Isle of Man, May 26

Power struggles in the cooperative movement, with attempts to "emasculate and denigrate" the management of the Co-operative Wholesale Society, were described as a tragedy by Mr Harry Bailey, this year's president of the Cooperative Congress, in his presidential address to the opening session of the movement's an-

aual parliament bere today., He attacked the Co-operative Retail Societies, to which the CWS acres as manufacturer and supplier of goods and services, for their "archaic" buying systems.

He said: "The blunt issue is that in this day and age buy- should reduce its profits to ing in bits and pieces only provide cheaper goods. makes cermin that our competitors can laugh all the way to the bank".

Although the CWS supplies own decisions on sources of turers, which affects its ability to buy at the lowest prices.

Mr Bailey urged the societies to drop individual buying, leaving central procurement to the CWS. This would leave societies free to concentrate on selling, a pattern followed by the Co-op's competitors among the mul-tiples which have been gradually eroding the movement's market share.

The cooperative movement's buying system was ancient and absurd. Yet for years it had been claimed that the reason for the movement's lack of competitiveness on the high street was that the CWS did not buy correctly and charged too much. It is the opinion of some

retail societies that the CWS

The tragedy was that relations between the CWS and

the societies had worsened over the years. Yet it was the management expertise of the 68 per cent of retail societies' CWS which rescued the col-needs, the societies make their lapsed Scottish retailing operations-a fact "conveniently forsupply. This can make it diffi- gotten by people in the drive cult for the CWS to give firm to emasculate if possible and orders to outside manufac denigrate CWS management".

Ro

Recent developments amongst the merchant hanks, and the abortive approach by Merrill Lynch to Hill Samuel, have again focused attention on the future of the City's institu-

Not that there have been many signs of change amongst the investing institutionsthe insurance companies and pension funds themselves. But amongst the institutions which serve the needs of this first tier of the financial structure, much is in a state

Of course none of this is new. Merchant banking is a business in a constant state of redefinition. Stockbrokers and jobbers have, however, on the whole retained their characteristic functions, though the frequent mergers-particularly amongst the jobbers-are an indication of the strain involved in doing

The latest flurries of activity are imporfant, principally because they reflect the expansionary instincts of the merchant banks at a time when-because of outside forces like entry into the EEC and the abandonment of exchange controls on the one hand, and the thrust of restrictive practices legislation on the other-the position of brokers and jobbers is potentially more vulnerable than ever before.

The forces for change were there already. The combination of factors-dividend controls, the high cost of dealing, and above all the tax advantages-that have taken private individuals out of direct investment in the stock market and into investment like housing, life assurance, and commodities, have at the same time undermined the functions of the stockbroker and extended (because of the development of a one-way market) the risks of the stock jobber.

'The decision that jobbers may now deal direct with foreign holders of foreign shares, and the possibility that there will be a ruling against the dual capacity system under the restrictive practices legislation, simply bring into focus changes that would have happened

Almost certainly there will always be room in the City for some independent advisers on investment; but there is no doubt that if minimum commissions and/or dual capacity went, the present range of advisers would go too.

Under those circumstances it is possible to envisage consolidation of the service conglomerate-whatever they call themselves-with activities ranging through fund management and investment dealings to

· Such a development would certainly be preferable to the other alternative—the development of even bigger conglomerates, in which these service activities would be subsumed into the activities of the great financial institutions like the insurance companies or the clearing banks.

The insurance companies have shown no inclination in this direction, but the clearing banks have to a large extent taken on the role of financial supermarkets in the High Street already with their unit trust sales and their insurance broking activities, and more recently, their tentative advances on the housing market.

That is fair enough, given the extent of the competition at the consumer end. But a corresponding move in the City would be ominous. And the development of in-house merchant banking activities—and their more recent activities in foreign currency broking-have shown that the clearers are not averse to taking this route.

• The North Sea oil boom is getting a second wind with the seventh round of oil licences. Far Temoved from the industry's carlier fears that increasing government involvement, hoth directly through the BNOC and indirectly through a tougher tax regime, would stifle development is the present rush to get a piece of the action.

The past few weeks have sen a number of new entrants lining up at the starting post. Less surprising is the fact that major British groups like Taylor-Woodrow, Grand Metropolitan or Trusthouse Forte, having seen the likes of London Merchant Securities, Tricentrol or Lasmo transformed as a result of an ambitious decision a few years ago into major British companies, are now trying

Nor is Saxon Oil, a new exploration com-

pany backed by Singer & Friedlander, Houre Govett and two large investment trusts all that different in pedigree from Lasmo in its carly days. But Barclays Bank's decision to put up risk capital instead of lending against the security of proven oil finds breaks rather newer ground.

Quite apart from the debate about whether shareholders' funds ought to be put into high risk investment of this kind is the fact that the move seems to put some form of imprimatur on North Sea exploration which may encourage other less experienced companies to chance their arm.

What has stimulated all this activity is clearly the seemingly never-ending rise in oil prices which has turned the North Sea from a boom or bust proposition to what appears to be a fairly safe investment.

The seventh round is also offering 20 blocks on a self-selection basis which seismic surveys have already indicated to be attractive, and unlike earlier rounds it is clear that it will be more important to be British than have expertise in exploration to be successful in the licence bids.

The present Government is also trying to delineate the role of BNOC, curbing some of its earlier privileges, while recent PRT changes have suggested that the Government has no wish to kill the golden goose. The odds against success remain as great as ever but that won't deter the hopeful.

US interest rates

#### Turmoil in the markets

The turmoil in short-term dollar interest rates has not yet come to an end. Prime rate structures now vary widely from bank to bank and leapfrogging is the order of the day. But this is hardly surprising since the drop in money rates has been so fast as to have left prime well behind.

With Federal Funds down at 9 per cent and 13-week Treasury bills around 7½ per cent prime is still hopelessly lagging at 14½ to 16 per cent after Citibank's move last Friday to chop two points off its rate.

Markets continue to regard prime rate as key indicator even though it has for some time ceased to be so. It will have to fall much farther yet before it establishes a normal relationship with other rates. The American banks, which were squeezed when rates were rising, are making handsome profits because their own cost of funds is so far below prime, so they will be in no hurry to see equilibrium restored.

There is in any case deep uncertainty about just where rates might be expected to settle. In official United States circles it appears there is a growing conviction that the economy is heading for an alarming recession. This has become fully apparent only within the past four to six weeks.

There has therefore been an abrupt reversal of policy. From squeezing credit hard to choke off borrowing demand and bring monetary growth back under control, the emphasis is now to stimulate a revival to prevent the impending recession from becoming too severe.

Even after a halving of interest ratesthree month Eurodollars were 20 per cent at the start of April and are now 9} per centthe relaxation of credit controls late last week suggests the Federal Reserve Board is willing to see a further decline in rates yet.

For the markets all this is rather difficult to take in. The expectation of a reaction has been growing, but so far there has been only a brief pause for breath. Indeed, with short rates once again below long, it is at last possible to finance bond holdings profitably. This is a positive factor of considerable importance for the bond markets.

For international investors, however, the strength of the bond market has to be seen in relation to the weakness of the dollar. Despite the decline in the United States, short-term rates elsewhere have hardly moved. Other countries, almost universally, are adhering to their tight money policies and reaping the counter-inflationary benefits of strengthening currencies.

Yen interest rates are now a good two points above American rates while Deutsche mark rates are little more than a point or so below them. Few believe that this reflects the realities of information.

Not quite compulsory arbitration on incomes Professor James Meade of Cambridge been driven to change the policy in the

stature and a constant source of new ideas. In the last year since the publication of his report on how an expenditure tax might replace income tax. he has been addressing himself to, among other things, to finding a solution to the central unresolved dilentma

of present economic policy.

That is, it appears to be impossible to run the economy at anything like acceptable simultaneous levels of employment and inflation without some kind of incomes policy; while at the same time it is impossible to think of an incomes policy that does not do more harm than good.

The Prime Minister has in the past rejected the idea of an iocomes policy rejected the idea of an incomes policy on the sensible and pragmatic grounds that such policies have not worked in the past. It is, however, equally possible to stand that argument on its head and say that the reason why successive governments have again and again been driven to try incomes policies is that periods of free collective bargaining have not worked either. More specifically, it has been true, both of free bargaining and of incomes policies in the last twenty years, that the first year of the new policy has been the most successful; that the problems, conflicts and anomalies have

lems, conflicts and anomalies have begun to emerge in the second and

third or fourth year.
It is possible that the present Government has found the new way forward to growth without wage inflation. In any event it will be the better part of a year before the evidence from the next pay round begins to establish the truth, one way or the other. It is cer-tainly too early for the Government itself to muse in public about what shape a Thatcher incomes policy might take. It is, therefore, all the more important that someone like Professor leade has been given some original thought to the problem so far in

He starts from what might be called the Tom Jackson Sidner Weighell position that uncontrolled monopoly bargaining by trade unions inficts economic and moral damage on society. but that so long as the name of the game is free collective bargaining 2 negotiator is bound to try to get the most for those he is representing. Since 90 per cent of national income now goes to earned income, it is inevitable that a large pay increase to any particular group can only be at the relative expense of some other earners. Meade's argument then runs as follows. It is essential that the wage settlement process should be decen-tralized. A modern economy is too

complicated to be run from the centre by the CBI, the TUC, the Government, anyone else for that matter. In principle the present fashions for fixing pay by comparability, or in return for improved productivity, or in order to help the low paid all produce perverse results.

The right pay scale for any job should be one which over time produces sufficient job applications of the required quality. To base pay increases over a norm solely on the existence of "genuine" productivity is, except in the shortest term, grossly unfair to those who have no restrictive practice to sell. Except for a limited number of cases where compulsory wage councils are appropriate, the best way to help the low paid is to give them training for and access to higher paid

jobs.
This basic analysis (here only crudely summarized) coupled with a desire to find a "better and a fairer way" than damaging industrial action as a way to resolve pay bargaining, has led Pro-fessor Meade to the idea of a particular kind of arbitration as the solution.

In his scheme, wage negotiation would remain entirely decentralized and undirected. If, however, a settlement was not reached, either party could go to a permanently established national arbitration court. Unlike apparently similar existing bodies, such a court

would not be a "method of g without loss of face an infiaward to a particular group in to ward off a particular in strike". Its function would award what it saw as the right pay, given the state of the market and the prospects of t

or industry in question. (He toys, even, with a ye ingenious suggestion made to Mr George Schultz on the basi experience as the United State tary of Labour. Mr Schultz st be limited solely to making it either in favour of the employ

### Uncertainty troubles Scotland's industrial catalyst

Development Agency is facing its most diffi-cult time since it was created five years ago as the Scottish cousin to the National Enterprise Board. Last October ministers introduced new and tougher guidelines governing industrial investment by the agency. Although in detail these left the SDA little more restricted than it was under the Labour government, the demand for a more commercial approach has scaled down its big industrial investments.

Recent soundings among Scottish merchant banks indicate that the agency is taking a more cautious approach to new ventures, and would rather lose the opportunity of a promising prospect than take a wrong step th that produced another

In its short life the SDA has had its share of failures, although the small business division has produced an impressive record of success and its wider role in improving the environment has also brought dramatic change to some of the shabbier parts of Scotland.

To date, the SDA in its major investment programme has invested £22m in 41 companies, securing employment for 11,000. There have been eight large failures bringing a loss of some £1.7m. But it could be argued that if the SDA is to work properly there must be some risk. Certainly it was not set up merely to duplicate the function of the banks. In the small business division there are 4,200 on the register and the division has made equity investments and loans amounting to £3.5m.

The future of the agency's biggest investment hangs in the balance, though it cannot yet be Vehicles into which £4m has been sunk in developing a revolutionary cross country truck, will go to the receiver unless a buyer for all or part of the agency's 76 per stake can be found. Negotiations are now in progress.

Motor distribution and trade Tozer, Kemsley, Mill-(TKM) is interested in acquiring the company and believes the vehicle has a market in the Middle East and South America. Another British company is also said to be

But the question remains whether either of these firms will accede to the agency's basic requirement that Stone-field should continue production at New Cummock, Ayrshive, Any number of buyers could

be found for the design of the vehicle but the point of the agency's original investment

area of high unemployment. Whatever happens, Stone-field is likely to mean a heavy loss for the agency. It is under pressure from ministers to cut purchaser cannot be found, then the receiver is the only option.

As Scotland fights for a larger share of international industry the SDA has been conabour the possibility that it may have to cut back on its overseas representation. The SDA has had an office in New York for a year and recently opened a second American office in San Fran-

It is clear that within the agency there has been dis-satisfaction with the way Scotland was being promoted through the consular service and the Invest in Britain Bureau. The record showed poorly against the aggressive ractics of the Irish Republic. With the economy facing even

conviction that large industry was vitally important to secure the maximum number of jobs, the SDA believes it is necessary to have a distinctively Scottish voice abroad giving pre-cise information about the advantages of setting up business in Scotland.

As an outpost of Scotland.

we operate to a different set of priorities than any other British government agency. The system as it had been did not work well for Scotland", said an agency official.

As far as the investment role the SDA is concerned, the likely policy in future will be to draw a stronger line between its investment and management roles and it will not be attracted by any company with a lame look about it.

An encouraging number of firms have come forward in answer to the agency's appeal for healthy industry to give management assistance to those sectors that are struggling.

Over 40 of the bluer chip companies in Scotland have said they are prepared to help, but the difficulty has been in finding the smaller company which will admit that it is struggling. That has been the main problem throughout its short history—by the time the agency is called in, the target of its help is too often settling into the hands of the receiver.

## Energy high on the list of priorities for Venice

Senior officials met in Paris last week to finalize plans for on June 22 and 23. The Venice meeting promises to be exceptionally busy and constructive notably on the energy front.

It will be the first series of the se

It will be the first meeting of the leaders of the principal industrial nations since the Russian invasion of Afghanis-tan. The United States appeal to the allies for economic sanctions on Iran and foreign policy to raise prices sharply and affairs are bound to occupy ensuring supply shortages from most of the first day of the time to time.

Only Mrs Thatcher and Mr Pierre Trudeau, the Canadian Prime Minister, are out of the election woods as this meeting sources and agreement, too, comes into focus. Premier that initiatives taken at the Masayoshi Ohira of Japan is facing an election just before ulate action in oil importing the summit; the Italian hosts have more than enough domestic problems to worry about; meanwhile, President Carter, Chancellor Helmut

expect too much on the economic front from this meeting. But no summit of this kind (the previous ones were in Rambouillet, France in 1975, Puerto Rico in 1976, London in 1977, Bonn in 1978 and Tokyo ear) has been better prepared. There has been a whole array of meetings in recent months to ensure success with an agenda focused on general economic policy, energy, trade, development aid and monetary

affairs. For months now it has been umoured that the French President would announce a bold currency reform plan at the meeting; but this now seems unlikely. In fact, there will be no new initiatives on the monetary front. At a time of currency instability and with further petro-dollar recyling problems coming, the lack of summit concern with money matters is a disappointment.

There should be progress on the control of future demand for oil. President Carter said recently that the main emphasis on the talks in Venice will be on energy. The summit will be concerned with two areas—oil pricing and approved to improve demand in the short term and production in the lower term and term are term and term and term are term and term and term are term are term and term are term and term are term are term are term are term are term and term are ter oil supply in the longer term-where those preparing for the summit have worked long hours and where significant decisions are likely-

## Business Diary profile: Adrian Swire and British shipping

It is remarkable how in British shipping, a kind of aristocratic cettage industry, familiar names keep such a firm grip on the

Adrian Swire, who is due to take over as president of the General Council of British Shipof Swire's. He succeeds a Ropner of Ropner's, who succeeded (with the young high-flyer from BP, Peter Walters, between) an Inchcape of Inchcape's. Previous Ropners filled the slot in 1901, 1950 and 1958; a previous Inchcape in 1903, 1918 and 1919. Swire, coming from one of those very wealthy families that tend to shun the limelight, is the first of that ilk to hold the post, though they have been in shipping 160 years. He is cer-tainly the only one to own and

fly a Spirfire.
At 48 he is deputy chairman of John Swire & Sons (elder other John is chairman) and descendent of John Samuel Swire, the Liverpool merchant who founded the merchant who founded the legendary Butterfield and Swire in Britain's Victorian heyday in

Butterfield long ago went the way of Marks's Spencer, but Swires have remained in control (and private ownership) of a group that, starting as ship agents and owners in China, has branched into transport, trading and manufacturing throughout the Middle and Far East, Australia, and North America. With Hongkong as the operating hub and London as the source of ultimate control it made a profit of around £30m as year (£75m if managed but not owned associates are included) on a turnover of around £600m.

This derives from over a third in shipping, a quarter in property, and the remainder in assorted trading and manu-facturing from tea plantations in Kenya through one of the largest independent airlines in the East (Cathay Pacific) to the franchise for canning Coca-Cola in Salt Lake City. A far cry from trade between Shanghai and Liverpool; and John and Adrian not only run it, but, along with family and a few

executives, are much the largest handsome, with the elegant shareholders.

It is a remarkable story of room farce. In background:

It is a remarkable story of continuity. Why, in what must be a generic lottery, does one family go on raising people of the calibre to run successfully

Swire himself, on first meeting, gives few clues as to his quality. In appearance: tall,

Shadowing the Fleet: Adrian Swire, president of the General Council of British Shipping.

room farce. In background: Eton, Oxford, the Guards. In

a huge commercial empire and lead a substantial industry when others conspicuously fail

snrewd and very tough opera-tor". As shipping's spokesman, says another, he will be "super": good with people, quick, decisive, dispassionate, and with a great sense of humour. If this sounds gushing, it has to be reported that critics, in London at least, are bard to find. Swire himself, hardly surprisingly, is a strong believer in the family firms that still, if oil industry tonnage is ex-cluded, run a fifth of Britain's merchant fleet. "Shipping is a highly individualistic business", It requires quick decisions and entrepreneurial flair of the kind shown by people like Niarchos and Pao, but which the publicly quoted company finds less casy. A private company is able to take the long, long view,

without being sniped at by and financial shareholders iournalists.' But may not the family business, lacking the stimulus of "sniping", lapse into slumber, and promote family duds to high places? "It is a danger, and the answer lies in seeing the business as a family trust to be handed on to future generations, and being ruthless in maintaining quality. I believe our profit record in recent years

Shows that we have been so."
On the industry's prospects be

is modestly optimistic. " A year

ago I would have been very

gloomy, but things are much better. Apart from big tankers things are not as grim as they were. There are weaknesses in liners, especially the container side; but for bulk-carriers things are much better.

"We should not be too mesmerized by the drop in size of the British fleet from 50 million to 36 million to 35 is

a serious reduction, but what remains is an extremely good, modern, efficient fleet. There is a strong presence in the growth areas: containers, refrigerated, gas and chemical cacriers. I hope the reduction has bottomed out. But we have to accept that our overall costs are higher because of domestic

inflation, and we are not so far from north European standards. Swire believes the answer to keep ahead of the competition is to be more cost effective, although the lower end of the market will cause problems. "But we are still strong in

management and know-how, both at sea and ashore. There is still great growth, particu-larly in the Pacific Basin, British influence is still strong in the triangle between Japan, Australia, and Judia. It is a growth area, and there is a good deal of warmth towards British interests."

The British party political see-saw causes no problems for Swire. He has good relationships with governments of both parties. There may not be a lot of votes in shipping, but they have realized that there is a very substantial direct contribution of around £1,000m a year, plus another £400m in 'import saving'"

Michael Baily

# Another record yea

1978 1979 £10,663,000 Turnover £5,395,000 +98% Profit before tax £1,204,000 £470,000 +156% £427,000 Profit after tax £969,000 +127% Earnings per share +84%

### Price of a banking oligarchy

صكدآ من الاصل

From Mr Colin Watson Sir. As an example of the complacency of the United Kingdom clearing banks one need not look much farther than the letter of Mr B. G Pearse of Barclays Bank (May 6);

In attempting to rationalize the high proportion of the unbanked in the United Kingdom be attempts only to quibble with the interpretation of marginal figures and concludes therefore that "a much smaller proportion of the population is unbanked than Mr Hatton believes ". Does Mr Pearse and the clearing banks really believe that this resolves the situation? Very probably they do, as when one operates in a virtual monopoly one hardly need bother to do more than casually brush off criticism

Mr Pearse also comments that "we (the British banks) have gone a long way towards publishing our charges". If one were to imagine this comment coming from say a grocer or restaurateur one would perceive the enormous arrogance that crease in unemployment it underlies this statement. There is, of course, absolutely no reason why the banks should not so all the way in publicizing their charges as does every single other enterprise that expects to survive in a free enterprise system.

> Undoubtedly, a substantial degree of blame must attach to successive governments, who have irresponsibly permitted a heavily centralized oligarchy for ease of regulation at the unwarranted expense of the British public.

Yours faithfully. COLIN WATSON, 62 Westbury Road, Northwood. Middlesex.

### MARKET REPORTS

### **Profits** growth in Japan on the wane

Signs that the strong profits growth of the past year is now coming to an end are beginning to come our of Japan.
After tax profits increased from 8,444m yeu to 13,910m yer

in the year to last March on a sales gain of almost a fifth to 480,980m yen at Toray, the textile group. Although sales are expected to rise by another 7,000m yen the group warns that rising fuel and raw material costs will cut pretax profits in the current year from 32.030m yen to around 23,000m

The large electrical group, Toshiba, announcing a 112 per cent rise in after tax profits to a record 41,040m yen last year, said that it expected profits in the year to next March to be static despite a projected increase in sales.

profits in the current year from last year's record 34,310m yen to about 31,000m yen, after last year's 50 per cent gain. Although vehicle sales are ex-pected to rise from 3.13m to 3.22m, the yen's recovery against the dollar will rob it of ex-change profits, which helped boost last year's earnings by 13,000m yen.

#### Poseidon

Former Australian nickel irst-ever dividend. Out of a first-half rise in profits from A\$1.16m to A\$3.18m, arising from dividends from its 47 per cept holding in gold producer Kalgoorlie Lake View, Poseidon is paying 5 cents.

#### Hudson's Bay plans

Hudson's Bay oil and gas company of Alberta, expects to invest upwards of \$7ba during the next decade, most of it to discover and develop petroleum resources. Mr R. F. Haskayne, the president states.

He said the thrust of the company's long-range efforts will be to maintain a strong position in oil and natural gas production in western Canada, step up participation in the nation's frontier areas, and nation's expand international exploration and production.

Noting that the company now accounts for about 5 per cent of Canada's domestic hydrocarbon production, he said We also have the objective of achieving, as a minimum, 5 per cent of Canada's synthetic crude oil production from the oil sands of Alberta.

brewer Bass, the blue chip re-

looked for. The short working week means that Government economic indicators are thin on the

ground.

The preliminary estimate of gross domestic product for the first quarter is released by the CSO today along with retail sales for April from the Department of Trade and the CBI monthly trends for May from the CBI.

On Thursday, the unemployment figures, number of days lost through strikes, overtime and short-time working, and investment intentions of industry for 1980-81 are published by the Department of Industry with the energy trends from the Department of Energy.

Finally on Friday, the car

and commercial vehicle produc-tion figures for April and the sales orders for the engineering industry during February are released by the Department of Industry.

Interim figures from Tate & improvement over the corresponding period after allowing for a rather mixed trading period. Pretax profits, excluding all exceptional items, £144m.
It is thought the group will should stand at £10m compared with £6.3m. have made only a small im-provement in the second half

This will be in spite of a confered at the interim stage.

The whole drug sector remains depressed with the high cost of research and developtinued duli performance in the group's sugar refining activities as well as its starch and glucose operations. On the plus side trading has remained buoyant in the raw sugar market with higher prices still in evidence while United Molasses is expected to make another increased contribution.

With the decision to reduce the dividend payments to two a year from three an interim Stag Line. Finals: Barlows, dividend of 5.7p gross is Panto (P.), and Pickles (Wm.). expected.

Looking to the full year an improvement in the overseas refining market may belp to push profits from £20.3m to about £25m.

Interim figures from Bass,

(1st quarter), Spring Grove Services, and Tate and Lyle. Finals: Brunning Group, Cap-per Neill, Dunhill (Alfred), also tomorrow, are unlikely to match last week's performance from Whitbread. Estimates Globe and Phoenix Gold Minrange from £45m to £47m with ing, M & G Second Dual Tst. property surpluses swelling the Monks Investment Tst, and New figure to £50m compared with Throgmorton Tst. last year's figure of £45.7m.

The group is likely to report THURSDAY-laterims: Sir J. Causton, Greenhall Whitley, ICL, and Proprietors of Hays

a small increase in volume. Price rises will have made little impact this time round although some benefit should be reflected in the full-year figures where analysts are going for about £121m against £104m last time. The dividend this time is

likely to be about 13 per cent

higher than the corresponding figure of 3p. Full-year figures from Courtaulds on Thursday are unlikely to hold many surprises to most observers. Many of them are expecting a downturn of about £4m to £60m with the final dividend last year of 8.1p gross ers, Minster Assets, and Wet-

being maintained.

With a meeting in Brussels

last week of the five major wheat exporters the ban on sales to Russia came in for close scrutiny. As expected the United States delegation urged for the maintenance of a full embargo to which the EEC, Canada and Australia have given their support since January. Only Argentina has not

done so. It is generally considered that the ban has not been a success. not just because of the lack of Argentinian support. The Sovie harvest is now expected to be reasonably good after a mild winter although disease is now threatening the crop.

Australia is likely to allow limited grain sales in 1980-81up to 25 per cent of the 1979-80 sales which amounted to 2.2 million tonnes of wheat and one million tonnes of barley-

to Russia. In market trading it has been another stable week with rates holding steady. Grain levels remained firm to both western and eastern destinations.

But as they buy dollars, they

must supply local currency to

the market, and this could

undermine European central bank efforts to get inflation

if the heads of state of the major industrial countries fail

to achieve better coordination of economic policies at their

summit meeting in Venice next month. "The dollar is due for

s 10 per cent downward cor-

specialist adds.

Despite pessimism about the

rection ", another

Yields of international dollar bonds have declined to a level that could leave its investors with practically no real return after extrapolating for the underlying rate of United States inflation, some market economists contend, writes AP Dow-

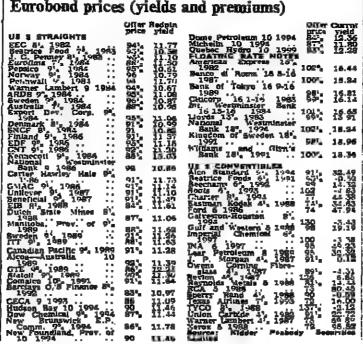

Jones. "The real rate is negative on all dollar instruments regardless of how one interprets changes in the consumer price index", says Mr Charless Geisst, an economist and bond analyst at Chemical Bank International.

#### **Euromarkets**

Basically, Mr Geisst and other nalysts assert that the dollar bond market has reacted almost exclusively to an abrupt has not taken into account some of the fundamental forces that could keep inflation at rela-tively high levels. For instance, if the oil-pro-

ducers cartel raises oil prices again at its meeting in Algeria next month, as some oil indus-

### buoyancy.

# Brandt report stirs debat

It is becoming quietly apparent in the course of discussions prompted by the Brandt Commission report\* that the differences of opinion on mining exploration, finance and development in poor countries are even greater than had been

More than that, the specific proposals advanced by the commission for alleviating these problems are now themselves the main area of controversy. One important preliminary difficulty in these discussions is to define who is involved. The report in a way that tends, unfortunately, to be characteristic of such documents, more often than not speaks of the "industrialized" and the "developing" countries, or of mining companies and indi-vidual countries in rather general terms. To some extent

According to one well-informed banker, the dollar could come in for a rough time this is unavoidable.

If, however, one is talking of mineral exploration, finance and development, it is possible to go further and identify three or four main factors: the host countries in which the deposits lie, the mining companies financial institutions (which schematically might be con-sidered as one), and the con-sumers—who can be regarded as either countries or indus-

medium-term outlook for the dollar bond market, no one is quarreling with its near-term That these parties are in an ultimate sense mutually depen-dent is self-evident. The report's message—flashed many times that we all live on Spaceship Earth is hardly novel. But it

equally valuable and mundane truth that we are not all identical. In other words, there are also real differences of interest and outlook which may be less easily eradicable than the report sometimes

seems to suppose. The importance of such dif- financial institution ferences grows more obvious amused by such enteri when one considers the policies of the three groups listed earlier towards the general aims of a new mineral regime for poor countries maintaining price stability, or at least pre-dictability, and greater participation in mining ventures by the developing nations.

#### Mining

The mining companies, for their part, stress the huge problems in finding new deposits, let alone exploiting them. By definition, a deposit is a freak—an anomaly in geological jargon—and therefore scarce. Just as scarce is the mine-finder, the scientist with the instinct of a prospector.

At the moment virtually no exploration is being conducted in black Africa, save for the

black Africa, save for the Francophone countries, because the companies claim that creeping nationalization and bureaucratic interference bave reached intolerable levels, Latin America is now the most fashionable area as evidenced by Rio Tinto—Zinc's probable does sometimes conceal the new venture in Panama

Against this comfortable. Two mir been nationalized, an while Lornex paid a

From the developing tries' viewpoint, the o do not offer a fair sha spoils. As a project and prices rise, the agreement suddenly cheap. Political presamend it may be in Very often disputes stem from cultural di over the nature of a rather than a mutuali

Civil Service Commission, Alencan Link,

Multi-national pharmaceutical manufacturer is forming a highly specialised hospital sales team in the U.K.

For the experienced hospital sales representative who has consistently been at the top. of the sales ladder, earnings in excess of £10,000 per annum are very realistic. Those who meet the initial sales goal will be given early opportunity for management positions. We are aware that this is an unusual earnings opportunity and can best be attained by persons who have a successful career in selling hospital products such as I.V. solutions, anaesthetics, and other drugs used in C.C.U., I.T.U., Theatre and Casualty.

Applicants who have experience in providing product education to nursing personnel on all shifts-day, evening and nights will be given preference.

A car and liberal expense account are provided.

Kindly respond giving previous five years' experience to : Mr. Robert Ogle, International Medication Systems, 11 Royal Oak Way South, Daventry, NN11 5PJ.

(Your reply will be strictly confidential)

### Have you ever wished you were better employed?

YOU COULD BE WORKING for The Times newspaper as a Field Sales Executive selling the benefits of our world-famous classified columns to all types of commercial businesses on an important London territory. You will be in your middle twenties. Previous selling experience is not essential, but you will need to demonstrate a thoroughly professional amoroach. thoroughly professional approach-drive, enthusiasm and adaptability drive, entinusiasm and adaptability are just some of the qualities needed to carry out this challenging position. If we think you're as good as you say you are, we'll make you the best by developing your potential through our recognised training programme. We'll pay you a starting salary of £6,325 plus a company car, expenses and approximately 1½ mouths boliday. mouths holiday.

061-834:1234 Queries in connection with advertisements that have appeared, other than cancelutions or alterations, tel: Classified Queries Department 01-837 1234, extn. 7180. 04-87 1234, extm. 7180.

All advertisements are subject to the conditions of acceptance of Times Newspapers Limited, copies of which are available

> PLEASE CHECK YOURAD.

We make every effort to avoid errors in advertisements. Each one is carefully checked and proof read. When thousands of advenisements are handled each day mistakes do occur and we ask therefore that you check your ad and, if you spot an error, report it to the Classified Queries Department immediately by telephoning 01-8371234 (Ext. 7180). We regret that we cannot be responsible for more than one day's incorrect insertion if you do not.

THE DEADLINE FOR ALL COPY IS 24 HOURS.

Alterations to copy is 3.00 pm. prior to the day of publication. For Monday's issue the dead-line is 12 noon Saturday. On all cancellations a Stop Number will be issued to the advertiser. On any subsequent queries regarding the cancellation, this Stop Number must be quoted.

HE SAVED US, not because of deeds done by us in righteous-ness, but in virtue of his own mercy by . . . renewal in the Holy Spirit. Titus 3: 5 (R.S.V.).

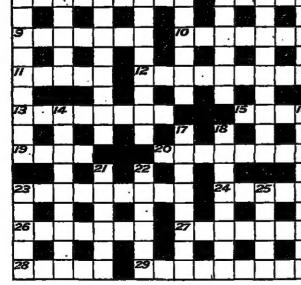

BIRTHS

ABEL SMITH.—On May 25th, at Bi Terera's Hospital, Wimbiedon, in Lind and Robert.— 3 on 10 miles of the May 25th at Torbay and John—a son thanky John John—a son thanky John Bailly.—On May 22nd to Eather and Daniel—a son thanky John Bailly.—On May 22nd to Eather and Daniel—a son thanky John Lighbeit ince Woodall; and John John—a son 'Thmothy David Charles a brother for Lucinda Paris for Rebocca.
